OLIVER AND BOYD, EDINBURGH.

Price One Shilling.

Marriages:—OCT., NOV., DEC., 1906. **Births & Deaths:**—JAN., FEB., MAR., 1907.

During the quarter ended 31st March last, there were registered in the 827 Registrars' Districts in Ireland 26,175 births—a number equal to an annual birth-rate of 23·9 in every 1,000 of the estimated population*—and 23,387 deaths, representing an annual rate of 21·4 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,559 persons emigrated.

In England last quarter, the birth-rate represented was 26·6 in every 1,000 of the estimated population, and the death-rate 18·6 per 1,000.

The birth-rate in Ireland for the quarter is 0·2 over the average rate for the corresponding quarter of the ten years 1897–1906, but 0·1 below the rate for the first quarter of 1906. The deaths are 2,702 above those registered in the corresponding quarter of 1906; the death-rate is 2·5 above the rate for that quarter, and equal to the average for the first quarter of the ten years 1897–1906.

Compared with those for the corresponding quarter of 1906, the returns of pauperism, furnished by the Local Government Board, show a decrease of 556 in the average number of Workhouse inmates on

* See page 84.

Saturdays during the quarter, and a decrease of 719 in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years 1897-1906, the number of Workhouse inmates shows an increase of 713, but the number of persons on out-door relief a decrease of 1,472,* the total under both heads being 0·7 per cent. below the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·6 per cent.

The annual marriage-rate (4·9 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1906 is 0·2 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each **Province and County** in Ireland, the Annual Rate per 1,000 of the Population,† represented by the number of **Marriages** registered during the Quarter ended 31st December, 1906, and by the **Births and Deaths** registered in the Quarter ended 31st March, 1907.

† The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 23.

MARRIAGES.

The marriages (5,321) registered in Ireland during the fourth quarter of 1906 are equivalent to an annual rate of 4·9 per 1,000 of the estimated population, being equal to the rate for the corresponding quarter of 1905, and 0·2 above the average rate for the fourth quarter of the ten years 1896–1905. Of the total number of marriages 3,543 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,778 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·4 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·3 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·4 above the average rate for the corresponding quarter of the previous ten years, but that under the latter shows a decrease of 0·3. Of the 22,557 marriages registered last year, 6,981 were registered in the first quarter, 5,140 in the second, 5,115 in the third, and 5,321 in the fourth.

TABLE II.—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the eleven years 1896–1906, and the average number for the ten years 1896–1905.

BIRTHS.

The number of births registered during the quarter ended 31st March last was 26,175—13,510 boys and 12,665 girls—being equal to an annual ratio of 1 in every 41·8, or 23·9 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1897–1906 was 26,386, equivalent to an annual rate of 23·7 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23·5 per 1,000 of the population according to the Census of 1901; Munster, 22·6; Ulster, 24·0; and Connaught, 23·6.

The highest county or county borough birth-rate* is 32·5 for Dublin county borough, and the lowest 17·4 for Cavan county. Of the intermediate rates the highest five are—Belfast county borough, 30·4; Mayo, 27·0; Donegal, 24·8; Kerry, 24·1; and Limerick county and county borough, 23·7. The lowest five are—Queen's, 17·5; Fermanagh, 19·1; Wexford, 19·1; Dublin county, 19·1; and King's, 19·2.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 23,387—11,547 males and 11,840 females—affording an annual ratio of 1 in every 46·8, or 21·4 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1897–1906 was also 21·4 per 1,000.

The death-rate in Leinster was 22·7 per 1,000 of the population according to the Census of 1901; in Munster, 19·1; in Ulster, 22·6; and in Connaught, 17·0.

The county or county borough death-rates* range from 15·6 in Carlow to 30·1 in Dublin county borough. Between these rates the lowest five are—Mayo, 15·7; Kerry, 15·8; Galway, 16·8; King's, 16·9; and Queen's, 17·3; and the highest five are—Monaghan, 25·1; Armagh, 24·3; Tyrone, 23·7; Waterford, 23·3; and Belfast county borough, 22·9.

* See note (†) on page 2.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1897–1906, and the average number for that period ; also the number registered during the first quarter of the year 1907 :—

1907,	23.9					21.4				

Ages.—Of the 23,387 deaths registered last quarter 2,631, or 11.2 per cent., were of children under 1 year old ; and 11,106, or 47.5 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 100.5 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 12.8 per cent. of the total deaths registered therein ; in Munster, 10.9 per cent. ; in Ulster, 10.7 per cent. ; and in Connaught, 9.9 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 43.3 per cent. ; in Munster, to 48.8 per cent. ; in Ulster, to 47.6 per cent. ; and in Connaught, to 54.5 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 747, or 35 less than the number registered in the corresponding quarter of 1906, and is equivalent to an annual rate of 0.7 per 1,000 living, being equal to the rate for the first quarter of 1906, but 0.2 below the average rate for the first quarter of the ten years 1897–1906.

* See Note (†) on page 11.

The following tabular statement shows the mortality from each of the principal epidemic diseases, as registered during the March quarter of 1907, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years 1902-1906.

Name of Disease.	Number of Deaths in March quarter, 1907.	Average number of Deaths in March quarter of the 5 years, 1902-1906.
Small-pox,	2
Measles,	90	167
Scarlet Fever,	34	56
Typhus,	13	18
Whooping-cough,	236	267
Diphtheria,	67	91
Pyrexia (origin uncertain),	17	14
Enteric Fever,	101	110
Diarrhoeal Diseases,	189	143

Small-pox.—There was no death from small-pox registered in Ireland during the quarter, nor during any of the 4 preceding quarters; neither was there any reference to the incidence of the disease made by the Registrars in the notes appended to their quarterly numerical returns.

Measles—During the quarter the deaths registered as from measles numbered 90, being 77 under the average (167) for the March quarter of the preceding five years. In the June, September, and December quarters of 1906, deaths from measles were 121, 72, and 80 respectively. Of the 90 deaths from measles, 28 occurred in the county borough of Dublin, 13 in the county of Louth, and 11 in the county borough of Belfast, the deaths registered from this disease (52) in the three latter areas representing nearly 58 per cent. of the total deaths from measles registered in Ireland during the quarter. Included in the 28 deaths for the county borough of Dublin are 14 deaths for the registrar's district of South City No. 1; the 13 deaths returned for the county of Louth all occurred in the registrar's district of Dundalk; and of the 11 deaths registered in the county borough of Belfast, 6 occurred in the registrar's district of Belfast Urban No. 4.

Scarlet Fever.—The number of deaths (34) from scarlet fever is considerably below the average (56) for the corresponding quarter of the five years, 1902-1906, and is 13 under the March quarter of 1902, the number for which is lower than that for any of the March quarters of the five years ending with 1906.

In the March quarter of 1906, the deaths from this disease numbered 50, in the June quarter 23, in the September quarter they numbered 27, and in the December quarter 39.

Typhus.—The mortality from typhus—13 deaths—is below that for any of the quarters of the past two years, with the single exception of the March quarter of 1905, when 12 deaths were registered, and is 5 below

the average (18 deaths) for the corresponding March quarter of the five years 1902-1906. In the June, September, and December quarters of 1906, the number of deaths from typhus was 24, 22, and 18 respectively.

Of the 13 deaths registered, one death was returned for each of the registrars' districts of Dublin North City No. 2, South City No. 2, South City No. 3, Bandon, Cork Rural No. 1, and Middleton No. 1. One death occurred in the registrar's district of Belfast Urban No. 2, 3 deaths in Oughterard, one death each in Bangor and Binghamstown, in the Union of Belmullet, and one in the registrar's district of Sligo No. 2.

Whooping-cough.—The number of deaths from whooping-cough registered during the quarter was 236. This number (representing an annual rate of 0.22 per 1,000 of the estimated population), although 31 under the average (267) for the corresponding March quarter of the preceding five years, is 28 above the number (208) for the September quarter of 1906, and 72 above the number (164) for the December quarter of 1906, 42 over the number for the March quarter of 1905, and 41 over that for the corresponding quarter of 1906.

In the March quarter of the three years 1902-1904, the number of deaths from whooping-cough registered was 192, 287, and 466, respectively.

Of the 236 deaths from whooping-cough registered during the quarter, 56 occurred in the county borough of Dublin, 41 in the county of Cork (including the county borough of Cork), 20 each in the county of Antrim and in the county borough of Belfast, and 18 in the county of Monaghan. The 155 deaths registered in these areas constitute nearly two-thirds of all the deaths from whooping-cough registered in Ireland during the quarter.

There were 14 deaths from the disease registered in the Union of Carrickmacross, including 6 in the registrar's district of Donaghmoynce (representing an annual rate of 4.18 per 1,000 of the population), 4 in Raferagh (equal to an annual rate of 4.10 per 1,000 of the population), and 4 in Carrickmacross, equivalent to 2.72 per 1,000 of the population. In the registrar's district of Kilkenny No. 2 there were 6 deaths from whooping-cough registered, 5 in each of the registrar's districts of Ennistimon and Coleraine, and 4 each in Ballyhorgan and Donegal.

Diphtheria.—The number of deaths from diphtheria, which fell from 94 in the March quarter of 1906, to 65 in each of the June and September quarters, rising to 92 in the December quarter, fell to 67 in the period under notice, being 24 under the average (91) for the March quarter of the 5 years preceding.

There were 9 deaths registered in the county borough of Belfast, 7 in the county borough of Dublin, and 6 in the county of Down.

Enteric Fever.—The mortality from enteric fever during the quarter was 101 deaths, or 9 under the average (110) for the corresponding period of the five years 1902-1906. In the first, second, third, and fourth quarters of the year 1906, the numbers of deaths registered were 114, 88, 82, and 91, respectively.

Of the 101 deaths, 19 were registered in the county borough of Belfast, 10 in the county of Down, 9 in the county of Cork (including the county borough of Cork), and 7 in the county of Galway.

In 27 county or county borough areas, one or more deaths from this disease were registered.

There were 17 deaths returned as from pyrexia (origin uncertain).—a condition heretofore described, as simple, continued, or ill-defined fever.

Diarrhoeal Diseases.—The deaths from this group of diseases, which numbered 184 in the March quarter of 1906, 180 in the June quarter, 835 in the September quarter, and 478 in the December quarter, were 189 in the period under notice (representing an annual rate of 0·17 per 1,000 of the population), or 46 more than the average (143) for the March quarter of the 5 years ending with 1906.

Included in the 189 deaths registered in Ireland during the quarter, 23 occurred in the county borough of Belfast, 20 in the county borough of Dublin, 14 in the county of Cork (including the county borough of Cork), and 13 in each of the counties of Antrim and Down.

In 31 county or county borough areas, one or more deaths from one or other form of diarrhoea occurred.

Tuberculous Disease.—The number of deaths from all forms of tuberculous disease, as returned by the Registrars, was 3,017, or 2·76 per 1,000 of the estimated population. The rates represented by the deaths so returned during the three preceding quarters were 2·84, 2·29, and 2·21, respectively, per 1,000 of the population. Among the Registrar's Notes, forming the Appendix to this Report, observations by the Registrars of the following districts, with reference to tuberculous disease, appear:—Rathangan No. 1, Callan, Ballinacarrigy, Milltown, New Ross, Bannow, Durrus and Kilerohane, Newmarket, (in Kanturk Union); Ballyfeard, Aghada, Galbally, Silvermines, Mullinahone, Kilsheelan No. 1, Waterford Urban No. 1, Lurgan No. 1, Killashandra, Holywell No. 2, Rosguill, and Roosky.

Malignant Diseases.—Deaths from carcinoma, sarcoma, and cancer (undefined), are included under this heading, and numbered during the quarter, as stated by the Registrars, 774, representing an annual death rate of 0·71 per 1,000 of the population estimated to the middle of the year 1907. In the three preceding quarters the annual rates represented by deaths from malignant disease in Ireland were, respectively, 0·71, 0·70, and 0·73 per 1,000 of the population. For the province of Leinster the annual rate per 1,000 of the population, according to the Census of 1901, was 0·86; for Munster, 0·52; for Ulster, 0·82, and for Connaught it was 0·39.

The Registrars of the following districts have furnished observations on this subject, which are embodied in the Appendix to this Report, viz.:—Rathangan No. 2, Abbeyshrule, Galbally, Rathgormuck, Ardmore, Knocknadona, Lisburn, Killashandra, Trillick, Duunmore, Ballyhaunis, Brideswell, and Roosky.

Hydrophobia.—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases :—Measles in 17 districts, scarlet fever in 19, whooping-cough in 27, diphtheria in 12, fever in 14—typhus in one, and enteric in 13—diarrhoea in 3, influenza in 111, mumps in 2, and cerebro-spinal fever, or cerebro-spinal meningitis, in 25, viz., Carrickbyrne, Dingle, Cushendall, Larne, Aghalee, Rich Hill, Lurgan No. 1, Belfast Urban No. 3, Belfast Urban No. 4, Belfast Urban No. 7, Belfast Urban No. 9, Belfast Urban No. 11, Belfast Urban No. 12, Belfast Urban No. 13, Bailieborough, Tullyvin, Castlereagh No. 1, Killyleagh, Ballylesson, Saintfield, Newtownards, Newtown Butler, Rosslea, Clones, and Ballyleague. [See Appendix to this Report commencing on page 85.]

Inquests.—There were 510 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 46 of the total deaths registered.

■ In Leinster there was 1 inquest to every 43 deaths registered, in Munster 1 to 55, in Ulster 1 to 36, and in Connaught 1 to 153.

Deaths in Public Institutions.—Of the 23,387 deaths registered, 4,659, or 19·9 per cent., occurred in public institutions. In Leinster the percentage was 26·9, in Munster 24·2, in Ulster 14·7, and in Connaught 12·3.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1907, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	<i>Pyrexia</i> * (origin uncertain).	Enteric Fever.	Diarrhoeal Diseases.

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 24·2, and the birth-rate 29·2 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 19·6 and the birth-rate 21·0 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·2 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the First Quarter of the year 1907, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES; † from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 30th March, 1907.

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1907, there were 16,444 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st March last, was 4,559 (2,870 males and 1,689 females), being 115 more than in the corresponding quarter of the year 1906, and 101 above the average number for the first quarter of the ten years 1897-1906.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March in 1906 and 1907:—

MONTHS	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1906.	1907.	In-crease.	De-crease.	1906.	1907.	In-crease.	De-crease.	1906.	1907.	In-crease.	De-crease.
January, .	498	413	-	85	340	280	-	60	838	693	-	145
February, .	583	712	129	-	401	484	83	-	984	1,196	212	-
March, .	1,710	1,745	35	-	912	925	13	-	2,622	2,670	48	-
Total, .	2,791	2,870	79	-	1,653	1,689	36	-	4,444	4,559*	115	-

* Including 2,692 emigrants to the United States of America, viz.:—271 in the month of January, 655 in February, and 1,766 in March. Of 2,403 steerage passengers, 520 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1906 the average price was $5\frac{1}{2}d.$, and in the corresponding quarter of 1897 it was also $5\frac{1}{2}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 14s. 6d. per cwt., being the same as the average for the corresponding quarter of the year 1906. In the first quarter of 1897 the average price was 12s. 9d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3s. 8d. to 4s. 3d. In the first quarter of 1906 the average prices were 2s. 3d. to 2s. 9d., and the prices for the corresponding quarter of 1897 were 1s. 9d. to 3s. 3d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 50s. to 55s. 9d. per cwt. In the corresponding quarter of 1906 the average prices were from 47s. 6d. to 53s., and in the first quarter of 1897 they were from 45s. 6d. to 56s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 22s. to 24s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £87 $\frac{5}{16}$, and the lowest £84 $\frac{7}{8}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, which had been $6\frac{1}{2}$ per cent. from the 19th October, 1906, was reduced on the 17th January, to $5\frac{1}{2}$ per cent., at which rate it remained to the end of the quarter.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1907 was 46,965, or 556 under the average for the corresponding period in 1906.

The average weekly number of persons receiving out-door relief during the quarter was 58,131, being 719 under the average for the first quarter of 1906.

Of the persons receiving in-door relief during the first quarter of 1907, an average number of 1,476 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1906 the average weekly number was 1,451.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1907, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phœnix Park, Dublin, during the first quarter of the years 1902–1907, respectively,

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 18).

The mean height of the barometer during the first quarter of 1907 was 30·138 inches, being 0·265 over the average for the corresponding quarter of the five years 1902–1906; the highest reading (30·934 inches) was on the 23rd January, at 9 A.M., wind E.N.E., and the lowest (28·954 inches) on the 16th March, at 9 P.M., wind W.S.W.

The mean temperature of the air during the quarter was 40·9°, or 1·0 below the average for the first quarter of the 5 years 1902–1906.

The maximum temperature of the air during the quarter was 64·4° and the minimum 21·1°. The maximum heat in sun was 112·5°, and the minimum on the grass 16·2°.

Rain or snow fell on 41 days during the quarter. The rain-fall measured 4·304 inches, being 2·589 inches below the average for the first quarter of the five years 1902–1906. The greatest monthly rain-fall was in March, when 2·398 inches were registered.

The wind blew on 31 days from W., on 22 days from S.W., on 3 days each from E. and S., on 2 days each from N., S.E., and N.W., on 1 day from N.E., and the air was calm on 24 days at 9 A.M.

January.—The mean height of the barometer during this month was 30·305 inches; the highest reading (30·934 inches) was on the 23rd at 9 A.M., wind E.N.E.; and the lowest (28·959 inches) on the 1st, at 9 P.M., wind S.W. The mean temperature of the air was 40·4°, the maximum registered was 53·2°, and the minimum 22·4°. The 19th was the warmest day and the 24th the coldest night. The mean of the dry bulb was 40·2°, and of the wet bulb 33·6°. The maximum heat in sun was 81·7°, and the minimum on the grass 18·5°. The minimum on the grass was below 32° on 17 nights. The total amount of sunshine recorded was 53·5 hours, the greatest daily amount being 7·2 hours on the 30th. The maximum ozone was 0·9, the minimum 0·2, and the mean 0·6. Rain or snow fell on 11 days. The rain-fall measured 0·569 inch; the greatest amount in 24 hours was ·250 inch on the 1st.

February.—The mean height of the barometer during this month was 30·003 inches; the highest reading (30·566 inches) was on the 5th at 9 A.M., air calm, and the lowest (28·999 inches) on the 12th, at 9 A.M., wind N.N.E. The mean temperature of the air was 38·2°, the maximum registered was 54·3°, and the minimum 21·1°. The 13th was the warmest day, and the 5th the coldest night. The mean of the dry bulb was 37·7°, and of the wet bulb 36·0°. The maximum heat in sun was 94·4°, and the minimum on the grass 16·2°. The minimum on the grass was below 32° on 20 nights. The total amount of sunshine recorded was 91·4 hours, the greatest daily amount being 8·9 hours on the 13th and 21st. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain or snow fell on 13 days. The rain-fall measured 1·337 inches; the greatest amount in 24 hours was ·340 inch on the 11th.

March.—The mean height of the barometer during this month was 30·105 inches; the highest reading (30·483 inches) was on the 22nd at 9 P.M., air calm; and the lowest (28·954 inches) on the 16th, at 9 P.M., wind W.S.W. The mean temperature of the air was 44·2°; the maximum registered was 64·4°, and the minimum 24·9°. The 27th was the warmest day, and the 23rd the coldest night. The mean of the dry bulb was 44·2°, and of the wet bulb 42·0°. The maximum heat in sun was 112·5°, and the minimum on the grass 21·3°. The minimum on the grass was below 32° on 21 nights. The total amount of sunshine recorded was 152·7 hours, the greatest daily amount being 11·3 hours on the 29th. The maximum ozone was 1·0, the minimum 0·2, and the mean 0·6. Rain or snow fell on 17 days. The rain-fall measured 2·398 inches; the greatest amount in 24 hours was ·740 inch on the 19th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Esq, LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 20 and 21), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind observations at Valencia are based on the records of a standard Robinson anemometer (factor 2·2). Velocities between 13 and 38 miles in the hour have been entered in the Tables as strong winds, velocities of 39 miles in the hour, or above, as gales. At the remaining stations the wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Donaghadee,	Do.
Belfast, Queen's College,	John Wylie, B.A.
Armagh, The Observatory,	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point,	Meteorological Office.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	O. Boeddicker, Ph.D., for the Earl of Rosse, K.P.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Waterford,	J. N. White, Esq.

* The Hours of Observation are 9 a.m. and 9 p.m., local time, at all the Stations except Malin Head, Donegal, where the observations are made at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m.; and where also Greenwich observations are made at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m.; and where also Greenwiche's Point, are based on the morning observations only. They are printed in different type to distinguish.

† The Averages are based on observations as follows:—Rainfall 35 years, 1871-1905; Temperature 30 years, 1871-1905; and the number of observations of Calm, and the number of days of Moderate and Strong wind (force 4-7), the number of observations of Calm, and the number of days.

‡ The Sunshine Values for Dublin are obtained at the Mountjoy Observatory in the Phoenix Park, and

[illegible]

(a) See note (*), page 23.

* The Registrars' Districts (827 in number) are Sub-divisional Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same name, formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 35 and 36 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 30th December, 1906, to 30th March, 1907.

‡ These districts have been assigned to the respective districts comprised in the "Dublin Registration Area," from which the deceased were admitted.

§ Exclusive of 14 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

¶ Formerly described as "Simple Continued Fever."

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

Registrars' Districts.		Area, in Statute Acres.	Popu- lation in 1901.	Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include												Number of successful vaccinations in the Quarter ending 31st March, 1907.			
				Births.	Deaths.	Averages in the Quarters ending 31st Mar., in the 7 years, 1900-1906.	Registered in the Quar- ter ending 31st Mar., 1907.	Children under 1 year of age.	Persons aged 60 years and up- wards.	Deaths from									Inquest Cases.	Deaths in Public Insti- tutions.	Number of Uncertified Deaths.
										Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pyrexia (origin uncertain).	Kentrick Fever.

NOTE.—This table has been constructed for the years 1833 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1907—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrar Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—Vaccination not up to average probably owing to inclement weather. Influenza prevalent in district.

CARLOW; *Bagenalstown*.—The health of the district is considered fairly good. There has been no illness from any infectious disease.

CARLOW; *Borris*.—District exceptionally healthy notwithstanding the severe weather, which accounts for the number of deaths of very elderly persons.

CARLOW; *Clonegall*.—There has been an epidemic of influenza, but no death therefrom during quarter.

CARLOW; *Fennagh and Myshall*.—I think the proportion of deaths over 60 years of age is worthy of note.

CARLOW; *Leighlinbridge*.—District healthy.

CARLOW; *Tullow*.—There have been only three children vaccinated during this quarter, on account of an epidemic of mild scarlatina being in the district.

NEW ROSS; *St. Mullins*.—The district has been wonderfully healthy, and there have been no sanitary defects noticed.

Dublin County.

BALROTHERY; *Lusk*.—There were five cases of scarlatina during the quarter, all members of same family. Isolation and disinfection prevented the disease spreading.

DUBLIN SOUTH; *Crumlin*.—This district is particularly healthy, and scarcely any illness.

DUBLIN SOUTH; *Tallaght*.—A lot of very old people died owing to prolonged winter, ages from 93 to 73.

Kildare County.

ATHY; *Monsterevan*.—My district has been free from infectious disease during the quarter with the exception of influenza, which, with lung complications, has been prevalent.

BALTINGLASS; *Baltinglass No. 2*.—All vaccinations postponed owing to prevalence of influenza, colds amongst children and infants.

CELBRIDGE; *Celbridge, W.*—District healthy.

CELBRIDGE; *Kilcock*.—During the quarter just ended this district was in a healthy state.

CELBRIDGE; *Maynooth*.—District healthy.

EDENDERRY; *Carbury*.—Vaccination delayed owing to severe weather early in March, and pressure of work.

EDENDERRY; *Rathangan, No. 1*.—Four deaths from phthisis registered during quarter. A farmer, unmarried, aged 36 years, duration of illness, ten months. Two sisters, aged respectively 17 and 14 years, duration eight months and six months. Their mother died from cancer of breast about ten years ago. Their father is a labourer. A widow—farmer, aged 59 years—duration of illness two years. Whooping-cough prevalent.

NAAS; *Kildare*.—District healthy. Sanitary condition good.

Kilkenny County.

CALLAN; *Callan W.*—Four deaths have been registered as due to tuberculous disease, and one to cancer. Influenza very prevalent.

CARRICK-ON-SUIR; *Piltown*.—The sanitation of the district is exceptionally good.

CASTLECOMER; Ballyragget.—Sanitary arrangements very fair. All the diseases named in the Abstracts absent.

CASTLECOMER; Castlecomer, W.—Deaths above the average owing to the severity of the weather during this quarter.

KILKENNY; Tiscoffin.—The sanitary arrangements in the district are good.

KILKENNY; Tullaroan.—Influenza prevalent during the quarter.

NEW ROSS; Dysartmoon.—District healthy, with the exception of an outbreak of measles, which has now subsided.

URLINGFORD; Urlingford, W.—Health of district good. No epidemics. One death from diphtheria.

King's County.

BIRR; Kinnitty.—Health of district fair.

EDENDERRY; Rathangan, No. 2.—A death registered, a man aged 78 years, from rodent ulcer of face; duration, 6 months; proximate cause, cutting a wart when shaving. The death of a woman, 65 years, spinster, sister of a farmer, from Raynaud's disease; duration 14 years. Her right hand first became affected, the fingers gradually dropping off joint by joint. The disease then attacked her feet, with the same result. She preserved all the joints most carefully, that they might be buried with her body. She refused to go to hospital, and sought the minimum of publicity and medical assistance.

MOUNTMELICK; Clonygowan, No. 2.—District at present healthy. Some few cases of scarlatina—recovery in all.

ROSCREA; Roscrea, No. 2.—District healthy during the quarter.

ROSCREA; Shinrone.—Sanitary condition of district good.

TULLAMORE; Killoughy.—One case of diphtheria in the district; otherwise exceptionally free from infectious diseases.

TULLAMORE; Philipstown.—District healthy. Sanitary arrangements fairly good.

Longford County.

BALLYMAHON; Abbeyshrule.—Influenza prevalent; also bronchitis. One case of cancer of rectum, and one case of sarcoma of breast in a man aged 50, who had a mole cut off in London. Sanitary state of district fairly good.

BALLYMAHON; Ballymahon, W.—The sanitary arrangements in the district are satisfactory.

GRANARD; Ballinalee.—The district is in good sanitary condition.

GRANARD; Granard, W.—The district is in good sanitary condition.

GRANARD; Scrabby, No. 2.—Sanitary condition of district satisfactory; no epidemic.

Louth County.

ARDEE; Castlebellingham.—District very healthy. Sanitary condition of district good.

ARDEE; Dunleer.—District healthy.

DROGHEDA; Termonfeckin.—Influenza prevailed as an epidemic during the quarter. Vaccinations postponed owing to the inclemency of the weather, and the prevalence of affections of the chest and respiratory organs amongst infants and young children.

DUNDALK; Barronstown.—District in a very healthy state, and free from zymotic disease.

DUNDALK; Dundalk, W.—Influenza was very prevalent during whole quarter. The new water main was opened in January, and the water supply to all parts of the town is now abundant.

DUNDALK; Ravensdale.—From enquiries made by me, I find that a number of uncertified deaths are due to one form or other of lung disease.

Meath County.

ARDEE; Collon, No. 2.—District very healthy.

ARDEE; Drumcondra.—District very healthy.

DROGHEDA; St. Mary's.—The sanitary state of the district is good.

DROGHEDA; Stamullen.—The district has been in a healthy state during the quarter.

DUNSHAUGHLIN; Killeen.—The district is healthy. Vaccinations not performed owing to severity of season.

KELLS; Kilskeer.—Vaccinations postponed on account of prevalence of bronchitis amongst children.

KELLS; Nobber.—The health of the district is good. Of the sixteen deaths recorded as 60 years and upwards, the average age is 72.6 years. Two were octogenarians, and one 91 years. The fact speaks abundantly for the sanitary state of the district.

OLDCASTLE; Oldcastle, W.—The district continues in a satisfactory condition.

TRIM, Innfield.—Five cases of acute pneumonia occurred in the district during the month of March, resulting in three deaths.

Queen's County.

ABBEYLEIX; Ballinakill.—Health of district very good.

MOUNTMELICK; Clonaslee.—Health of the district is good. District free from any epidemic.

MOUNTMELLICK ; Clonygowan, No. 1. District healthy. There were a few cases of scarlatina ; recovery in all.

ROSCREA ; Borris-in-Ossory. — The health of this district has been good for the past quarter.

Westmeath County.

BALLYMAHON ; Ballymore.—There was an epidemic of influenza during the quarter. In some cases it was complicated by pneumonia and in one case by appendicitis. All made good recoveries.

MULLINGAR ; Ballynacarrigy. — There has been a great falling off in the number of deaths registered during this quarter compared with foregoing one. Malignant disease claimed two and septicaemia one, while our hydra-headed foe, the tubercle bacillus, claimed three victims. We do not vaccinate during the winter quarter.

MULLINGAR ; Castletown-Geoghegan.—The district is fairly healthy. Owing to severity of weather and the prevalence of influenza the number of cases vaccinated during the quarter was very small.

MULLINGAR ; Killucan.—The sanitary state of the district is good. Influenza of a mild type at present prevalent.

MULLINGAR ; Milltown.—There were six uncertified deaths during the quarter of widows and widowers who had reached the following, ages respectively:—100 years (born 1806, died 1907), 89 years, 81 years, 79 years, 72 years, and 63 years. Phthisis pulmonalis was responsible for the death of a young man in the twenties, and there was a fatal case of grippe and grippal pneumonia registered. Vaccination defaulters nil, due, perhaps, to the comparatively mild weather. A searching epidemic of pertussis broke out amongst the school children in the beginning of the quarter, with, fortunately, no fatal results. The health of the district is good in other respects, and the sanitary condition satisfactory. No deaths from cancer during the quarter.

MULLINGAR ; Mullingar, W.—Health of the district fairly good.

Wexford County.

ENNISCORTHY ; Enniscorthy, W.—No vaccinations, as the children were suffering from influenza, scarlatina, and other diseases.

ENNISCORTHY ; Newdownbarry.—There has been an epidemic of influenza in the district during the quarter, but no deaths therefrom.

GOREY ; Camolin.—With the exception of a number of cases of influenza, there have not occurred any infectious cases in the district, which is in good sanitary condition.

NEW ROSS ; Carrickbyrne.—One death from cerebro-spinal meningitis was registered during the quarter.

NEW ROSS ; New Ross, W. — An epidemic of measles occurred in the district during the quarter, of a very severe type ; also three cases of scarlatina. As usual, the death-rate from tuberculosis was very high in the Urban District. Small, dirty, badly ventilated houses, in many cases overcrowded, are largely responsible for the spread of this disease here, as elsewhere, also ignorance of its infectious nature, and failure to isolate the cases.

WEXFORD ; Bannow.—There were three deaths from pulmonary tuberculosis registered during the quarter ; three males, 21, 22, and 30 years. There is a tubercular family history in each case. Influenza was prevalent, and I considered it advisable to postpone vaccination, as a large number of children were affected.

WEXFORD ; Broadway.—Several cases of scarlatina and mumps throughout the district.

WEXFORD ; Tughmon and Glynn.—Vaccination postponed early in the quarter. Influenza prevalent amongst the children and adults.

Wicklow County.

BALTINGLASS ; Baltinglass, No. 1, W. — All vaccinations postponed owing to prevalence of influenza colds amongst children and infants. Death of one woman aged 93 during the quarter.

BALTINGLASS ; Kiltegan.—Influenza at present prevalent. Deaths over average. I was obliged to postpone registration of two cases as doctor who attended is ill, and unable to furnish certificate. Births under average. No vaccinations owing to unfavourable weather. Sanitary condition of district capable of improvement. Closets required for some of the poorer houses in this village.

RATHDOWN ; Bray, No. 1.—Births and deaths about the average.

RATHDOWN ; Delgany.—Health of the district good.

RATHDRUM ; Annamoe. — District healthy during the quarter. One of the deaths registered was that of a person aged 100 years, and from any information I could get he was certainly that, if not more.

RATHDRUM ; Arklow. — Deaths were registered during the quarter at the following old ages, namely:—76 (2), 78, 82 (2), 83, 84, 87, 88, 97, giving an average of 83·3 years for 10 persons.

RATHDRUM ; Newcastle.—Sanitary condition of two villages very bad, particularly as regards disposal of sewerage.

II. PROVINCE OF MUNSTER.**Clare County.**

BALLYVAGHAN; Ballyvaghan, W.—Scarlatina prevailed generally. No deaths were caused by it. Vaccination deferred owing to severity of weather.

CORROFIN; Corrofin, W.—Health of district fairly good, with the exception of influenza, which was very prevalent. Two deaths from diabetes mellitus.

ENNIS; Crusheen.—District in a healthy condition.

ENNIS; Killaniv.—Sanitary arrangements good.

ENNIS; Newmarket.—The health of the district was fairly good. A mild form of influenza prevailed.

ENNISTIMON; Ennistimon, W.—The sanitary arrangements are satisfactory. Influenza and pertussis prevalent in the district. Vaccination is slow.

ENNISTIMON; Milltown Malbay.—Influenza very prevalent in district during quarter.

ENNISTIMON; Roadford.—District healthy.

KILLADYSERT; Labasheeda.—District healthy. Sanitation good.

KILRUSH; Carrigaholt.—For the past month influenza has been prevalent. Otherwise health of district very good.

KILRUSH; Craggaknock.—The district has been in a very healthy state during quarter, with the exception of some cases of influenza of a mild type.

KILRUSH; Kilkee.—Health of the district very good.

KILRUSH; Kilrush, W.—Whooping-cough largely prevailed. It was usually unaccompanied by pulmonary complications. Influenza of a fairly severe type was also present during the past three months.

LIMERICK; Bridgetown.—Three deaths registered, 90, 95, and 98 years. Sanitary condition of district good.

LIMERICK; Coolacasey.—The sanitary condition of the district is satisfactory, but there are some cases of measles at present, imported from County Tipperary, where a child was on a visit to some friends.

SCARRIFF; Annacarriga.—Measles very prevalent here at present, but of a mild type.

SCARRIFF; Feakle.—Health of district good.

SCARRIFF; Mountshannon, W.—District healthy.

TULLA; Kilkishen.—The death of a woman at 104 years was registered during the quarter.

TULLA; Quin.—The sanitary arrangements in the district are good. None of the principal epidemic diseases are prevalent.

Cork County and County Borough.

BANDON; Inishannon.—Of the uncertified deaths, one was aged 97 years, and two infants—premature—4 days each. District free from infectious diseases. Influenza has been general, and severe chest complications in some of the cases. There were no vaccinations during this quarter. I did not insist on children being brought in during this quarter, coughs and influenza were so general.

BANDON; Kilbrittain.—District very healthy and in a fair sanitary state.

BANTRY; Bantry W.—District in a very healthy condition.

BANTRY; Durrus and Kilcrohane.—District very healthy, except the last few weeks, and then only heavy colds. Sanitary arrangements fairly good. One death from phthisis certified.

BANTRY; Glengarriff.—District fairly sanitary. Influenza of a bad type very prevalent during the quarter.

BANTRY; Kealkill.—Of the eight deaths registered two were over sixty years, two over ninety years, and one eighty years. The sanitary condition of the district is fairly good. No case of malignant disease.

CASTLETOWN; Castletown, W.—District healthy.

CASTLETOWN; Kilcatherine.—District healthy.

CORK; Carrigaline No. 1.—District healthy during quarter. Less vaccination than should be, due to apathy of parents.

DUNMANWAY; Ballineen.—I did not vaccinate during the past three months in consequence of the weather. Will have all children three months and over vaccinated during the coming quarter.

DUNMANWAY; Coolmountain.—The sanitary condition of the district is fairly good. Influenza of a mild type was prevalent during last month of quarter. Vaccination was satisfactory.

DUNMANWAY; Dunmanway W.—District healthy. Influenza of a mild type prevailed.

FERMOY; Ballynoe.—Influenza caused a few deaths, and prevented some people from bringing in the children for vaccination.

FERMOY; Kilworth.—The village of Kilworth requires draining.

KANTURK; Newmarket.—Phthisis is very prevalent in district.

KILMALLOCK; Charleville.—The district is very healthy. We have had no epidemic.

KINSALE; Ballyfeard.—Influenza, complicated with bronchitis, and in two cases single pleuro-pneumonia prevalent. District otherwise healthy. One death occurred from pulmonary phthisis at 25 years. Two deaths at 70, two at 75, one at 82, and one at 80 years registered during quarter.

MALLOW; Ballyclogh.—District healthy.

MALLOW; Buttevant.—Influenza and bronchial affections very prevalent during the quarter.

MALLOW; Rahau.—Some cases of influenza occurred during past quarter. No other infectious disease.

MIDDLETON; Aghada.—The two deaths from consumption registered during the past quarter were those of invalids from the navy. In my last return four out of the six consumptives were also naval invalids. The number of uncertified deaths is due to the fact that the cases had become chronic or that death was due to senile decay. Under those circumstances the people do not trouble the doctor.

MIDDLETON; Castlemartyr.—District very healthy.

MIDDLETON, Cloyne.—Whooping-cough of a severe type was prevalent in the district during the present quarter, and in consequence a number of vaccinations had to be postponed.

MILLSTREET; Cullen.—Vaccination had been postponed in consequence of the severity of the weather and prevalence of influenza.

SKIBBEREEN, Skibbereen, W.—District free from infectious diseases.

SKULL; Goleen.—Influenza prevalent during the latter part of this month. No water supply to one village.

Kerry County.

CAHERSIVEEN; Caher, W.—The district is in fairly good sanitary condition.

CAHERSIVEEN; Darrynane.—During the quarter just ended an outbreak of measles (German) occurred of a mild type, being mainly confined to one village.

CAHERSIVEEN; Glanbehy.—There are no deaths from cancer in my district. The health of district good.

CAHERSIVEEN; Valencia.—An unusually large number of deaths are registered owing to a very sad disaster which occurred to two fishing boats, deeply laden with fish, which sank in the entrance to Valencia Harbour on the night of the 14th of January, and in which eight young men lost their lives by drowning. Also seven of the deaths registered are those of persons the average of whose ages is 78 years.

DINGLE; Anascaul.—Death of one male registered age 103 years. Information received from authentic sources corroborates the statement of informant.

DINGLE; Castlegregory.—Vaccination was backward owing to severe weather—many of the young children suffering from chest affections.

DINGLE; Dingle, W.—The district has been healthy for the last three months. The death-rate is much below the average.

There was one case of cerebro-spinal meningitis, which proved fatal on the 8th of March.

DINGLE; Ventry.—The people observe a better state of sanitation in the dwelling-houses. Diarrhoea amongst children has been fairly common during past quarter. No deaths have, however, been registered from this cause.

KENMARE; Kilgarvan.—Vaccination postponed owing to inclement weather and influenza.

KILLARNEY; Coom.—Pneumonia any whooping-cough prevalent during January and February, in consequence of which no vaccination was performed. Bronchitis and influenza also prevalent. Sanitary condition of district fairly good.

KILLARNEY; Milltown.—District healthy. No contagious or infectious disease. Influenza very prevalent, complicated with pneumonia, which was very fatal amongst the aged. Sanitary condition of the district good.

LISTOWEL; Ballyhorgan.—Sanitary state of district good.

LISTOWEL; Ballylongford.—District fairly healthy for quarter. Postponed all vaccination in consequence of whooping-cough in district. Sanitary condition of Ballylongford requires improvement.

LISTOWEL; Listowel, W.—Vaccination postponed owing to an epidemic of whooping-cough in the district.

LISTOWEL; Tarbert.—Vaccination postponed owing to the prevalence of whooping-cough. District healthy otherwise.

TRALEE; Brosna, No. 1.—District healthy.

TRALEE; Castlemaine.—Vaccination well attended to during the quarter. The health of the district good and free from fever.

Limerick County and County Borough.

CROOM; Castletown.—An unhealthy quarter owing to influenza sometimes accompanied by lobular pneumonia, the epidemic being for the first time in my experience most marked amongst children and infants.

KILMALLOCK; Hospital.—Influenza and a few cases of diphtheria. Otherwise district healthy.

KILMALLOCK; Kilmallock, W.—Measles prevalent in two divisions during quarter. Has now disappeared. District otherwise healthy.

LIMERICK; Annacotty.—Sanitary arrangements very fair. District healthy.

LISTOWEL; Glin.—The weather was so inclement, and influenza with pulmonary complications so rife amongst old and young, that I was obliged to postpone the vaccination of children. I hope during the coming quarter to have the vaccination of children in my district more satisfactory.

MITCHELSTOWN; Galbally.—Vaccination had to be postponed owing to the prevalence of bronchial troubles amongst children. The district is exceptionally healthy. Three of the sixteen deaths registered died of pulmonary phthisis and two of cancer.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair. Some cases of influenza in district coupled with pneumonia. No death up to present. Whooping-cough in the western part of district. No death from same. One death registered, a male, 100 years.

NEWCASTLE; Feenagh.—The health of the district is very good.

NEWCASTLE; Newcastle, W.—District healthy.

RATHKEALE; Askeaton.—During the past quarter influenza was prevalent; it was attended with high temperature, 104°; it, with its attendant, pneumonia, caused four deaths, one uncertified.

RATHKEALE; Pallaskenry.—The sanitary arrangements in the district are fairly good. As to the prevalence of any special disease, there is nothing calling for observation.

RATHKEALE; Rathkeale, No. 1, W.—Notwithstanding the extreme severity of the weather during the quarter, the death-rate was comparatively low. Pneumonia of a typhoid character was rather prevalent. The district was free from contagious disease of any kind.

TIPPERARY; Grean.—District healthy. One death registered at 104 years. She retained her faculties and was active to the end.

Tipperary County, North Riding.

BORRISOKANE; Terryglass.—Influenza prevalent during the last month of quarter. Some cases of epidemic pneumonia.

NENAGH; Nenagh, W.—Two cases of measles and one of scarlatina occurred in the district during the past month. The measles cases were removed to hospital. The scarlatina case is being treated at patient's home. All are doing well.

NENAGH; Newport.—District healthy. Sanitary condition fair.

NENAGH; Portroe.—District free from disease.

NENAGH; Silvermines.—An epidemic of measles. Two deaths from tuberculosis during quarter.

THURLES; Moyne.—District healthy.

THURLES; Thurles, W.—Influenza prevalent in district.

Tipperary County, South Riding.

CALLAN; Mullinahone.—Sanitary condition of district fairly good. No form of epidemic disease prevalent except influenza.

One case of tubercular disease, none of malignant disease in district. Vaccination fairly attended. Seven of the deaths registered were at ages ranging from 70 to 92 years, viz.:—One at 70, two, 77, one, 81, one, 82, one, 87, and one, 92.

CARRICK-ON-SUIR; Carrangibbon.—Owing to the prevalence of influenza during the early part of the quarter and harsh winds during the later period, parents were not disposed to present children for vaccination.

CASHEL; KILLENAULE.—Whooping-cough is prevailing in one portion of my district, and pneumonia, which, however, is of a mild type, and from which no deaths have occurred, has been prevailing during the latter end of March. Otherwise the district is healthy.

CASHEL; Kilpatrick.—District free from zymotic disease.

CLOGHEEN; Caher.—The district is in a very healthy state.

CLOGHEEN; Clogheen, W.—District, on the whole, healthy and free from zymotic disease. Some cases of pneumonia.

CLONMEL; Clonmel, W.—Scarlatina has prevailed to some extent, almost exclusively amongst the upper classes. In other respects, the state of public health is good.

CLONMEL; Kilsheelan, No. 1.—Influenza prevalent during the quarter. Two deaths from pulmonary tuberculosis.

CLONMEL; Marlfield.—Sanitary state of district satisfactory, and complete absence of contagious disease.

TIPPERARY; Bansha.—One death registered at the age of 105 years. Influenza was prevalent, followed in several cases by pneumonia.

TIPPERARY; Cappagh.—The district is healthy.

TIPPERARY; Emly.—District in a very healthy condition.

URLINGFORD; Kilcooly.—Sanitary state of district is good. There was a slight epidemic of influenza during February and March, and it caused one death.

Waterford County.

CARRICK-ON-SUIR; Rathgormuck.—One case of cancer of the stomach has been registered. Influenza and whooping-cough have been prevalent during the quarter; otherwise the district is fairly healthy.

CLONMEL; Ballymacarbry.—Five cases of scarlatina.

CLONMEL, Kilsheelan, No. 2.—No death from any form of tuberculous disease.

DUNGARVAN; Dungarvan, W.—District healthy during past quarter. Vaccination well attended to.

LISMORE; *Ballyduff*.—General health of district very satisfactory.

LISMORE; *Tallow*.—Influenza of a mild form was prevalent during the quarter.

WATERFORD; *Waterford, Rural, No. 1*.—Some of the labouring class are badly housed—insufficient air space, ventilation, and light; no sanitary arrangements. No infectious disease. Vaccination well carried out.

WATERFORD; *Waterford, Urban, No. 1, W.*—The sanitary arrangements in parts, of the district are bad. There are still many unsanitary privies—a fertile source of nuisance. Tuberculosis is rife, as is evidenced by the fact that it enters into the cause of death in almost one-fifth of all deaths in the district. The epidemic of scarlatina still continues; the mortality from this cause is, however, low. Vaccination fairly carried out, considering season of year.

WATERFORD; *Woodstown*.—The health of the district is good.

YOUGHAL; *Ardmore*.—Three members of one family have died of cancer during the past three years.

YOUGHAL; *Clashmore*.—Vaccination postponed owing to influenza.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Doagh*.—Two cases of scarlatina and two of diphtheria were notified during the quarter; otherwise the district was entirely free from infectious disease.

ANTRIM; *Randalstown*.—Cases of diphtheria, scarlet fever, and typhoid fever reported during the quarter.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Influenza and diseases of the respiratory organs have been very common.

BALLYCASTLE; *Cushendall*.—There was one death from cerebro spinal fever in the district; it was the only case. There was also one case of scarlatina which got better. The sanitary condition of the district is greatly improved.

BALLYMENA; *Ballymena, W.*—Public health satisfactory.

BALLYMENA; *Broughshane*.—Health of district very good.

BALLYMENA; *Clogh*.—A large number of cases of influenza during quarter, but only one death. District fairly healthy.

BALLYMENA; *Portglenone*.—Influenza was epidemic during the quarter. There was a slight outbreak of scarlatina; one of the cases of the malignant type, the patient dying after a few hours' illness.

BALLYMONEY; *Dervock*.—The health of the district has been fairly good during the quarter. Influenza was prevalent, but of a mild type.

BALLYMONEY; *Portrush*.—Whooping-cough prevalent in district during quarter.

BELFAST; *Belfast, Rural, No. 4*.—Quite a number of cases of influenza and whooping-cough.

LARNE; *Larne, W.*—One death in Urban district from cerebro spinal meningitis.

LARNE; *Waterfoot*.—The sanitary arrangements in the district are excellent.

LISBURN; *Dunmurry*.—The sanitary condition of this district very good. No epidemic of any kind.

LISBURN; *Glenavy*.—Deaths above the average, prevalent cause being senility and heart failure. No deaths from cancerous or tuberculous disease. Seven octogenarians' deaths registered this quarter.

LISBURN; *Knocknadona*.—The sanitary condition of this district is good. There were two deaths registered from cancer; no family record. Of the deaths registered one was 89 years of age, three 85 years, one 83, one 81, and two 80, one 76 years, one 73, one 72, and one 62 years.

LISBURN; *Lisburn, W.*—There were five deaths registered as having been caused by cancer, four of the informants denied that there had been a case of cancer in the family, but the fifth said a sister had died of that disease.

LURGAN; *Aghalee*.—Two deaths from cerebro spinal meningitis.

Armagh County.

ARMAGH; *Blackwatertown*.—Influenza was prevalent, a large number of children were affected, which to a certain extent accounts for the small number of vaccinations.

ARMAGH; *Markethill*.—Measles has been epidemic during the past quarter, and diphtheria was also prevalent.

ARMAGH; *Rich Hill*.—The severe weather at the beginning of the quarter caused some bronchial and pulmonary troubles in the district. There was a case of cerebro spinal meningitis terminating fatally after sixteen hours' illness on March 29th in a female child aged 3 years.

LURGAN; *Lurgan, No. 1, W.*—Seventeen deaths were registered from phthisis and three from epidemic cerebro spinal meningitis. The latter occurred in the fever hospital, and were of patients who had been removed from other districts.

LURGAN; *Lurgan, No. 2*.—The district is in a good sanitary state.

NEWRY; *Mountnorris*.—Owing to epidemic of diphtheria and severity of weather the vaccination return is smaller than usual.

Belfast County Borough.

BELFAST; Belfast Urban, No. 3.—Ten deaths were registered as due to cerebro spinal meningitis, details of which have already been furnished in weekly returns.

BELFAST; Belfast Urban, No. 4. W.—Eleven deaths from cerebro spinal meningitis.

BELFAST; Belfast Urban, No. 7.—One death from cerebro spinal fever occurred.

BELFAST; Belfast Urban, No. 8.—No deaths from cerebro spinal fever occurred during quarter.

BELFAST; Belfast Urban No. 9.—Three deaths were registered from cerebro spinal meningitis.

BELFAST; Belfast Urban No. 11.—The health of the district during the quarter has been good with the exception of a few cases of cerebro spinal meningitis.

BELFAST; Belfast Urban, No. 12.—Cerebro spinal fever has been very prevalent, and has caused a great number of deaths.

BELFAST; Belfast Urban, No. 13.—One case of cerebro spinal meningitis week ending 2nd March.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—There have been four cases of cerebro spinal meningitis in district; three of them have ended fatally, and the fourth is in hospital for the last month, but not yet out of danger.

BAILIEBOROUGH; Shercock.—Number of vaccinations for quarter unusually small owing to prevalence of whooping-cough and severity of season.

BAILIEBOROUGH; Termon.—The district is very free from all infectious diseases.

BAWNBOY; Swanlinbar.—Some cases of typhoid fever.

CAVAN; Ballyhaise.—Influenza and lung disease were prevalent during the quarter. District in a fairly sanitary condition.

CAVAN; Bellanagh.—Two of the sewers of the village are unsanitary. There has been no special epidemic.

CAVAN; Killashandra.—One death from lingual cancer, one from phthisis pulmonalis, one from puerperal pyæmia, and one from post-partum hæmorrhage. Sanitary state of the village much improved. District healthy. Influenza of a mild type prevalent during quarter.

COOTEHILL; Drum No. 2.—The sanitary condition of the district is fair, and, with the exception of influenza, we had no epidemic.

COOTEHILL; Tullyvin.—Cerebro spinal meningitis the secondary cause of the death of a child 6 years of age. Influenza and bronchial colds prevalent during first two months of quarter. Death-rate probably the highest on record in this district.

ENNISKILLEN; Holywell, No. 2.—The sanitary arrangements are fairly good for a rural district. Tuberculosis is on the increase, and, I fear, will continue to be so until more stringent measures are taken to compel the people to pay more attention to the cleanliness of their houses and their surroundings, and particularly to the principle of ventilation and sunlight, and the isolation of their sick. I would earnestly recommend concrete floors—which are both cheap and easily cleaned—instead of the earthen ones which prevail and cause a foul dampness. Medical officers should, in my opinion, be permitted to send specimens of sputum to a specialist for examination at the public expense in suspected cases, and suitable bottles supplied to them for the purpose. Primary vaccination was nil owing to the inclement weather and the prevalence of influenza and whooping-cough.

GRANARD; Scrabby No. 1.—There was a slight outbreak of diphtheria of a mild form in this portion of the district.

OLDCASTLE; Ballyjamesduff.—District healthy. Pneumonia has been prevalent.

OLDCASTLE; Virginia.—District healthy.

Donegal County.

BALLYSHANNON; Ballintra.—Sanitary conditions of district fairly good, but water supply still bad.

DONEGAL; Donegal, W.—With the exception of influenza, district free from infectious diseases.

DONEGAL; Dunkineely.—Influenza with chest complications prevalent; one case of scarlatina, mild type.

DONEGAL; Mountcharles.—Owing to a rather severe outbreak of influenza and the severity of the weather, vaccinations are in a backward condition. District healthy.

DONEGAL; Pettigo.—Sanitary arrangements in the district are not good (very defective).

DUNFANAGHY; Crossroads.—District free from infectious diseases during the quarter. Most of the deaths registered were over 80 years, and one 100.

DUNFANAGHY; Dunfanaghy, W.—Iobar pneumonia was very prevalent during the quarter.

GLENTIES; Ardara.—There have been several cases of pneumonia and influenza during the quarter.

GLENTIES ; Carrick.—There has been no epidemic during the quarter. The district is in a fairly good sanitary condition.

GLENTIES ; Doocharry.—District healthy.

GLENTIES ; Glenties, W.—In consequence of the prevalence of bronchitis amongst children vaccination was postponed. Now, when weather improves, children will be brought out for vaccination.

GLENTIES ; Killybegs.—Primary vaccinations for quarter were slightly below the average owing to the severity of the weather.

INISHOWEN, Buncrana.—District healthy.

INISHOWEN ; Carndonagh, W.—Influenza of a very severe type was prevalent during the greater part of the quarter.

INISHOWEN ; Clonmany.—Health of district good.

INISHOWEN ; Malin.—District healthy.

INISHOWEN ; Moville.—District healthy.

LONDONDERRY ; Kilderry.—Measles prevalent during the quarter ; a large number of cases at present.

MILLFORD ; Fanad.—District healthy. No zymotic disease prevalent. Number of vaccinations postponed owing to severe weather.

MILLFORD ; Rathmullan.—An epidemic of measles prevailed during the quarter. The deaths include one of 107 years, and 13 over 60 years of age.

MILLFORD ; Rosguill.—The sanitary condition of the district is comparatively good, and everywhere there is a disposition amongst the people to improve their dwellings. With the exception of influenza and broncho-pneumonia, which complicated it, the district is singularly free from infectious disease. Of the tuberculous diseases I^r have seen a good many of the strumous or scrofulous type, but not so many pulmonary as I expected to meet. In this district it has not been the custom to call in the doctor in the case of old people ; hence the large number of uncertified deaths appearing in the quarterly returns.

STRABANE ; Raphoe.—With the exception of influenza, no infectious cases during the past quarter.

STRANORLAR ; Cloghan.—Sanitary arrangements satisfactory. Of the deaths registered one reached the age of 90 years, one 92 years, and one 102 years.

STRANORLAR ; Killygordon.—Sanitary improvements work out very slowly.

Down County.

BANBRIDGE ; Ballyward.—Sanitary state of district good. No epidemic disease.

BANBRIDGE ; Loughbrickland.—The sanitary arrangements in the district are fairly good. Influenza was prevalent during the quarter. There were a few cases of typhoid fever during the quarter, with one death, as yet unregistered.

BELFAST ; Castlereagh No 1.—One case of cerebro spinal meningitis. Date of death 20th February, 1907.

DOWNPATRICK ; Ballynahinch.—Influenza and whooping-cough have been very prevalent during the quarter ; also numerous cases of pneumonia.

DOWNPATRICK ; Downpatrick, W.—Six deaths attributed to influenza.

DOWNPATRICK ; Killyleagh.—The public health of this district is good. There is no epidemic. The deaths of two children in the village of Crossgar have been registered, certified to have died of cerebro spinal meningitis. There has been no improvement in the water supply.

DOWNPATRICK ; Portaferry.—Sanitary state of district is very good. Influenza very prevalent during first two months of quarter, otherwise free from infectious diseases.

KILKEEL ; Kilkeel, No. 2, W.—Influenza and a form of bilious fever were very prevalent, but not of a severe type.

LISBURN ; Annahilt.—Health of district good.

LISBURN ; Ballyllesson.—Two deaths from cerebro spinal fever have occurred in the district, one being that of the dispensary caretaker, a healthy man of 35 years of age, a total abstainer from alcohol, and cleanly in person and household. The other patient aged 15 years, who took ill 24 hours after the former one, but without any communication with him, had been in the dispensary two days previously, being himself in good health.

LISBURN ; Drumbeg.—Births and deaths above the average. Almost half the number of deaths were over 60 years and four were 80 years of age.

LISBURN ; Saintfield.—The health of the district during the past quarter has been fairly good, deaths occurring principally amongst those advanced in years. I had one case of cerebro spinal fever, died in hospital, and one case each of scarlet fever, typhoid fever, and diphtheria ; these all recovered.

LURGAN ; Moira.—There has been a great deal of sickness in the district since Christmas, chiefly chest complaints. This has left the death rate high.

LURGAN ; Waringstown.—District healthy. No epidemic disease prevalent during the quarter.

NEWRY; Donaghmore.—District very healthy. No disease prevalent except mild cases of influenza. Sanitary arrangements fair.

NEWRY; Rathfryland. — Births and deaths about the average. I consider the district healthy.

NEWTOWNARDS; Bangor.—Sanitary arrangements good. Vaccination well carried out. Public health good.

NEWTOWNARDS; Comber. — The quarter is remarkable for the number of deaths over 60 years of age, almost half are over that age. Whooping-cough has been very prevalent but not very serious—only one death, and fortunately no other epidemics only two isolated cases of mild typhoid fever.

NEWTOWNARDS; Greyabbey. — Deaths above, births below average for this quarter of the year. No epidemic in district, but influenza was present throughout the district particularly first two months of the quarter—six deaths attributed to it, either directly or indirectly. Heavy mortality amongst aged. Of the forty deaths registered, twenty-seven were over 60 years, and twenty-one of these were over 70 years, one 96, one 93, and one 90 years. Chest affections and old age chief causes.

NEWTOWNARDS; Newtownards, W.—During the past quarter one rural and two urban cases of scarlatina were notified. One urban case of cerebro spinal meningitis and one rural case of diphtheria. All were removed to hospital, and disinfecting and other precautions taken. The chief sanitary defects here are the want of pure water and water-tight sewers. These defects in the near future will be remedied. There are still in the district earthen floors and some houses without back doors. These sanitary defects I hope, too, to have remedied as time goes on.

Fermanagh County.

CLONES; Newtown Butler.—One case of cerebro spinal fever occurred in February, which terminated fatally; two other cases turned up a few days later in the adjoining district; these were young children; both died, and were relatives of the first patient, and had been in contact with her.

CLONES; Rosslea. — Vaccination practically at a standstill owing to the severity of the weather. Two infant cases of epidemic cerebro spinal meningitis occurred in the district; both were removed to hospital and both died. All the necessary steps were taken as to disinfection, &c.

ENNISKILLEN; Ely. — Influenza very prevalent followed by an epidemic of whooping-cough; also enteric fever. Consequently parents would not bring their children to Derrygonnelly for vaccination.

ENNISKILLEN; Enniskillen, W.—Satisfactory sanitation.

ENNISKILLEN; Holywell, No. 1—The sanitary arrangements of the district are fairly good.

IRVINESTOWN; Clonelly.—Influenza and whooping-cough prevalent during the quarter. Two deaths from influenza.

IRVINESTOWN; Ederney. — District healthy. Registered deaths at 90, 89, and 86 years, respectively.

LISNASKEA; Derrylin. — The sanitary condition of the district remains primitive. There are usually many more deaths among children during the first few years of life than in those under one year old. Measles, pertussis, and influenza have been in the district during the quarter. There is no efficient or satisfactory means of checking, or in any way limiting the extension of these epidemics when they occur, and the results are unnecessarily prejudicial to the well-being of the population.

LISNASKEA; Lisnaskea, W.—Vaccination very small owing to severity of weather and prevalence of influenza.

LISNASKEA; Maguiresbridge. — The total ages of the eleven deaths registered aged 60 years and upwards is 845 years, giving an average age to each person of $76\frac{9}{11}$ years, or roughly, 77 years—a very long life.

Londonderry County and County Borough.

COLERAINE; Aghadowey. — District has suffered from widespread epidemic of whooping-cough, but there was only one death from this cause.

COLERAINE; Garvaghy.—Health of district good. Thirteen out of the twenty deaths registered were 60 years and upwards, four being 90 and over. Largest birth-rate registered for a long time.

COLERAINE; Kilrea.—District healthy. Of the deaths registered a large proportion was of those aged 65 years and upwards. There was one death registered at 100 years, but with no authentic record of the date of birth.

COLERAINE; Portstewart. — Influenza was the prevailing disease during the past quarter. It was accompanied in almost all cases with bronchitis, and great nervous debility.

LIMAVADY; Bellarena. — District healthy.

LIMAVADY; Dungiven.—Sanitary conditions satisfactory. Vaccination statistics under average owing to prevalence of inclement weather.

LIMAVADY; Limavady, W. — There were two cases of diphtheria, but the disease did not spread. The death from diphtheria registered occurred in the Workhouse Infirmary and was that of a person sent in from another district.

MAGHERAFELT; Moneymore.—District healthy; no epidemic disease prevalent except an occasional case of influenza.

Monaghan County.

CARRICKMACROSS; Carrickmacross, W.—District in fair sanitary condition. The epidemic of whooping-cough still continues, but is on the decline. The fact of this epidemic, and the recent severe weather prevented parents having their children vaccinated.

CARRICKMACROSS; Donaghmoynne.—District at present fairly healthy.

CARRICKMACROSS; Raferagh.—Six cases of vaccination. Cannot as yet say if successful, as they have not returned. Whooping-cough prevalent in the district.

CASTLEBLAYNEY; Castleblayney, W.—An exceptionally large number of deaths was registered during the quarter. Fifteen who died in the Workhouse did not belong to this district. Among the others eight were attributed to heart disease, eight to influenza, and four resulted from accidents. Of the fifty-two registered at 60 years or upwards, one was said to have been 105 years, one 95, and twelve between 80 and 87 years.

CLONES; Clones, W.—Three cases of cerebro spinal fever were registered during the quarter; the deaths took place in the Clones Fever Hospital, but all of the three cases originated in other districts—one in the Newtown Butler district and two in Rosslea district.

COOTEHILL; Dawsongrove.—The sanitary condition of the district is fairly good. Influenza was prevalent during the quarter. Three children in one family contracted diphtheria; they were sent to hospital and are making satisfactory recovery.

COOTEHILL, Drum No. 1.—Influenza and many of its sequelæ prevailed for the first six weeks of the quarter. I registered one death at 100 years. No move has yet been made to procure a proper supply of drinking water for one village.

MONAGHAN; Castleshane.—District sanitary. No epidemic of any disease.

MONAGHAN; Emyvale.—Sanitary condition fairly satisfactory. There was a great number of deaths of people over 60 years.

MONAGHAN; Kilmore.—District healthy. Early in quarter a good deal of influenza and one case of typhoid fever.

MONAGHAN; Monaghan, W.—The sanitary condition of this district during the quarter ending 31st March has been satisfactory. There has been no epidemic, and the deaths have been considerably less than the previous quarter. I know of no circumstance affecting the public health or vaccination requiring special notice.

MONAGHAN; Scotstown.—The sanitary condition of the district is satisfactory.

Tyrone County.

CASTLEBERG; Castlederg, W.—Sanitary state of district satisfactory. No epidemic of any kind. Influenza rather prevalent past quarter.

CASTLEBERG; Drumquin.—The sanitary condition of district is good; no infectious diseases of any sort.

CASTLEBERG; Killeter.—State of district healthy. A good many deaths of aged persons.

CLOGHER; Aghnacloy.—District free from infectious disease except influenza.

CLOGHER; Clogher W.—Weather so severe children were not brought for vaccination.

CLOGHER; Fivemiletown.—There was an epidemic of influenza during the quarter, but most of the cases were of a mild type.

COOKSTOWN; Cookstown, W.—Vaccination is below the average owing to severe weather, and slight epidemic of whooping-cough.

COOKSTOWN; Pomeroy.—District is generally healthy.

COOKSTOWN; Stewartstown.—There was an epidemic of whooping-cough, with one death. One family had measles with one death. A great number of deaths among old people, some of them between 70 and 97. District at present healthy.

DUNGANNON; Caledon and Ballymagran.—General health of district good. Influenza, bronchitis, and pneumonia in epidemic prevalent during past quarter. Sanitation fairly satisfactory.

DUNGANNON; Clonavaddy.—District in very good sanitary condition.

DUNGANNON; Coal Island.—There were reported in January a case of diphtheria and a case of enteric fever. Influenza with severe pulmonary complications was rife in the Newmills portion of the district; elsewhere of a mild type. This accounts for the number of successful vaccinations being under the average. At present parotitis is prevalent.

IRVINESTOWN; Trillick.—There were seven deaths registered during the quarter from influenza. There were twenty deaths registered during the quarter. One died at the age of 90 years, two at 88, two at 85, one at 84, one 80, one 76, two 75, one 72, one 62, and two 60. One death from cancer.

OMAGH; Drumquin.—The sanitary arrangements in the district are very satisfactory. None of the principal epidemic or other diseases are at present prevalent.

OMAGH; Fintona.—The health of the district has been good during the past quarter. The majority of the deaths registered were those of old persons from 70 to 90 years of age. The sanitary arrangements are satisfactory.

OMAGH; *Gortin*.—One death registered at 100 years.

OMAGH; *Omagh, No. 1, W.*—Health of urban and rural districts satisfactory. Sanitary condition of urban districts continues improving. In the rural the same old unsatisfactory condition still exists as already reported. The number of uncertified deaths is much above the average, but is accounted for by the extremes of ages recorded. The cases of typhoid fever and diarrhoeal diseases occurred in district asylum.

OMAGH; *Omagh, No. 2.*—There has been an epidemic of influenza in this district for the past two months. The district is otherwise healthy and in good sanitary condition. Of the twenty-seven deaths registered two were 100 years of age, and thirteen over 70 years. The birth-rate is far below the average.

OMAGH; *Sixmilecross*.—The dispensary district is at present in very good sanitary condition, and free from infectious disease. During the quarter five persons whose deaths were registered were each aged 80 years.

STRABANE; *Newtownstewart*.—Of the nine uncertified deaths seven were those of people in a position to pay for medical attendance, and two those of people who would have been dispensary patients. Of the total deaths, thirteen were those of people in a position to pay medical fees, and nine of dispensary patients, so that in the case of private patients there were 53 $\frac{1}{3}$ per cent. of uncertified deaths, and in the case of dispensary patients only 22 $\frac{2}{3}$ per cent.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Ballinasloe, W.*—Measles prevalent in the district during the quarter.

BALLINASLOE; *Killaen*.—Influenza with pulmonary complications very prevalent.

BALLINASLOE; *Kiltormer*.—No vaccinations during the quarter owing to the severity of the weather.

BALLINASLOE; *Laurencetown*.—All vaccination was postponed owing to a widespread epidemic of measles.

CLIFDEN; *Inishbofin*.—One case of dog bite has been reported to me.

CLIFDEN; *Roundstone, No. 1*.—An epidemic of enteric fever existed during the quarter on the island of Inishlacken, but the disease is now almost wiped out, as the

last patient stricken with it is now convalescent, and no fresh case appeared for weeks past. Influenza was prevalent generally through the district.

GALWAY; *Galway, No. 3 (Arran)*.—Influenza very prevalent in the district, but only 3 deaths registered from it so far. District otherwise healthy.

GALWAY; *Moycullen*.—The sanitary condition of district is very good.

GALWAY; *Oranmore*.—The district at present is very healthy, only one case of typhoid fever reported during last quarter, ending March 31st, 1907. Patient was removed to hospital.

GALWAY; *Turloughmore*.—A severe outbreak of influenza with peculiar type of pneumonia.

GLENNAMADDY; *Dunmore*.—The malignant case registered was one of malignant ulceration of the colon.

GORT; *Gort, W.*—The health of district has been good during quarter.

GORT; *Kinvarra*.—The death-rate for the quarter is much greater than the average, the excess of mortality being principally amongst children and old people. Whooping-cough accounted for 3 deaths. There were 14 deaths amongst persons over 60 years of age.

LOUGHREA; *Athenry*.—The number of vaccination defaulters in the district at the present time is very high, and up to the present the Boards of Guardians have been reluctant to enforce vaccination owing to the severity of the weather. The sanitary condition of the rural portion of the district is good, but in the town of Athenry there are many houses occupied by the poorer class, which are wholly unsuited for human occupation. The Sanitary Authority are, however, taking steps under the recent Labourers Act to remedy this state of things.

LOUGHREA; *Bullaun*.—Eight out of the fifteen deaths registered were of persons aged over 60 years, one being registered at 88 years.

MOUNT BELLEW; *Mount Bellew, W.*—All vaccinations have been postponed during the past quarter, owing to inclement weather.

OUGHTERARD; *Cloonbur, No. 1*.—Influenza prevalent of a mild type.

OUGHTERARD; *Cloonbur, No. 2*.—Sanitary arrangements fairly good. There was no death from cancer during quarter.

PORTUMNA; *Eyre Court*.—Owing to the severity of the weather, the number of children vaccinated is small. There was a good deal of influenza and some cases of pneumonia; no deaths occurred.

PORTUMNA; Portumna, No. 2.—No successful primary vaccinations for this quarter.

TUAM; Abbey.—I had one death from typhus, but it is not yet registered.

TUAM; Dunmore.—There was no death from cancer during the quarter.

TUAM; Tuam No. 1, W.—Health of district fairly good during last quarter.

TUAM; Tuam, No. 2.—One case of enteric removed to hospital. District healthy, except for some cases of influenza.

Leitrim County.

BALLYSHANNON; Kinlough.—The number of deaths this quarter are more than double the number of births. Of the deaths registered, 32 were of persons aged 60 years and upwards. Twenty-eight deaths are uncertified. No vaccinations on account of the stormy weather.

BAWNBOY; Ballinamore.—Sanitary state of district fairly good. The death has been reported of a man who lived 102 years.

CARRICK-ON-SHANNON; Jamestown, W.—Influenza prevalent. Sanitation good.

MANORHAMILTON; Drumahaire.—The sewerage of one village is still defective, and the mill-stream—an important public water supply—still receives the crude sewage of the village. Enteric, due very probably to the excessive rainfall, is rife in my district. The local creamery, however, is closed in consequence.

MOHILL; Carrigallen.—The sanitary state of the district is fairly good. So also has been the public health. As in most other parts of the country, however, influenza in its various forms, and of severe type, has been very prevalent, and still continues.

MOHILL; Mohill, W.—Influenza was very prevalent in this district during quarter; there were a few deaths from it.

MOHILL; Rinn.—The district is very healthy and free from epidemic.

Mayo County.

BALLINA; Crossmolina.—District in fair sanitary condition; free from infectious disease. Vaccination very backward.

BALLINROBE; Cappaghduff.—There are many who still keep cattle in their dwelling-houses for want of outhouses. Sanitary arrangements fair.

BALLINROBE; Cong.—Health of district good. Of the 23 deaths registered, 19 were aged 60 years and upwards, 3 of which were over 60, 8 over 70, 7 over 80, and one over 105 years of age.

BALLINROBE; Hollymount.—Births and deaths up to the average. Owing to severe weather and catarrhal affections prevalent amongst young children, there were only two successful primary vaccinations. Influenza epidemic, with some cases of pneumonia following it.

BELMULLET; Binghamstown, W.—Of the deaths registered, one was 103 years of age, one 102, one 96, one 92, three 90, one 87, one 84, one 77, one 75, and two 70 years of age. State of district in a healthy condition.

BELMULLET; Knocknallow.—Sanitary condition of district at present fairly good.

CASTLEBAR; Balla.—District healthy.

CASTLEBAR; Castlebar, No. 1, W.—Health of district particularly good. Mild epidemic of whooping-cough was prevalent in January; also mild German measles.

CLAREMORRIS; Ballindine.—District free from infectious diseases.

CLAREMORRIS; Ballyhaunis.—One death resulted from cancer of stomach. Sanitation progressive.

KILLALA; Killala, W.—The health of the district was very satisfactory. Vaccination delayed owing to severity of the weather.

SWINEFORD; Lowpark.—There were no vaccinations during the quarter.

WESTPORT; Achill.—Sanitary state and general health of district good. A good many children presented for vaccination past quarter.

WESTPORT; Ballycroy.—Influenza very prevalent, also epidemic diarrhoea among children particularly.

WESTPORT; Bundorragha.—Sanitary arrangements good.

WESTPORT; Louisburgh.—Sanitary condition of district much improved.

WESTPORT; Newport.—The sanitary arrangements in this district are not very satisfactory on the whole. Vaccination is a bit backward. During the winter a very severe cold attacked the people, nearly every one taking it.

WESTPORT; Westport, W.—Vaccinations generally postponed owing to inclement weather. Births highest number I have ever recorded. Deaths also very numerous chiefly by reason of large number of very old persons who died during the winter. I have recorded five deaths over 90 years (103, 101, 99, 98, and 90); also

nine deaths of persons between 80 and 90 years, and twelve deaths of between 70 and 80 years. Thus twenty-six out of forty-seven deaths were of persons over 70 years of age.

Roscommon County.

ATHLONE ; Brideswell. — Measles very prevalent ; three deaths from cancer registered during quarter.

BOYLE ; Ballyfarnan, No. 1. — State of the district generally healthy.

BOYLE ; Boyle, No. 1, W. — Influenza of a mild type was prevalent. The small number of vaccinations was probably due to the prevalence of colds among infants and to the severity of the weather.

BOYLE ; Keadew. — Sanitary arrangements fair. Vaccinations delayed owing to the severity of the weather during quarter.

CARRICK-ON-SHANNON ; Aughrim. — The sanitary condition of the district is good. There was no case of infectious disease during quarter.

CASTLEREA ; Ballaghaderreen. — There was a great prevalence of whooping-cough amongst the children of the district during the quarter.

ROSCOMMON ; Ballyleague. — I registered the death of a child aged six months from cerebro spinal meningitis, certified ; no other case in my district.

ROSCOMMON ; Roscommon, W. — Influenza and measles prevalent.

STROKESTOWN ; Roosky. — Of the deaths registered thirteen were of persons aged 60 years and upwards, one of whom was aged 100 years last birthday, one 89 years, one 87 years, three 85 years each, two 84 years each, one 76 years, and one 75 years.

There were three deaths registered during the quarter from tuberculous disease, two of whom were returned Irish-Americans, and there were two cases from cancer. Sanitation progressive. Vaccination was postponed owing to the harsh weather that prevailed during the greater part of the quarter.

Sligo County.

BOYLE ; Ballyfarnan, No. 2. — State of district generally healthy.

BOYLE ; Gurteen. — District healthy. Vaccination backward owing to very bad weather. Sanitary condition of district improving.

DROMORE WEST ; Easky, W. — Health of district good. No case of death from infectious disease during quarter. There were no vaccinations during quarter on account of the inclement weather.

SLIGO ; Ballymote. — Influenza has been prevalent during the quarter. The district otherwise is healthy.

SLIGO ; Carney, No. 1. — Pulmonary complaints have been very prevalent during the last quarter.

SLIGO ; Riverstown. — District healthy.

SLIGO, Sligo No. 2. — One death took place of a man whose age was stated to be 103 years.

TOBERCERRY ; Aclare. — The district continues extremely healthy.

TOBERCERRY ; Coolaney. — The sanitary arrangements are good. I have registered one death at the remarkable old age of 94 years.

TOBERCERRY ; Tobercurry, W. — The sanitary condition of the district is good, with the exception of some portions of the town

Marriages:—JAN., FEB., MAR., 1907. **Births & Deaths:**—APR., MAY, JUNE, 1907.

During the quarter ended 30th June last, there were registered in the 827 Registrars' Districts in Ireland 26,632 births—a number equal to an annual birth-rate of 24·3 in every 1,000 of the estimated population*—and 20,385 deaths, representing an annual rate of 18·6 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 17,665 persons emigrated.

In England last quarter, the birth-rate represented was 27·3 in every 1,000 of the estimated population, and the death-rate 14·6 per 1,000.

The birth-rate in Ireland for the quarter is equal to the average rate for the corresponding quarter of the ten years 1897–1906, but 0·4 below the rate for the second quarter of 1906. The deaths are 677 above those registered in the corresponding quarter of 1906; the death-rate is 0·6 above the rate for that quarter, but 0·2 below the average for the second quarter of the ten years 1897–1906.

Compared with those for the corresponding quarter of 1906, the returns of pauperism, furnished by the Local Government Board, show a decrease of 409 in the average number of Workhouse inmates on

* See page 182.

Saturdays during the quarter, and a decrease of 750 in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years 1897-1906, the number of Workhouse inmates shows an increase of 793, but the number of persons on out-door relief a decrease of 3,567,* the total under both heads being 2·7 per cent. below the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·6 per cent.

The annual marriage-rate (5·4 per 1,000 of the population) represented by the marriages registered during the first quarter of 1907 is 0·9 below the average rate for the corresponding quarter of the preceding ten years.

TABLE L.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,† represented by the number of Marriages registered during the Quarter ended 31st March, 1907, and by the Births and Deaths registered in the Quarter ended 30th June, 1907.

* Not taking into account 13,656 persons relieved by means of works devised for the relief of distress in the June Quarter, 1905. See Table VII.

† The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 121.

MARRIAGES.

The marriages (5,938) registered in Ireland during the first quarter of 1907 are equivalent to an annual rate of 5·4 per 1,000 of the estimated population, being 1·0 below the rate for the corresponding quarter of 1906, and 0·9 below the average rate for the first quarter of the ten years 1897–1906. Of the total number of marriages 4,614 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,324 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 5·7 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·7 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 1·1 below the average rate for the corresponding quarter of the previous ten years, and that under the latter shows a decrease of 0·2.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by Quarterly Periods the Marriages registered in Ireland in each of the ten years 1897–1906, and the average number for that period; also the number registered in the first quarter of 1907.

1907.	5·7	4·7	5·4	

BIRTHS.

The number of births registered during the quarter ended 30th June last was 26,632—13,673 boys and 12,959 girls—being equal to an annual ratio of 1 in every 41·1, or 24·3 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1897–1906 was 27,018, equivalent to an annual rate of 24·3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 24·2 per 1,000 of the population according to the Census of 1901; Munster, 22·5; Ulster, 26·0; and Connaught, 20·4.

The highest county or county borough birth-rate* is 33·2 for Belfast county borough, and the lowest 17·2 for Roscommon county. Of the intermediate rates the highest five are—Dublin county borough, 32·0; Antrim, 24·6; Armagh, 24·5; Down, 24·3; and Wexford, 24·0. The lowest five are—Queen's, 17·3; Leitrim, 18·3; Tipperary, N.R., 18·6; Cavan, 19·2; and Dublin county, 19·4.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 20,385—10,240 males and 10,145 females—affording an annual ratio of 1 in every 53·7, or 18·6 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1897–1906 was 18·8 per 1,000.

The death-rate in Leinster was 21·2 per 1,000 of the population according to the Census of 1901; in Munster, 16·3; in Ulster, 19·3; and in Connaught, 14·0.

The county or county borough death-rates* range from 12·9 in Leitrim, to 28·5 in Dublin county borough. Between these rates the lowest five are—Mayo, 13·3; Kerry, 13·3; Roscommon, 14·2; Galway, 14·2; and Tipperary, N.R., 14·2; and the highest five are—Belfast county borough, 21·7; Monaghan, 20·1; Kildare, 20·0; Armagh, 19·9; and Kilkenny, 19·9.

* See note (†) on page 100.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1897–1906, and the average number for that period ; also the number registered during the first and second quarters of the year 1907 :—

Equivalent Annual Rate per 1,000 living:—										
Average, 1897–1906,	23·7	24·3	23·0	21·8	23·2	21·4	18·8	14·9	16·5	17·9
1907,	23·9	24·3	.	.	.	21·4	18·6	.	.	.

Ages.—Of the 20,385 deaths registered last quarter 2,418, or 11·9 per cent., were of children under 1 year old ; and 8,829, or 43·3 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 90·8 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 12·5 per cent. of the total deaths registered therein ; in Munster, 12·0 per cent. ; in Ulster, 12·2 per cent. ; and in Connaught, 8·7 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 40·2 per cent. ; in Munster, to 45·7 per cent. ; in Ulster, to 41·4 per cent. ; and in Connaught, to 53·5 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 743, or 58 less than the number registered in the corresponding quarter of 1906, and is equivalent to an annual rate of 0·7 per 1,000 living, being equal to the rate for the second quarter of 1906, but 0·1 below the average rate for the second quarter of the ten years 1897–1906.

* See Note (†) on page 109.

The following tabular statement shows the mortality from each of the principal epidemic diseases, as registered during the June quarter of 1907, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years 1902-1906.

Name of Disease.	Number of Deaths in June quarter, 1907.	Average number of Deaths in June quarter of the 5 years, 1902-1906.
Small pox,	1	7
Measles,	128	155
Scarlet Fever,	23	35
Typhus,	15	19
Whooping-cough,	243	259
Diphtheria,	65	64
Pyrexia (origin uncertain),	11	13
Enteric Fever,	75	110
Diarrhoeal Diseases,	182	148

Small-pox.—One death from small-pox was returned as having occurred in the Registrar's district of Holmpatrick, in Balrothery Union, county Dublin. The patient, a male, developed small-pox three days after his return from Glasgow. He had been vaccinated in infancy, and one mark was distinguishable, but he had not been re-vaccinated. It appears that this man also suffered from phthisis. He died in hospital about eight weeks after admission.

The last record of mortality from small-pox in Ireland was in the December quarter of 1905, when two deaths were registered.

The Registrar of Florencecourt, in the Union of Enniskillen, reports the occurrence of two cases of small-pox, during the last month of the quarter; both were removed at once to the Union Fever Hospital, and were progressing favourably at the time of his report. The first patient attacked says that he caught the infection in Belturbet. See Registrar's note, page 191.

Measles.—The mortality from measles is principally accounted for by the deaths registered in Dublin and in Belfast. Out of a total of 128, 61 deaths were in Dublin and 36 in Belfast. The total deaths represent an annual death rate of 0.12 per 1,000 of the population of Ireland estimated to the middle of the year. In each of the three quarters preceding, deaths from measles were 72, 80, and 90. The deaths (128) were under the average for the corresponding quarterly period of the 5 years 1902-1906, namely 155 deaths.

Scarlet Fever.—As in the June quarter of 1906, there were 23 deaths from scarlet fever recorded, the numbers for the September and December quarters of 1906, and for the March quarter of 1907, being 27, 39, and 34 respectively. The average number of deaths from scarlet fever in the June quarter of the 5 years 1902-1906 is 35.

Typhus.—From the returns of the Registrars it appears that 15 deaths from typhus were registered in Ireland during the period under notice, as against an average of 19 deaths in the corresponding quarter of the five years preceding, and 22, 18, and 13 deaths in each of the three preceding quarters. The deaths were registered in the following unions:—In Cork, 1 death; in Dublin North, 2 deaths; in Galway, 1 death; in Kilrush, 1 death; in Lismore, 1 death; in Newry, 5 deaths; in Roscommon, 1 death; in Sligo, 2 deaths; and in Tuam, 1 death.

Whooping-cough.—With the exception of the June quarter of 1906, when the fatalities from whooping-cough were 286 in number, the period now under review presents the highest mortality since the September quarter of 1904, the total deaths registered being 243, which represent an annual death rate of 0·22 per 1,000 of the population of Ireland estimated to the middle of the year. The deaths are, however, below the average for the June quarter of the five preceding years. In each of the three quarters preceding that under notice such deaths were 208, 164, and 236. Of the total deaths 79 belong to the county borough of Dublin, of which number 22 appertained to the registrar's district No. 4, South City; 11 to the district No. 3, North City; 10 to the district No. 2, North City; 9 to the district No. 2, South City; 8 to the district No. 3, South City; 7 to the district of North City, No. 1, West; 6 to the district of No. 1, South City; 4 to the district of North City, No. 1, East; and 2 to the urban portion of the district of Coolock and Drumcondra No. 1. Of the 27 deaths belonging to the county of Dublin 16 appertained to Donnybrook, and 5 to Rathmines. There were 18 deaths registered in the county borough of Cork, and 7 in the registrar's district of Cork Rural No. 1. In the county borough of Belfast 15 deaths from whooping-cough were registered. In the registrar's district of Ballybunion, in the union of Listowel, 5 deaths were registered, and in the registrar's district of Frenchpark, in the union of Castlereagh, there were also 5 deaths registered.

Diphtheria.—Deaths from diphtheria, which numbered 65 in the September quarter of 1906, rose to 92 in the December quarter of that year, declining to 67 in the March quarter of 1907, and again declining to 65 deaths in the period under notice, this latter number being nearly identical with the average (64) for the June quarter for the preceding five years. Particulars regarding the localities in which the deaths from diphtheria occurred may be seen in the Abstracts which commence on page 120.

Enteric Fever.—From Table IV. it appears that during the preceding eight quarterly periods the lowest recorded mortality from enteric fever was in the September quarter of 1906, when 82 deaths were registered. The deaths in the following quarterly period rose to 91, and again rose to 101 in the March quarter of the present year, but declined to 75 in the period under notice, the average deaths for the corresponding quarter of the five preceding years being 110. Of the 75 deaths, 15 were registered in the county borough of Belfast, and 4 in the registrar's district of Ballyconnell, in the union of Bawnboy.

The deaths of 11 persons were attributed to pyrexia (origin uncertain), formerly described as simple, continued, or ill-defined fever.

Diarrhoeal Diseases.—From Abstract I. it appears that diarrhoeal diseases accounted for the deaths of 182 persons. This number represents an annual rate of 0·17 per 1,000 of the population of Ireland estimated to the middle of the year 1907. The total 182 is above the average (148) for the June quarter for the preceding quinquennial period. In the three quarters preceding, deaths from diarrhoeal diseases were 835, 478, and 189 respectively. Of the deaths, 33 belonged to the county borough of Belfast 12 to the county borough of Dublin, and 10 to the county borough of Waterford.

Tuberculous Disease.—From the returns furnished by the Registrars it appears that the number of deaths registered during the quarter from all forms of tuberculous disease amounted to 3,252. This figure represents an annual death rate from tuberculosis of 2·97 per 1,000 of the population of Ireland, estimated to the middle of the year. The rates, calculated on the figures as returned in the three preceding quarters, were 2·29, 2·21, and 2·76 per 1,000 of the estimated populations of Ireland for the years 1906 and 1907 respectively. Numerous notes bearing on the prevalence of this disease have been supplied. Amongst these, the notes by the Registrars of Ballynacarrigy, Cloyne, Killarney No. 2, Waterford Urban No. 1, Termon, Holywell No. 2, Drumbeg, Dungiven, Castlederg, Bullycroy, and Sligo No. 1, are of especial interest, and will be found in the Appendix to this Report.

Malignant Diseases.—Deaths which are recorded as from carcinoma, sarcoma, malignant disease, cancer (undefined), are returned by the Registrars in their quarterly reports for all the districts in Ireland; from Abstract I. it appears that such deaths numbered in the aggregate 772 for the period under notice. This total is equal to an annual death rate of 0·71 per 1,000 of the population, estimated to the middle of the present year. In the three preceding quarters the rates for deaths under this heading were 0·70, 0·73, and 0·71 respectively.

Hydrophobia, Rabies.—The returns of the Registrars did not contain one death attributed to hydrophobia, nor does it appear that any person was bitten by a rabid animal during the quarterly period now the subject of review. The Registrar of Woodford, Loughrea, reports that “there was one case of severe biting by a dog *not rabid*, but the injuries healed up all right.”

Cerebro-spinal Fever.—Of 18 references to the existence of cerebro-spinal fever in Ireland during the quarterly period under notice, one was from the Registrar of Carrignavar, Cork Union, and 16 were from Ulster, namely:—Cushendall, Ballymena, Ballycarry, Lurgan No. 1, 3 deaths; Belfast * Urban No. 3, 13 deaths; Belfast Urban No. 4, 22 deaths; Belfast Urban No. 11, 22 deaths; Belfast Urban No. 13, 8 deaths; Cavan, 1 death; Dunfanaghy, 1 death; Moville, 2 deaths; Crossgar, 2 deaths; Castlereagh No. 1, 1 death; Killyleagh, 1 death; Ballylesson, 79 deaths, in Purdysburn Fever Hospital; Greyabbey, 1 death (a visitor from Belfast); Omagh No. 1, 1 death. The notes referring to these districts will be found printed in the Appendix to this Report.

* See special tables, A., B., C., and D., of Quarterly Summary of the Weekly Returns of Births and Deaths in the Dublin Registration Area and 21 of the Principal Urban Districts of Ireland, for 13 weeks ending 29th June, 1907.

The Registrars, in their Notes, report the presence of the following diseases :—Small-pox in 2 districts, chicken-pox in 1 district, measles in 16 districts, scarlet fever in 13, whooping-cough in 17, diphtheria in 13, fever in 11—*pyrexia* in 1, and enteric in 10—diarrhœa in 11, influenza in 20, mumps in 5, and cerebro-spinal fever in 18 districts. [See Appendix to this Report commencing on page 183.]

Inquests.—There were 411 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 50 of the total deaths registered.

In Leinster there was 1 inquest to every 53 deaths registered, in Munster 1 to 51, in Ulster 1 to 42, and in Connaught 1 to 84.

Deaths in Public Institutions.—Of the 20,385 deaths registered, 4,288, or 21·0 per cent., occurred in public institutions. In Leinster the percentage was 29·8, in Munster 23·9, in Ulster 14·6, and in Connaught 13·4.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1907, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.											
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pyrexia* (origin uncertain).	Enteric Fever.	Diarrhoeal Diseases.	Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population

[TABLE V.]

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 22.1, and the birth-rate 30.0 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 16.6 and the birth-rate 21.3 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1.2 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0.4 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1907, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES;† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 29th June, 1907.

† see note (1) page 109.

VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1907, there were 29,040 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th June last, was 17,665 (9,977 males and 7,688 females), being 497 more than in the corresponding quarter of the year 1906, and 724 above the average number for the second quarter of the ten years 1897-1906.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June in 1906 and 1907:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1906.	1907.	In-crease.	De-crease.	1906.	1907.	In-crease.	De-crease.	1906.	1907.	In-crease.	De-crease.
April,	4,773	4,418	—	325	3,678	3,366	—	312	8,451	7,814	—	637
May,	3,450	3,774	324	—	2,700	2,938	238	—	6,150	6,712	562	—
June,	1,456	1,755	299	—	1,111	1,384	273	—	2,567	3,139	572	—
Total,	9,679	9,977	298	—	7,489	7,688	199	—	17,168	17,665*	497	—

* Including 14,518 emigrants to the United States of America, viz.:—6,780 in the month of April, 5,511 in May, and 2,227 in June. Of 13,707 steerage passengers 4,925 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1906 the average price was $5\frac{1}{2}d.$, and in the corresponding quarter of 1897 it was also $5\frac{1}{2}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 14s. 6d. per cwt., being the same as the average for the corresponding quarter of the year 1906. In the second quarter of 1897 the average price was 12s. 9d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 4s. 6d. to 5s. In the second quarter of 1906 the average prices were 3s. to 3s. 6d., and the prices for the corresponding quarter of 1897 were 2s. 4d. to 3s. 10d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 53s. 6d. to 57s. per cwt. In the corresponding quarter of 1906 the average prices were from 52s. 6d. to 56s. 6d., and in the second quarter of 1897 they were from 46s. to 62s.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 22s. to 21s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £86 $\frac{3}{8}$, and the lowest £83 $\frac{1}{4}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, which had been $5\frac{1}{2}$ per cent. from the 17th January, 1907, was reduced on the 11th April, to 5 per cent., and on the 25th April to 4 per cent., at which rate it remained to the end of the quarter.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1907 was 43,665, or 409 under the average for the corresponding period in 1906.

The average weekly number of persons receiving out-door relief during the quarter was 56,747, being 750 under the average for the second quarter of 1906.

Of the persons receiving in-door relief during the second quarter of 1907, an average number of 1,480 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1906 the average weekly number was 1,513.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1907, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

Average PRICES OF PROVISIONS.										PAUPERISM.			
										NUMBER OF PERSONS RELIEVED.			
PERIOD.	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		In-door.	Ordinary relief.	By means of works devised for the relief of distress.	Total.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the second quarter of the years 1902–1907, respectively,

* Latitude 53° 21' 43" 25" north; longitude 6° 20' 59" 15" west. Height above the sea 155·3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 214).

The mean height of the barometer during the second quarter of 1907 was 29.778 inches, being 0.190 below the average for the corresponding quarter of the five years 1902-1906; the highest reading (30.355 inches) was on the 25th April, at 9 A.M., wind N.N.E., and the lowest (29.105 inches) on the 3rd April, at 9 A.M., air calm.

The mean temperature of the air during the quarter was 48.5°, or 1.4 below the average for the second quarter of the 5 years 1902-1906.

The maximum temperature of the air during the quarter was 65.8° and the minimum 24.9°. The maximum heat in sun was 126.0°, and the minimum on the grass 21.6°.

Rain or snow fell on 66 days during the quarter. The rain-fall measured 8.265 inches, being 2.691 inches above the average for the second quarter of the five years 1902-1906. The greatest monthly rain-fall was in June, when 3.049 inches were registered.

April.*—The mean height of the barometer during this month was 29.768 inches; the highest reading (30.355 inches) was on the 25th at 9 A.M., wind N.N.E.; and the lowest (29.105 inches) on the 3rd, at 9 A.M., air calm. The mean temperature of the air was 44.5°, the maximum registered was 64.0°, and the minimum 24.9°. The 27th was the warmest day and the 5th the coldest night. The mean of the dry bulb was 44.8°, and of the wet bulb 42.3°. The maximum heat in sun was 118.9°, and the minimum on the grass 21.6°. The minimum on the grass was below 32° on 18 nights. The maximum ozone was 0.9, the minimum 0.1, and the mean 0.6. Rain or snow fell on 22 days. The rain-fall measured 2.442 inches; the greatest amount in 24 hours was 0.315 inch on the 13th.

May—The mean height of the barometer during this month was 29.809 inches; the highest reading (30.337 inches) was on the 17th at 9 P.M., air calm, and the lowest (29.178 inches) on the 2nd, at 9 P.M., wind S.S.W. The mean temperature of the air was 47.9°, the maximum registered was 65.8°, and the minimum 29.1°. The 27th was the warmest day, and the 23rd the coldest night. The mean of the dry bulb was 48.9°, and of the wet bulb 46.5°. The maximum heat in sun was 123.5°, and the minimum on the grass 26.6°. The minimum on the grass was below 32° on 9 nights. The total amount of sunshine recorded was 165.7 hours, the greatest daily amount being 13.6 hours on the 19th. The maximum ozone was 0.9, the minimum 0.0, and the mean 0.6. Rain fell on 18 days. The rain-fall measured 2.774 inches; the greatest amount in 24 hours was 1.040 inches on the 6th.

June—The mean height of the barometer during this month was 29.757 inches; the highest reading (30.243 inches) was on the 16th at 9 P.M., air calm; and the lowest (29.381 inches) on the 10th, at 9 A.M., wind S.E. The mean temperature of the air was 53.0°; the maximum registered was 64.7°, and the minimum 39.4°. The 7th was the warmest day, and the 17th the coldest night. The mean of the dry bulb was 53.1°, and of the wet bulb 50.1°. The maximum heat in sun was 126.0°, and the minimum on the grass 33.7°. The minimum on the grass was not below 32° on any night. The total amount of sunshine recorded was 106.3 hours, the greatest daily amount being 10.6 hours on the 29th. The maximum ozone was 0.9, the minimum 0.3, and the mean 0.6. Rain fell on 26 days. The rain-fall measured 3.049 inches; the greatest amount in 24 hours was 0.590 inch on the 7th.

*Owing to repairs to wind gauge no record of wind was taken for the period 9th to 18th, and 28th and 30th, nor of sunshine, 9th to 17th, of the month of April.

† Owing to repairs to Wind Gauge, no record of Wind was taken for the period 9th to 18th, and 28th and 30th of April.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

Prepared in the Meteorological Office under the direction of
W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.

In compiling the following Table (pp. 118 and 119), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind observations at Valencia are based on the records of a standard Robinson anemometer (factor 2.2). Velocities between 13 and 38 miles in the hour have been entered in the Tables as strong winds, velocities of 39 miles in the hour, or above, as gales. At the remaining stations the wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Donaghadee,	Do.
Belfast, Queen's College,	John Wylie, B.A.
Armagh, The Observatory,	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point,	Meteorological Office.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	O. Boeddicker, Ph.D., for the Earl of Rosse, K.F.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Waterford,	J. N. White, Esq.

(a) See note (*), page 121.

* The Registrars' Districts (927 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (+) on pages 133 and 134 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks ending from 31st March, 1907, to 29th June, 1907. With the exception of 117 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

‡ Exclusive of 8 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

§ Formerly described as "Simple Continued Fever."

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

Registrars' Districts.		Area, in Statute Acres.	Popu- lation in 1901.	Deaths.		Deaths registered during the quarter are stated by the Registrars to include										Deaths from					Deaths in Public Insti- tutions.					Number of Uncertified Deaths.	Number of successful Vaccinations in the quarter ending 30th June, 1907.
No.	Dublin Co. Boro'.			Births.	Registered in the quarter ending 30th June, 1907.	Average number in the quarter ending 30th June in the 7 years, 1900-1906.	Registered in the quarter ending 30th June, 1907.	Children under 1 year of age.	Persons aged 60 years and up-wards.	Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pyrexia (origin uncertain).	Enteric Fever.	Diarrhoeal Diseases.	All forms of Tu-berculous Dis-ease.	Cancer, Malignant Disease.	Violence.	Inquest Cases.

NOTE.—This table has been constructed for the years 1833 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1907—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901, respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—Acute summer diarrhoea prevalent in the district.

CARLOW; *Bagenalstown*.—One death registered, 90 years of age. The district is considered healthy.

CARLOW; *Clonegall*.—The death rate was low during the quarter.

CARLOW; *Leighlinbridge*.—District healthy.

CARLOW; *Tullow*.—District is in a healthy state; deaths below the average.

Dublin County.

BALROTHERY; *Holmpatrick, W*.—A man developed small-pox three days after his return from Glasgow; he had also phthisis. He was sent immediately to the workhouse hospital, where he died about eight weeks afterwards.

BALROTHERY; *Kilsallaghan*.—One death from whooping-cough, and 3 from tuberculosis.

BALROTHERY; *Lusk*.—Measles very prevalent, but no fatal case so far.

DUBLIN SOUTH; *Clondalkin*.—An epidemic of whooping-cough.

DUBLIN SOUTH; *Crumlin*.—The sanitation of this district is gradually improving.

DUBLIN SOUTH; *Tallaght*.—District very healthy.

Dublin County Borough.

DUBLIN NORTH; *North City, No. 1, West*.—Very little infectious disease except measles.

Kildare County.

ATHY; *Castledermot*.—A good many cases of influenza during quarter.

ATHY; *Monasterevin*.—I have registered one death at the remarkable old age of 104 years. He retained his faculties and was active to the end. I attended two cases of scarlatina; both were sent to the fever hospital.

BALTINGLASS; *Baltinglass No. 2*.—The death of one woman, said to be 103 years of age, registered during the quarter. A large number of cases of influenza during this quarter.

CELBRIDGE; *Celbridge, W*.—District very healthy.

CELBRIDGE; *Kilcock*.—Considering the cold, unseasonable weather we experienced during the quarter just ended, the district was fairly healthy.

CELBRIDGE; *Maynooth*.—District healthy.

EDENDERRY; *Carbury*.—Epidemic diarrhoea prevalent during latter half of quarter.

EDENDERRY; *Rathangan, No. 1*.—Two deaths from tuberculous meningitis; one a man aged 32. He had been decaying for some years. The other a married woman aged 27. Deaths registered during quarter of persons aged 90, 82, 78, 75, 61, 49, 46, 32, 27, 23, 17, 17 years, and 8 days.

NAAS; *Kildare*.—District healthy.

NAAS; *Naas and Carragh, W*.—Health of district very good.

NAAS; *Robertstown and Kilmeage*.—I registered the deaths of two persons aged 93 and 99 years respectively during the quarter.

Kilkenny County.

CALLAN; *Callan, W*.—Four deaths from tubercular disease were registered during the quarter.

CALLAN ; Kilmaganny. — District healthy.

CASTLECOMER ; Ballyragget.—Sanitary arrangements very fair. All the diseases mentioned in the Abstracts absent.

CASTLECOMER ; Castlecomer, W. — Owing to the severity of the weather during the last quarter, bronchial affections proved fatal to a number of old persons.

KILKENNY ; Tiscoffin.—Sanitary arrangements of this district are good.

KILKENNY ; Tullaroan. — Health of district fairly good.

NEW ROSS ; Dysartmoon.—Four cases of diphtheria occurred during the quarter; cases were removed to hospital; none of cases have been fatal so far. Otherwise the district is fairly healthy.

THOMASTOWN ; Knocktopher.—As far as I can ascertain the sanitary arrangements in district are satisfactory.

URLINGFORD ; Urlingford, W.—Health of the district good. No epidemic during quarter.

King's County.

BIRR ; Frankford.—Of the four uncertified deaths there was no medical attendant during last illness. The respective ages given by informants in these cases were 96, 86, 70, and 67.

BIRR ; Kinnitty.—Health of district good; sanitary arrangements good.

EDENDERRY ; Rathangan, No. 2.—Two deaths from pulmonary phthisis, one a young man aged 21, a carpenter; neglected cold and violent exercise in the football field—the proximate cause—duration one year. The other a married woman aged 65; no cause stated.

MOUNTMELICK ; Clonygowan, No. 2.—District healthy.

ROSCREA ; Shinrone.—Sanitary condition of district good.

TULLAMORE ; Killoughy.—Of the deaths registered over 60 years nine averaged 85½ years. There is a scarcity of good drinking water in parts of the district. No diseases prevalent except cases of influenza of a mild type. Parents dilatory in bringing children in for vaccination.

TULLAMORE ; Philipstown. — District fairly healthy; No contagious disease.

Longford County.

BALLYMAHON ; Abbeyshrule. — The sanitary condition of the district is satisfactory. Influenza and epidemic diarrhoeal disease (English cholera) prevalent during the quarter. Three cases of carcinoma, one on lip, one of stomach, one on neck.

BALLYMAHON ; Ballymahon, W.—The sanitary condition of the district is satisfactory.

GRANARD ; Ballinalee.—The district is in good sanitary condition and free from contagious disease.

GRANARD ; Granard, W.—The district is in good sanitary condition and free from contagious disease.

GRANARD ; Scrabby, No. 2.—Sanitary state of district satisfactory; no epidemic.

LONGFORD ; Drumlish. — No epidemic of any kind during quarter. District fairly healthy. There was no infectious case in the district during the quarter. There should have been more children vaccinated, as the weather suited the operation.

Louth County.

ARDEE ; Ardee, W.—Concerning the six deaths non-certified through illness of medical attendant, and all of which occurred in the Union Hospital, I may state for statistical purposes that none of them were due to malignant or tuberculous disease nor any of those diseases mentioned in the Abstracts.

ARDEE ; Castlebellingham. — District in good sanitary condition. Health of district good.

ARDEE ; Collon No. 1.—District healthy.

ARDEE ; Dunleer.—District healthy.

DROGHEDA ; Termonfeekin. — District free from infectious diseases during the quarter. Sanitary condition fairly good.

DUNDALK ; Barronstown.—The district is in a very healthy state, and free from zymotic disease. The sanitary condition of the houses is much improved, and people are paying more attention to ventilation and general cleanliness. I had the leaflets on consumption, and rules to be observed by those who live with consumptive people, distributed, with satisfactory results.

DUNDALK ; Dromiskin. — District in healthy state.

DUNDALK ; Dundalk, W.—The district has been remarkably free from all infectious disease during the quarter. The sanitary condition of the town, with the increased water supply and building of new houses, is improving.

Meath County.

ARDEE ; Collon, No. 2. — District healthy.

ARDEE ; Drumcondra. — Epidemic diarrhoea very prevalent.

DROGHEDA ; St. Mary's.—The sanitary state and health of the district are good.

DROGHEDA ; Stamullen. — District healthy.

DUNSHAUGHLIN; Killeen.—The sanitary condition of district is good.

DUNSHAUGHLIN; Ratoath, W.—Sanitary condition of the district is good.

EDENDERRY; Ballyboggan.—Health of district good.

KELLS; Kilskeer.—Influenza very prevalent during spring.

KELLS; Moynalty.—The birth rate would appear to be rapidly declining.

KELLS; Nobber.—Health of district is satisfactory, although the season was very trying and harsh. Of the 10 deaths recorded as '60 years and upwards,' the average is the venerable age of 72·6 years.

NAVAN; Painestown.—There were two cases of diphtheria notified during quarter. An epidemic of measles is prevalent amongst the children attending one of the schools.

OLDCASTLE; Oldcastle, W.—District continues in a satisfactory condition, except the town of Oldcastle, which requires a better supply of water for domestic and sanitary purposes.

TRIM; Summerhill.—One fatal case of diphtheria has occurred, and has been registered during the quarter; no other cases have occurred. Insufficient accommodation, overcrowding, and absence of sanitary appliances are probable causes of said disease.

Queen's County.

ABBEYLEIX; Ballinakill.—Health of district good.

ABBEYLEIX; Rathdowney.—Sanitary arrangements might be better; no disease prevalent at present.

MOUNTMELICK; Clonygowan, No. 1. District healthy.

MOUNTMELICK; Emo.—Sanitary conditions satisfactory.

ROSCREA; Borris-in-Ossory.—The health of this district has been good during the past quarter.

Westmeath County.

ATHLONE; Athlone No. 1, W.—Amongst the deaths registered for the quarter there was one death of a male whose age was stated to be 100.

DELVIN; Delvin, W.—Measles of a mild type has been prevalent in the district.

MULLINGAR; Ballynacarrigy.—Deducting the 8 deaths of persons over 60 years, we find that of the remaining six, three were caused by tuberculosis, pulmonary, &c. Carcinoma accounts for one death. Two deaths of children under one year.

MULLINGAR; Castletown-Geoghegan.—With the exception of diarrhoea of an aggravated form the district is healthy. This disease attacked people of all ages, and both sexes suffered equally. In some cases the disease was very severe, some were only slightly affected. Rhubarb may have something to do with it in a few cases, but in most I could not find a cause for it. It was epidemic. No deaths from it.

MULLINGAR; Milltown.—Several cases of throat affections (tonsillitis, pharyngitis, laryngitis), attended with hoarseness and grippal symptoms, turned up last month. They all terminated favourably in spite of the severity of the symptoms, and no case lasted longer than the fourth day. Atmospheric conditions must have been the cause of this outbreak; a poison, possibly, in the atmosphere as yet unknown to medical science. There were six deaths registered, the smallest number in any June quarter for the past ten years, except the June quarter of 1902, when there were but four entries. There was one death from phthisis. No deaths from cancer. Sanitary condition of the district good.

MULLINGAR; Mullingar, W.—Health of the district continues fairly good.

Wexford County.

ENNISCORTHY; Newtownbarry.—There has been no death of a child under 1 year during the quarter.

GOREY; Camolin.—The district is in good sanitary condition.

NEW ROSS; Fethard No. 2.—District healthy.

WEXFORD; Bannow.—There was an unusual number of cases of pneumonia during the month of June. The weather during that month was exceptionally wet and cold.

WEXFORD; Bridgetown.—The health and sanitary arrangements of the district are satisfactory.

Wicklow County.

BALTINGLASS; Baltinglass, No. 1, W.—The death of a woman, aged 90, registered during the quarter. Three deaths from influenza and its complications registered during the quarter. A great many cases of influenza during this quarter.

BALTINGLASS; Kiltegan.—Although the death-rate in this district is unusually high this quarter, only two cases were of persons under 60 years old. One of them was 59 years; the other, a child delicate from birth, 11 months old.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—The health of the district is good, with the exception of some cases of whooping-cough.

RATHDRUM ; Annamoe. — District healthy during the quarter.

RATHDRUM ; Newcastle. — Sanitary arrangements in two villages are very bad.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN ; Ballyvaghan, W. — The past quarter is notable for the very low death-rate.

CORROFIN ; Corrofin, W. — Health of district good, but might be better.

ENNIS ; Killaniv. — Health of district good. Sanitary arrangements good.

ENNIS ; Newmarket. — The general health of the district has been satisfactory. The unusual inclemency of the weather accounted for the great increase of chest troubles.

ENNISTIMON ; Ennistimon, W. — The sanitary arrangements are satisfactory.

ENNISTIMON ; Roosford. — District very healthy, considering the great damp of the season. Sanitary arrangements satisfactory.

KILLADYSERT ; Labasheeda. — Tuberculous disease is prevalent.

KILRUSH ; Carrigaholt. — Whooping-cough was very prevalent in western portion of district during past quarter ; there were six deaths, five uncertified. Vaccination had to be postponed, the weather was so inclement.

KILRUSH ; Craggaknock. — The district has been very healthy during quarter.

KILRUSH ; Kilkee. — Sanitary state of district fairly good.

KILRUSH ; Kilmihiil. — The district continues in a very healthy condition.

KILRUSH ; Kilrush, W. — District has, on the whole, been healthy.

LIMERICK ; Bridgetown. — Sanitary state of district good. One case of enteric fever occurred during quarter.

LIMERICK ; Coolacasey. — The sanitary condition of the district is satisfactory.

SCARRIFF ; Annacarriga. — District healthy.

SCARRIFF ; Feakle. — Health of district good.

SCARRIFF ; Mountshannon, W. — District very healthy generally.

TULLA ; Quin. — The sanitary arrangements are fairly good. None of the diseases mentioned in the Abstracts are prevalent.

Cork County and County Borough.

BANDON ; Inishannon. — The uncertified cases are those of cases of persons aged 99, 86, 80, 42 years, the infant, and the case of the accident. I am sorry to state that there were 3 deaths due to phthisis. I have had no infectious cases during the quarter.

BANTRY ; Bantry, W. — Health of the district very good.

BANTRY ; Durrus and Kilcrohane. — District very healthy. Vaccination backwards owing to wet and cold weather. One case registered from phthisis pulmonalis ; from inquiries, I believe it was hereditary. Sanitary arrangements fair.

BANTRY ; Glengarriff. — Sanitary condition of the district fairly satisfactory. No infectious disease during the quarter.

BANTRY ; Kealkill. — The sanitary condition of district is fairly good. One case of carcinoma, of liver (probably). No infectious disease during quarter.

CASTLETOWN ; Kilcatherine. — In consequence of the wet weather that prevailed during the quarter vaccination has been much retarded. District healthy.

CORK ; Carrigaline No. 1. — District has been very healthy during the quarter. A very few cases of summer diarrhoea of a light kind.

CORK ; Carrignavar. — One death certified as cerebro-spinal meningitis, more probably an influenzal form of the disease than a case of epidemic cerebro-spinal fever. However, we took precautions against the latter by rigid isolation and disinfection.

CORK ; Cork Rural, No. 2. — Whooping-cough and mumps prevalent.

CORK ; Cork Urban, No. 3. — Whooping-cough and mumps prevalent.

CORK ; Douglas. — Two cases of cancer.

CORK ; Dripsey. — District healthy. One case of typhoid.

DUNMANWAY ; Coolmountain. — The sanitary condition of the district is fairly good. One case of cancer and three of tuberculous disease occur among deaths during the quarter.

DUNMANWAY ; Dunmanway, W. — District healthy.

FERMOY ; Ballynoe. — There was one accidental death due to very extensive burns, and one death due to cancer. There was little serious illness during the quarter.

KINSALE ; Ballyfeard. — Health of district fairly good. No infectious diseases during quarter.

MALLOW ; Ballyclogh. — District healthy.

MALLOW ; Buttevant. — The district is in good sanitary condition and free from infectious disease.

MALLOW ; Kilshannig.—There was one death from cancer of stomach. There were three deaths from phthisis registered in the district during the quarter.

MALLOW ; Rahon.—Measles has occurred amongst the children in the north portion of this district; it is of the simple kind.

MIDDLETON, Cloyne.—I attribute 40 per cent of the cases of illness amongst my dispensary patients to overcrowding and a filthy condition of the dwellings; the breathing of re-breathed and vitiated air causing a form of anæmia, accompanied with great debility, lowering the germicidal powers of their tissues, making them easy victims to tubercular disease.

MITCHELSTOWN ; Kildorrery.—Measles was prevalent in this district during the past two months, and, on that account, vaccination had to be postponed in a number of cases.

SKIBBEREEN, Skibbereen, W.—District free from diseases of an infectious character. This quarter is the principal one in which vaccination is performed in this district.

SKULL ; Goleen.—I desire to again call your attention to the great want of a water supply to Goleen village.

Kerry County.

CAHERSIVEEN ; Caher, W.—The vaccination defaulters were very slow during past quarter, but are now coming in fast.

CAHERSIVEEN ; Darrynane.—Epidemic diarrhoea of a severe type was prevalent during the quarter just ended, but none of the cases happily proved fatal.

CAHERSIVEEN ; Glanbehy.—Sanitary state of district good.

CAHERSIVEEN ; Valencia.—District healthy during the quarter. Four of the deaths registered during the quarter were at 87, 81, 77, and 69 years of age, respectively.

DINGLE ; Anascaul.—The district is healthy and free from infectious disease.

DINGLE ; Castlegregory.—There was no death from cancer.

DINGLE ; Dingle, W.—Notwithstanding the coldness of the season the district has been healthy and free from zymotic disease, except a few cases of influenza of rather a severe type.

DINGLE ; Ventry.—Of late weeks the sanitary condition of some of the villages in the district has not been very good, owing to the incessant fall of rain. A sub-acute form of bronchial catarrh has been fairly prevalent both amongst the young and the old people.

KILLARNEY ; Killarney, No. 2.—The sanitary condition of my district is bad. The houses in many cases are damp, low-lying, and ventilation is defective. These, combined with overcrowding, especially in sleeping apartments, cause the various kinds of tuberculous disease so prevalent in the district. People cannot be got to learn the value of fresh air and sunshine.

KILLARNEY ; Killorglin.—The sanitary arrangements are, on the whole, good, but there is a very dangerous open sewer which requires attention.

KILLARNEY ; Milltown.—District healthy. No case of contagious or infectious disease. The sanitary state of the district is good. Tuberculous disease rather prevalent.

LISTOWEL ; Ballyhorgan.—Sanitary state of district good.

LISTOWEL ; Ballylongford.—District very healthy for quarter. No case of contagious disease. Vaccination very satisfactory, most of defaulters turning up. The sewers in Ballylongford require attention.

LISTOWEL ; Listowel, W.—District free from infectious diseases.

LISTOWEL ; Tarbert.—Whooping-cough very prevalent throughout the district. Very little vaccination in consequence.

TRALEE ; Brosna, No. 1.—District healthy.

TRALEE ; Castlemaine.—The health of the district was good during the quarter, and the death-rate was low. Vaccinations well attended to for the past month.

TRALEE ; Kilgobban.—The district is healthy and free from infectious disease.

Limerick County and County Borough.

CROOM ; Castletown.—An unhealthy quarter, with sporadic cases of influenza through district.

KILMALLOCK ; Bruree.—Had one case of scarlatina during last month of quarter. The district very healthy.

KILMALLOCK ; Hospital.—District healthy.

KILMALLOCK ; Kilfinane.—District healthy.

KILMALLOCK ; Kilmallock, W.—No epidemic disease. District healthy.

LIMERICK ; Annacotty.—Sanitary arrangements very fair. District healthy.

LIMERICK ; Caherconlish.—One case of scarlet fever removed to hospital; house disinfected.

LIMERICK; Moroe.—Sanitary condition fairly good. District healthy, except for the prevalence of tuberculous disease. Vaccination up to date.

LISTOWEL; Glín.—There was one case of enteric fever. Influenza, with pulmonary complications, was very rife.

MITCHELSTOWN; Galbally.—Vaccination postponed owing to isolated cases of measles throughout the district.

MITCHELSTOWN; Mitchelstown, No 2.—An epidemic of measles of an aggravated type exists throughout the district.

NEWCASTLE; Abbeyfeale.—Whooping-cough prevalent during the quarter. No fatal cases.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair. Whooping-cough in the western portion of district caused 3 deaths.

NEWCASTLE; Feenagh.—The health of the district is very good.

NEWCASTLE; Newcastle, W.—District healthy.

RATHKEALE; Askeaton.—During the past quarter the district was entirely free from the principal epidemic diseases. Pneumonia caused 3 deaths, pulmonary phthisis 2 deaths, bronchitis one death, heart disease 2, and cancer (epithelioma) of forehead one death.

RATHKEALE; Pallaskenry.—The sanitary arrangements in the district are fairly good.

RATHKEALE; Rathkeale, No. 1, W.—The district is free from epidemic disease. The male birth-rate during the quarter is very much in excess of the female.

RATHKEALE; Rathkeale, No. 2.—There were two cases of scarlatina in the district during the quarter.

RATHKEALE; Shanagolden.—Whooping-cough of a very mild form prevalent; no deaths therefrom.

TIPPERARY; Grean.—District healthy.

Tipperary County, North Riding.

BORRISOKANE; Terryglass.—The district is in a good sanitary state. No epidemic.

NENAGH; Nenagh, W.—District healthy.

NENAGH; Newport.—No epidemic of any infectious disease.

NENAGH; Portroe.—The district is healthy.

Tipperary County, South Riding.

CALLAN; Ballygarry.—The health of the district during the quarter was good and free from infectious disease.

CALLAN; Mullinahone.—Sanitary state of district fairly good. No epidemic or other disease prevalent. No case of cancer that I am aware of in district. One case of tubercular disease of bone likely to end fatally.

CARRICK-ON-SUIR; Garrangibbon.—The district is in a very healthy condition, and vaccination well attended to.

CASHEL; Killenaule.—The health of the district is very good and free from contagious diseases of all kinds. The deaths registered are mostly of old people from 90 years to 60.

CASHEL; Kilpatrick.—District healthy.

CLOGHEEN; Caher.—The district is in a very healthy state. No cases of an epidemic character occurred in the district during the past quarter.

CLOGHEEN; Clogheen, W.—Pneumonia prevalent.

CLONMEL; Kilsheelan, No. 1.—No case of zymotic disease. An outbreak of influenza occurred in June with pulmonary complications, viz., pneumonia and bronchopneumonia.

TIPPERARY; Cappagh.—The district is healthy.

URLINGFORD; Kilcooly.—The district has been very healthy during quarter, with the exception of one case of typhoid fever which made a good recovery.

Waterford County and County Borough.

CLONMEL, Kilsheelan, No. 2.—No case of zymotic disease. An outbreak of influenza occurred in June.

DUNGARVAN; Dungarvan, W.—There was an epidemic of mumps in district during the past quarter, with orchitis as a complication in several cases.

KILMACHTHOMAS; Bunmahon.—The sanitary arrangements in the district are satisfactory, and no particular disease has been prevalent during the quarter.

LISMORE; Ballyduff.—General health of district very satisfactory.

LISMORE; Tallow.—District free from zymotic disease. Sanitary condition good.

WATERFORD; Waterford Rural, No. 1.—The housing of the labouring classes is in some cases deficient in light, air-space, ventilation, and sanitation.

WATERFORD; Waterford Urban, No. 1, W.—The sanitary conditions in many parts of the district are bad—there are many houses having objectionable privies and ashpits. The housing is in places deficient in air-space, light, and ventilation. Tuberculosis is prevalent—it accounts for about 28 per cent. of the deaths. Scarlatina of a mild type prevails in the district. Vaccination well carried out.

WATERFORD; Woodstown.—The health of the district is good.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Antrim, W.* — Pertussis prevalent.

ANTRIM; *Doagh.* — District in fair sanitary condition. Influenza and measles very prevalent during the quarter.

ANTRIM; *Randalstown.* — District at present free from epidemic disease.

ANTRIM; *Templepatrick.* — The sanitary arrangements of the district (with few exceptions) are good. No epidemic disease at present.

BALLYCASTLE; *Cushendall.* — District fairly healthy. There was one fatal case of cerebro-spinal fever early in the year.

BALLYMENA; *Ballymena, W.* — One or two cases of cerebro-spinal fever that recovered. District on the whole healthy.

BALLYMENA; *Broughshane.* — The health of the district is very good. No zymotic disease.

BALLYMENA; *Clogh.* — The death rate is higher than usual, but a large proportion of the deaths has been of the aged and infirm. District fairly healthy. Sanitary arrangements good.

BALLYMENA; *Galgorm.* — District extremely healthy during the quarter. No zymotic disease.

BALLYMENA; *Portglenone.* — Health of the district is good.

BALLYMENA; *Toome.* — Health of district satisfactory.

BALLYMONEY; *Dervock.* — The age of a woman who died in Tiscolman is given as 100 years. From inquiries made I believe this statement to be correct.

LARNE; *Ballycarry.* — Sanitation of district fairly good. One case of cerebro-spinal meningitis occurred in district.

LARNE; *Waterfoot.* — Sanitary arrangements in the district are excellent.

LISBURN; *Dunmurry.* — The sanitary condition of this district good. No epidemic of any kind.

LISBURN; *Glenavy.* — Death average this quarter very low; tuberculosis responsible for 30 per cent. of deaths. Epidemic enteritis of a severe type is very prevalent in part of the district.

LISBURN; *Knocknadona.* — The sanitary condition of this district is fair. There was one death registered from tuberculosis; two deaths from cancer of the stomach; no family records.

LISBURN; *Lisburn, W.* — With two exceptions (out of the four cases of cancer registered) I could not find a trace of cancer in the family history.

Armagh County.

ARMAGH; *Markethill.* — Diphtheria has been very prevalent during the past six months. Measles was epidemic for four months, and caused one death. Whooping-cough caused two deaths, and the children were delicate and came from Glasgow, where they contracted the disease. I registered the death of one person aged 100 years, and 3 aged 86 and over.

ARMAGH; *Rich Hill.* — A severe epidemic of measles during the earlier part of this quarter; over 100 cases in the district. Pneumonia was a sequela in a number of cases, and caused two deaths.

ARMAGH; *Tynan.* — There was a slight epidemic of measles in the neighbourhood of Middletown, and of whooping-cough in the villages of Tynan and Killylea. No deaths from the former, but two from the latter, both of infants.

LURGAN; *Lurgan, No. 1, W.* — Three deaths occurred in the workhouse hospital from epidemic cerebro-spinal meningitis. The patients all belonged to the rural district, and were aged respectively 5, 4, and 1. No light was thrown on the aetiology of the disease.

LURGAN; *Lurgan, No. 2.* — This district is at present in a good sanitary condition and free from any infectious disease.

NEWRY; *Mountnorris.* — Epidemic measles occurred of mild type, and one case of diphtheria.

NEWRY; *Mullaghglass.* — District healthy; no zymotic diseases.

NEWRY; *Poyntz Pass.* — Four deaths were registered from both measles and pertussis together, congestive pneumonia supervening.

Belfast County Borough.

BELFAST; *Belfast Urban, No. 3.* — There were 11 deaths registered from epidemic cerebro-spinal meningitis, and 2 from epidemic cerebro-spinal fever, during the quarter; particulars of these have already been furnished in weekly returns.

BELFAST; *Belfast Urban, No. 4, W.* — 22 deaths from cerebro-spinal fever.

BELFAST; *Belfast Urban, No. 11.* — There have been 16 deaths registered in the district during the quarter from cerebro-spinal fever, and 6 from cerebro-spinal meningitis.

BELFAST; *Belfast Urban, No. 13.* — Eight deaths from cerebro-spinal fever registered during the quarter.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.* — District in a healthy condition.

BAILIEBOROUGH; Termon.—The public health of this district is good; no epidemic disease. Two cases of pulmonary tuberculosis registered during the quarter. It is a great loss medical officers have no laboratory to send to at the public expense the sputum of suspected cases.

CAVAN; Cavan, W.—One death has been registered as from cerebro-spinal fever.

CAVAN; Killashandra.—An epidemic of influenza with bronchitis prevailed during the quarter. Sanitary state of the district improved.

COOTEHILL; Tullyvin.—District healthy and free from contagious disease.

ENNISKILLEN; Holywell, No. 2.—The sanitary condition of the district is fairly good. Pulmonary tuberculosis is on the increase; four of the eleven deaths registered were due to that disease. Five cases of enteric fever occurred during the quarter: the patients were all removed to hospital. I believe the outbreak was caused by the wet season, surface water having access to wells. There was one case of diphtheria, patient recovered.

OLDCASTLE; Ballyjamesduff—District healthy.

OLDCASTLE; Virginia.—District healthy and free from zymotic disease.

Donegal County.

BALLYSHANNON; Ballintra.—Water supply still continues bad, but sanitary arrangements otherwise fairly good.

DONEGAL; Donegal, W.—District healthy.

DONEGAL; Dunkineely.—District at present healthy. A few cases of scarlatina occurred during quarter, but the disease did not spread. Climatic conditions unfavourable, especially in June, with heavy rains, hail, wind, and low temperature.

DONEGAL; Mountcharles.—District fairly healthy; no epidemic.

DONEGAL; Pettigoe.—Whooping cough has been prevalent during the quarter. Water supply very defective.

DUNFANAGHY; Crossroads.—District has been free from any epidemics of any kind during the quarter. Most of the deaths registered were considerably over 60 years, and are uncertified as a medical attendant is very rarely called upon to attend the aged sick.

DUNFANAGHY; Dunfanaghy, W.—There was a decline in number of cases of lobar pneumonia from previous quarter, but it is still prevalent. There was one death from epidemic cerebro-spinal meningitis, an infant of 3 months; the other two cases, aged respectively 5 years and 2½ years, recovered. They were sent here from Crossroads district.

DUNFANAGHY; Tory Island.—No vaccination during quarter.

GLENTIES; Ardara.—Vaccinations below the average this quarter on account of the very inclement weather.

GLENTIES; Carrick.—The district is fairly healthy; there has been no epidemic during the quarter.

GLENTIES; Doochary.—District healthy.

GLENTIES; Glenties, W.—The water supply for domestic purposes is very defective in one village; proper wells should be sunk and pumps erected over them. The drainage of the village is defective.

GLENTIES; Killybegs.—No outbreak of infectious disease during quarter.

INISHOWEN; Buncrana.—District healthy.

INISHOWEN; Carndonagh, W.—District fairly healthy. A few cases of influenza and one of "enteric" came under observation. The death of a centenarian was registered during quarter.

INISHOWEN; Clonmany.—District healthy.

INISHOWEN; Malin.—District healthy.

INISHOWEN; Moville.—District healthy at present. During the quarter four cases of cerebro-spinal fever occurred in one family; two children recovered and two died; no further cases.

LETTERKENNY; Church Hill.—District healthy; no epidemic.

LETTERKENNY; Manorcunningham.—The sanitary arrangements in the district are fairly good; no zymotic disease of any kind in the district for a considerable length of time.

MILLFORD; Fanad.—District healthy, except for slight outbreak of measles which is of a mild type.

MILLFORD; Rosguill.—The district is free from any kind of infectious diseases, except tuberculosis. There have been no cases of enteric or typhus nor any outbreak of the eruptive fevers during the quarter ended 30th June, 1907. The district is congested, and sanitation is in a backward condition, but there are signs of improvement, which of course must be very gradual from the circumstances of the people.

STRABANE; Raphoe.—No infectious disease in district during quarter. Sanitary arrangements satisfactory.

STRANORLAR; Cloghan.—Sanitary arrangements satisfactory.

STRANORLAR; Killygordon.—One schoolhouse in an insanitary situation still remains as the great destroyer of the health of the children. "Sanitary works" melancholy slow.

Down County.

BANBRIDGE ; Ballyward. — District in a healthy state. No epidemic. Three cases of diphtheria; school closed where outbreak occurred.

BANBRIDGE ; Crossgar. — Two fatal cases of epidemic cerebro-spinal meningitis in the early part of the quarter. Both were in the same family.

BANBRIDGE ; Loughbrickland. — The sanitary arrangements in the district are fairly good. There was an epidemic of diarrhoea in Scarva village and surrounding district.

BELFAST ; Castlereagh, No 1. — One death from cerebro-spinal fever registered during the quarter.

DOWNPATRICK ; Ballynahinch. — There has not been any epidemic disease in the district during the quarter

DOWNPATRICK ; Killyleagh. — The public health is excellent; no epidemics. I have registered one death from cerebro-spinal meningitis, but I am glad to say that no cases of this disease have come under my own observation. The water supply of one village needs improvement.

DOWNPATRICK ; Portaferry. — There was no case of infectious disease during the quarter. Sanitation and health good. Vaccination very well attended to.

KILKEEL ; Kilkeel, No. 2, W. — Sanitary condition of district good. A few cases of epidemic gastro enteritis.

LISBURN ; Ballylesson. — Cerebro-spinal fever has occasioned 79 deaths in Purdysburn Fever Hospital during the quarter, but no other cases in the district have been registered.

LISBURN ; Drumbeg. — Births and deaths above the average. Almost one-third number of deaths due to tubercle. Two deaths due to cancer, one epithelioma of lip, and the other cancer of thyroid gland; no epidemic disease.

LISBURN ; Saintfield. — The health of the district has been good. Had one case of diphtheria and one of typhoid fever.

LURGAN ; Moira. — The birth-rate has again risen this quarter, and the death-rate is down to normal. The health of the district is very fair. Five deaths from tuberculosis, and two from influenza. Vaccination very well carried out this quarter. No death from cancer.

LURGAN ; Waringstown. — District healthy. Mumps has been prevalent in the village of Waringstown. There have been two cases of scarlet fever, but they were isolated, and the disease has not spread.

NEWRY ; Donaghmore. — Sanitary arrangements fair. District very healthy.

NEWRY ; Rathfriland. — The sanitary condition of the district is good.

NEWTOWNARDS ; Bangor. — Sanitary arrangements good. No deaths from infectious disease. District very healthy. Vaccination well attended to.

NEWTOWNARDS ; Comber. — There were a good number of cases of chicken pox of a very mild type, and now a few cases of measles, some accompanied, or rather preceded, by pneumonia, and three deaths; otherwise district is in a healthy state.

NEWTOWNARDS ; Greyabbey. — Births and deaths about average, but in deaths an unusual disproportion — an excess of females; of the 28 deaths recorded, 21 were females. No epidemic in the district. One death from enteric fever recorded, origin unknown. One case of death from cerebro-spinal fever in a visitor from Belfast.

NEWTOWNARDS ; Newtownards, W. — The health of the district has been particularly good, and we have practically been free from infectious disease. We are looking forward to our new water supply and also to our new system of sewers. When we have got these, and also a few other sanitary matters attended to, I feel sure that the health of the district will be permanently improved.

Fermanagh County.

BALLYSHANNON ; Church Hill. — District healthy.

CLONES ; Rosslea. — Public health good during the quarter.

ENNISKILLEN ; Enniskillen, W. — Sanitation fairly good.

ENNISKILLEN ; Florencecourt. — Two cases of smallpox occurred in the district during the last month of the quarter — father and son. Both were removed at once to the union fever hospital, where they are progressing favourably towards recovery. The premises were thoroughly sprayed with crude carbolic acid, 1 in 8, and lime-washed. The bedding and clothes which were in contact with the patients were burned under my personal supervision. He leaves a wife and two children, one 8 years and the other 5, at home, who have been re-vaccinated and are free from the disease as yet. The man who took the disease first states he caught the infection in Belturbet on the 5th June. He took ill on the 17th and rash appeared on 20th. I know of cases of the kind in one of the neighbouring dispensary districts.

ENNISKILLEN ; Holywell, No. 1. — The sanitary condition of the district as a whole is fairly good. Two cases of enteric fever occurred in one family. The patients were removed to hospital. There was one case of diphtheria treated by serum; patient recovered.

IRVINESTOWN ; Clonelly. — District healthy.

IRVINESTOWN ; Ederney. — Deaths registered at 88, 87, 86 (two), 85, 80, 78, 77, and 75 (two) years of age respectively. One case of diphtheria registered.

IRVINESTOWN ; Irvinestown, W. — District healthy. One case of enteric fever admitted to fever hospital.

LISNASKEA ; Derrylin. — The general condition of the district remains as before.

LISNASKEA ; Lisnaskea, W. — Sanitary state of district fair. No death from infectious disease with the exception of one from whooping-cough, which was very prevalent during quarter.

Londonderry County and County Borough.

COLERAINE ; Aghadowey. — District healthy. No vaccinations, as I was away on my holiday, and double returns will come in next quarter.

COLERAINE ; Garvagh. — No epidemic during quarter. Health of district at present good.

COLERAINE ; Kibrea. — District healthy. Three-fifths of the total number of deaths registered during the quarter were of persons aged 60 years and upwards. One death at the age of 101 years, which is presumably correct as the date of birth was recorded in an old family Bible.

COLERAINE ; Portstewart. — The district is in a very satisfactory state as regards health. The birth-rate is exactly double the death-rate for the quarter just ended. There has been no epidemic disease prevalent. One case of "scarlet fever," imported from a neighbouring district, was reported by me on the 25th of June.

LIMAVADY ; Ballykelly. — Four of the deaths were caused by cancer—two in stomach and 2 in and around œsophagus. The cases occurred in widely separated parts of district and without family history of that disease, and at ages of 80, 77, 65, and 42 years. This is an unusually large number for quarter and in proportion to number of deaths.

LIMAVADY ; Bellarena. — District healthy.

LIMAVADY ; Dungiven. — Sanitary arrangements satisfactory. Births above the average ; deaths about average. One death from carcinoma uteri—no evidence of heredity could be traced ; three young girls died from tubercular disease, aged respectively 6, 10, and 15 years—no evidence of heredity could be traced in either case.

Vaccination statistics below the average owing to the recent inclemency of the weather. A rather severe form of gastro enteritis has prevailed throughout district generally during the last month resembling mild cases of cholera, attended in some cases with severe pyrexia, and prostrating whole families.

LIMAVADY ; Limavady, W. — The health of the district has been fair generally during quarter.

LONDONDERRY ; Eglinton. — No family history of cancer in death registered.

MAGHERAFELT ; Moneymore. — District was free from epidemic disease for first two months of quarter. About the middle of June two cases of scarlatina occurred in one family, cause not known ; kept isolated ; disease not spreading. On 28th June 3 cases of typhoid fever appeared in a private family, traceable to impure water supply. They are properly isolated, and I do not expect any extension of the disease.

Monaghan County.

CARRICKMACROSS ; Carrickmacross, W. — District in fair sanitary condition. The ages of 12 people who died during quarter ranged from 75 to 95 years.

CARRICKMACROSS ; Donaghmoynce. — An infectious form of tonsillitis has appeared in the district in three families, probably due to the damp weather.

CASTLEBLAYNEY ; Ballybay. — An outbreak of diphtheria occurred in June ; measures taken to prevent the spread of the disease have been successful.

COOTEHILL ; Dawsongrove. — The sanitary condition of the district is fairly good.

MONAGHAN ; Castleshane. — District sanitary. I have had a considerable number of cases of pneumonia.

MONAGHAN ; Emrysale. — Public health and sanitary arrangements very fair.

MONAGHAN ; Kilmore. — District healthy.

MONAGHAN ; Monaghan, W. — The sanitary condition of the district is satisfactory. There has been no epidemic of any description during the quarter, and there are no circumstances affecting the public health or vaccination requiring special notice.

MONAGHAN ; Scotstown. — The sanitary condition of the district is fairly satisfactory.

Tyrone County.

CASTLEBERG ; Castlederg, W. — Sanitary state of district satisfactory ; no epidemic of any kind ; but regret to say tubercular consumption still on the increase, and hard to convince the people of the infectious nature of the disease.

CASTLEBERG; Drumquin.—The sanitary state of the district is satisfactory, with no infectious diseases of any sort.

CASTLEBERG; Killeter.—State of district healthy; one death registered of an old man, aged 105 years.

CLOGHER; Aughnacloy.—Health of district generally satisfactory.

CLOGHER; Fivemiletown.—The health of the district was pretty good during the quarter.

COOKSTOWN; Cookstown, W.—The district is very healthy.

COOKSTOWN; Pomeroy.—District sanitary and healthy.

COOKSTOWN; Stewartstown.—There was an outbreak of scarlatina during the quarter, but I am happy to state no one died from it. Out of the 20 deaths registered, 12 were between 60 and 96 years; two over 95, two over 80, two over 75 years. District at present healthy. The weather has been bitterly cold.

DUNGANNON; Benburb.—Sanitary condition of district good.

DUNGANNON; Caledon and Ballymagran.—District healthy; free from any epidemic or zymotic disease.

DUNGANNON; Clonavaddy.—Sanitary arrangements good.

DUNGANNON; Coal Island.—One case of scarlatina, which was isolated and other precautions taken which hindered spread of disease. Mumps has been very prevalent both among children and adults during quarter. No deaths from cancer.

IRVINESTOWN; Trillick.—There were three deaths from cancer and three from tubercular disease.

OMAGH; Dromore.—Two deaths from cancer and two from phthisis during the quarter. The sanitary arrangements in the district are satisfactory.

OMAGH; Drumquin.—The sanitary arrangements in the district are very satisfactory. None of the diseases named in the Abstracts are at present prevalent.

OMAGH; Fintona.—The health of the district has, in general, been good during the past quarter and free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; Omagh, No. 1, W.—Health of district satisfactory. Sanitary condition—Urban improved, Rural same as already reported. One case of cerebro-spinal meningitis (epidemic) from Belfast notified in rural district, ended fatally. Notwithstanding the unusual severity of the weather there has been no increase of sickness.

OMAGH; Omagh, No. 2.—This district has been exceedingly healthy for the past three months; no epidemic of any kind. The birth rate is again up to the average.

OMAGH; Sixmilecross.—The district is in a very good sanitary condition at present and free from any infectious disease.

STRABANE; Newtownstewart.—Of the three uncertified deaths, two were the deaths of adults in a position to pay for medical attendance, whilst the third was that of a labourer's child, who died so suddenly that there was not time to procure the services of the dispensary doctor on a visiting ticket, which would have been done had time permitted. The proportion of deaths uncertified among those who receive free poor law medical relief is 10 per cent., and among those in a position to pay for medical attendance, 28½ per cent.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; Laurencetown.—One death from cancer of the stomach.

CLIFDEN; Roundstone, No. 1.—District healthy.

GALWAY; Galway, No. 3 (Arran).—Health of district very good.

GALWAY; Moycullen.—Sanitary condition of district good.

GALWAY; Oranmore.—The district during last quarter has been remarkably healthy.

GALWAY; Spiddle.—Health of district good during quarter.

GLENNAMADDY; Glennamaddy, W.—The district has been free from epidemic diseases during the quarter, and many more primary vaccinations have been performed than in previous quarters.

GORT; Gort, W.—Two cases of scarlatina of a very mild type occurred in a family in the district during quarter. They were removed to hospital.

GORT; Kinvarra.—Owing to the severe weather there has been an unduly large number of pulmonary and bronchial affections for a summer quarter.

LOUGHREA; Athenry.—The sanitary condition of the district is fairly good.

LOUGHREA; Bullaun.—The death of a woman, aged 96 years, was registered.

LOUGHREA; Woodford.—There was one case of severe biting by a dog not rabid, but the injuries healed up all right.

OUGHTERARD; Cloonbur, No. 1.—Health of district good. No epidemic disease prevalent. One death from cancer of rectum was registered.

OUGHTERARD; Cloonbur, No. 2.—Sanitary arrangements fair.

OUGHTERARD; Oughterard, W.—No deaths from cancer.

PORTUMNA; Portumna, No. 1, W.—The unseasonable weather experienced for some time has not caused much sickness. The sanitary condition of the district, with the exception of one place, is very good.

TUAM; Tuam No. 1, W.—Health of district fairly good during the past quarter.

TUAM; Tuam, No. 2.—District healthy. No epidemic disease.

Leitrim County.

BAWNBOY; Ballinamore.—Sanitary condition of district good.

CARRICK-ON-SHANNON; Jamestown, W.—Influenza prevalent.

MANORHAMILTON; Drumahaire.—The house-to-house visitation by the sub-sanitary officer, the general cleaning and limewashing during the recent scare, and the disinfection of infected houses and premises according to directions given by the Local Government Board's Inspector, have left this district, which is now free from zymotic disease, in good sanitary condition. Provision has also been made at the local creamery for pasteurisation of the new milk at the temperature recommended by him in his report. The sewerage of the village is still bad, but will shortly receive attention.

MOHILL; Carrigallen.—The sanitary state of the district is fairly good. The public health has also been good during the quarter. Only the ordinary diseases arising from weather conditions, &c., prevailed. No epidemic.

MOHILL; Mohill, W.—My district is in a fairly healthy condition at present.

MOHILL; Rinn.—The district is healthy and free from epidemic disease.

MOHILL; Rowan.—Sanitary condition of district good.

Mayo County.

BALLINA; Crossmolina.—Vaccination is very backward in this district.

BALLINROBE; Cappaghduff.—District healthy. Houses in most of villages require whitewashing.

BALLINROBE; Cong.—An epidemic of influenza prevailed during the quarter, accompanied by diarrhoea, and, in some cases pneumonia, but only one death has occurred, that of an elderly person.

BALLINROBE; Hollymount.—Births under and deaths over the average. Influenza prevalent, with lung trouble following it. Throat and catarrhal affections amongst children very prevalent.

BELMULLET; Bangor.—Health of district good during quarter. There has been, indeed, very little disease of any kind. Two deaths from diphtheria.

BELMULLET; Binghamstown, W.—District in a satisfactory state.

BELMULLET; Knocknalower.—Sanitary condition of district fairly good. Health of people good. Vaccination backward.

CASTLEBAR; Balla.—District healthy. Vaccination has considerably improved during the quarter.

CASTLEBAR; Castlebar, No. 1, W.—General health of district good.

CLAREMORRIS; Ballindine.—One death at 107 years. District free from infectious disease.

CLAREMORRIS; Ballyhaunis.—Bronchial affections wrought considerable havoc amongst the aged and feeble. In other respects health of district has been good; no zymotics. Eight of the deaths registered ranged between 80 and 96 years. A very conspicuous and progressive improvement has taken and is taking place in the sanitation and general condition of the dwellings of the peasantry hereabouts.

KILLALEA; Killalea, W.—The weather was cold and very wet during the quarter, and no children were brought in for vaccination. The health of the district has been very good.

SWINEFORD; Kiltamagh.—Pulmonary tuberculosis rife; almost all cases can be traced to foreign origin, either England or America, where our young men, through overwork in pits and tunnels and through insufficient nourishment, contract disease and come home "to be cured."

WESTPORT; Achill.—General health and sanitary state of district good. Children presented more regularly than formerly for vaccination.

WESTPORT; Ballycroy.—The extremely inclement weather for past month interfered very much with vaccination. A few cases of diphtheria of a mild type during quarter. Tuberculosis appears to be on the increase.

WESTPORT; Bundorragha.—Sanitary arrangements fair.

WESTPORT; *Louisburgh*. — Sanitary arrangements of district during last quarter very good.

WESTPORT; *Newport*. — Very bad weather; some scattered cases of scarlatina.

Roscommon County.

ATHLONE; *Brideswell*. — Epidemic of diarrhoea, but no deaths from same. Health of district very satisfactory.

ATHLONE; *Kiltoom*. — Eight of the deaths registered occurred in previous quarters.

BOYLE; *Ballyfarnan, No. 1*. — Influenza prevalent; district otherwise healthy.

BOYLE; *Boyle, No. 1, W*. — No epidemic. District healthy.

BOYLE; *Keadew*. — Sanitary arrangements fair.

CARRICK-ON-SHANNON; *Aughrim*. — The district has been absolutely free from all forms of infectious disease during the quarter, and its sanitary condition is good.

CASTLEREAGH; *Castlereagh, W*. — Whooping cough prevails through district.

STROKESTOWN; *Roosky*. — Of the deaths registered, 17 were of persons aged 60 years and upwards, one of whom was aged 86 years, one 85, two 84 years each, two 83 years each, one 80 years, one 79 years, one 78 years, one 76 years, one 73 years, one 72 years, and two 70 years each. There were five deaths registered during the quarter from tuberculous disease, and there were two deaths from cancer.

Sligo County.

BOYLE; *Ballyfarnan, No. 2*. — Influenza prevalent. District otherwise healthy.

BOYLE; *Gurteen*. — District healthy. Vaccination progressing.

DROMORE WEST; *Easky, W*. — Four deaths at 90 years of age and upwards were registered during quarter. Health of district good. Vaccination backward on account of the inclement weather. Now that the weather looks fine vaccination laws should be enforced.

SLIGO; *Ballymote*. — District is in a healthy condition, and is free from all epidemics.

SLIGO; *Carney, No. 1*. — Vaccination was well availed of during the quarter. The district is healthy, and the rising generation seem more anxious to encourage domestic and personal hygiene than their forefathers. The past month was the coldest and wettest on record.

SLIGO; *Riverstown*. — District healthy.

SLIGO, *Sligo No. 1, W*. — Of the 18 deaths from tuberculous disease, 11 took place in asylum, and 3 in workhouse.

TOBERCURREY; *Aclare*. — The health of the district continues exceedingly good.

TOBERCURREY; *Coolaney*. — Sanitary arrangements satisfactory. I have registered three male deaths during past quarter at the remarkable ages of 90, 94, and 98 years respectively.

TOBERCURREY; *Tobercurry, W*. — The district is free from contagious or infectious disease, and is in a good sanitary condition, with the exception of some portions of the town of Tobercurry.

Marriages:—APR., MAY, JUNE, 1907. **Births & Deaths:—**JULY, AUG., SEP., 1907

During the quarter ended 30th September last, there were registered in the 827 Registrars' Districts in Ireland 24,923 births—a number equal to an annual birth-rate of 22·8 in every 1,000 of the estimated population*—and 15,528 deaths, representing an annual rate of 14·2 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 10,102 persons emigrated.

In England last quarter, the birth-rate represented was 26·3 in every 1,000 of the estimated population, and the death-rate 12·2 per 1,000.

The birth-rate in Ireland for the quarter is 0·2 below the average rate for the corresponding quarter of the ten years 1897–1906, and 0·4 below the rate for the third quarter of 1906. The deaths are 270 below those registered in the corresponding quarter of 1906; the death-rate is 0·2 below the rate for that quarter, and 0·7 below the average for the third quarter of the ten years 1897–1906.

Compared with those for the corresponding quarter of 1906, the returns of pauperism, furnished by the Local Government Board, show a decrease of 12 in the average number of Workhouse inmates on

* See page 280,

Saturdays during the quarter, and a decrease of 29 in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years 1897-1906, the number of Workhouse inmates shows an increase of 704, but the number of persons on out-door relief a decrease of 759,* the total under both heads being 0·1 per cent. below the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·6 per cent.

The annual marriage-rate (5·0 per 1,000 of the population) represented by the marriages registered during the second quarter of 1907 is 0·4 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,† represented by the number of Marriages registered during the Quarter ended 30th June, 1907, and by the Births and Deaths registered in the Quarter ended 30th September, 1907.

* Not taking into account 2,048 persons relieved by means of works devised for the relief of distress in the September Quarter, 1905. See Table VII.

† The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 219.

MARRIAGES.

The marriages (5,424) registered in Ireland during the second quarter of 1907 are equivalent to an annual rate of 5·0 per 1,000 of the estimated population, being 0·4 above the rate for the corresponding quarter of 1906, and also 0·4 above the average rate for the second quarter of the ten years 1897–1906. Of the total number of marriages 3,789 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,635 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·7 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·8 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·5 above the average rate for the corresponding quarter of the previous ten years, but that under the latter shows a decrease of 0·3.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by Quarterly Periods the Marriages registered in Ireland in each of the ten years 1897–1906, and the average number for that period; also the number registered in the first and second quarters of 1907.

BIRTHS.

The number of births registered during the quarter ended 30th September last was 24,923—12,739 boys and 12,184 girls—being equal to an annual ratio of 1 in every 43·9, or 22·8 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1897–1906 was 25,543, equivalent to an annual rate of 23·0 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23·3 per 1,000 of the population according to the Census of 1901; Munster, 21·3; Ulster, 23·8; and Connaught, 18·7.

The highest county or county borough birth-rate* is 32·0 for Dublin county borough, and the lowest 16·1 for Longford county. Of the intermediate rates the highest five are—Belfast county borough, 30·4; Kildare, 25·4; Limerick, 23·8; Londonderry county and county borough, 23·3; and Down, 23·1. The lowest five are—Roscommon, 16·2; Leitrim, 16·6; Fermanagh, 17·6; Queen's, 17·8; and Cavan, 17·8.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 15,528—7,804 males and 7,724 females—affording an annual ratio of 1 in every 70·5, or 14·2 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1897–1906 was 14·9 per 1,000.

The death-rate in Leinster was 15·7 per 1,000 of the population according to the Census of 1901; in Munster, 12·4; in Ulster, 14·9; and in Connaught, 11·1.

The county or county borough death-rates* range from 10·1 in Roscommon, to 20·8 in Dublin county borough. Between these rates the lowest five are—Kerry, 10·4; Galway, 10·7; Tipperary, N.R., 10·7; King's, 10·8; and Clare, 10·9; and the highest five are—Armagh, 17·0; Carlow, 16·2; Belfast county borough, 16·0; Monaghan, 15·1; and Londonderry county and county borough, 14·7.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1897–1906, and the average number for that period; also the number registered during the first, second, and third quarters of the year 1907:—

YEAR.	Births.					Deaths.

* See note (†) on page 198.

Ages.—Of the 15,528 deaths registered last quarter 1,872, or 12·1 per cent., were of children under 1 year old; and 6,547, or 42·2 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 75·1 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 14·1 per cent. of the total deaths registered therein; in Munster, 12·0 per cent.; in Ulster, 11·7 per cent.; and in Connaught, 8·4 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 38·2 per cent.; in Munster, to 42·2 per cent.; in Ulster, to 42·0 per cent.; and in Connaught, to 52·7 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 727, or 595 less than the number registered in the corresponding quarter of 1906, and is equivalent to an annual rate of 0·7 per 1,000 living, being 0·5 below the rate for the third quarter of 1906, and 0·6 below the average rate for the third quarter of the ten years 1897–1906.

The following tabular statement shows the mortality from each of the principal epidemic diseases, as registered during the September quarter of 1907, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years 1902–1906.

Name of Disease.	Number of Deaths in September quarter, 1907.	Average number of Deaths in September quarter of the 5 years, 1902–1906.
Small-pox,	—	2
Measles,	111	128
Scarlet Fever,	20	33
Typhus,	18	18
Whooping-cough,	128	191
Diphtheria,	44	60
Pyrexia (origin uncertain),	10	15
Enteric Fever,	71	115
Diarrhoeal Diseases,	325	590

Small-pox.—From the report of the Registrar of Maynooth it appears that one case of small-pox occurred in Leixlip, and was under treatment in Celbridge Fever Hospital at the close of the quarter. There was, however, no fatality from the disease registered during the period now under notice. One death was registered in the June quarter of the present year; no other death from small-pox was registered in Ireland since the December quarter of 1905, when two deaths were registered.

Measles.—The deaths from measles, which had risen from 80 in the December quarter of 1906 to 90 in the March quarter of 1907, and had further risen to 128 in the June quarter of the present year, declined to 111, corresponding to an annual rate of 0·10 per 1,000 of the estimated population of Ireland, in the quarterly period now the subject of review. This number is below the average (128 deaths) for the corresponding period of the 5 years 1902–1906. Of the total deaths from measles there were 27 in the county of Dublin, 18 in Dublin county borough, and 40 in Belfast county borough.

* See Note (†) on page 207.

Scarlet Fever.—The mortality from scarlet fever, which in the 3 preceding quarters had been 39, 34 and 23 respectively, declined to 20 deaths in the September quarter of the present year, being 13 under the average for the corresponding quarterly period of the preceding 5 years.

Typhus.—In each of the 3 quarters preceding, the deaths from typhus in the whole of Ireland numbered 18, 13, and 15; in the period under notice this disease caused 18 deaths, which number is identical with the average for the corresponding period of the past 5 years. The unions in which these deaths occurred were as follows:—In Baltinglass, 1 death; in South Dublin, 3 deaths; in New Ross, 1 death; in Kilrush, 1 death; in Cork, 4 deaths; in Skull, 1 death; in Cahersiveen, 2 deaths; in Lismore, 1 death; in Galway, 1 death; in Loughrea, 1 death; in Ballina, 1 death; and in Killala, 1 death.

Whooping-cough.—The death-rate caused by whooping-cough during the quarter was 0·12 per 1,000 of the estimated population of Ireland; the deaths were 128 in number and exceeded those caused by any of the principal epidemic diseases, with the exception of diarrhoeal diseases; however, the total for the quarter is lower than any of the totals for the 3 preceding quarters, which were 164, 236, and 243, respectively, and it is also below the average (191) for the corresponding quarter of the 5 years 1902–6. Of the deaths, 31, or about 24 per cent., occurred in the county borough of Dublin, 12 in the county of Dublin, and 11 in the county borough of Belfast.

Diphtheria.—The mortality from diphtheria, which was represented by 92 deaths in the December quarter of 1906, declined to 67 in the March quarter of 1907, and to 65 deaths in the June quarter, and further declined to 44 deaths in the September quarter now under review. The deaths also compare favourably with the average (60) for the corresponding quarterly period in the 5 years 1902–6. Of the 44 deaths, 10 were registered in Dublin county borough, 8 in Belfast county borough, 3 in Cork union, 3 in Castleblayney union; and 2 deaths in each of the unions of Bawnboy, Galway, Lisburn and Newry.

Enteric Fever.—The deaths from enteric fever, in number 71, are less by 4 than the comparatively low number registered in the preceding quarter, to which it had declined from 101 deaths in the March quarter of the present year and from 91 in the December quarter of the year 1906. The deaths for the quarter are well below the average (115) for the September quarter of the past 5 years; of the deaths, 13 were registered in Belfast county borough, and 9 were registered in Dublin county borough.

The Registrar of Thurles district reports an outbreak of enteric fever in his district, 17 cases having occurred in the urban district at the end of the quarter; and the Registrar of Manorhamilton states that enteric fever has been very prevalent in one portion of his district.

The deaths of 10 persons were attributed to pyrexia (origin uncertain); this condition was formerly described as simple, continued, or ill-defined fever.

Diarrhoeal Diseases.—Although the deaths from diarrhoeal diseases outnumber those from any other of the principal epidemic diseases, yet

when compared with the corresponding figures for the September quarter of the years 1904, 1905, and 1906—namely, 607, 730, and 835, and also the average (590) for the corresponding quarter of the 5 years, 1902–6, the total (325) for the period under review exhibits a marked decrease. When expressed in rates, it appears that in the September quarter of 1904, the annual death-rate for diarrhœal diseases per 1,000 of the population was 0·55; in 1905, 0·66; in 1906, 0·76; in 1907, 0·30, and that the average rate calculated on the mean of the estimated population for the 5 years 1902–6 was 0·54 per 1,000. One explanation of the reduced rate for diarrhœal diseases during the period under notice may be due to an improvement in the sanitary conditions of the urban areas; it is also maintained by many authorities that the seasonal conditions explain the diarrhœal death-rate in support of the view held by Dr. Ballard, namely, that when the earth temperature at 4 feet rises to about 56° an increase in the diarrhœal deaths occurs. In this connection a reference to Table IX. of the Quarterly Return for September, 1906, may be of interest. This table shows that in Dublin the mean of the earth temperature at 4 feet depth in July, 1906, was 56·5°, in August it was 58·4°, in September it was 58·0°, and that the mean for the quarter was 57·6°. During that period 241 deaths from diarrhœal diseases were registered in the county borough of Dublin; on turning to the corresponding table on page 216 of this Report, it may be seen that in July, 1907, the mean earth temperature at 4 feet depth was 55·7°, in August it was 57·3°, and in September it was 56·3°, the mean for the quarter being 56·4°; during this period but 69 deaths from diarrhœal diseases were registered in the county borough of Dublin. The following statement shows for Ireland the number of deaths registered from diarrhœal diseases, the mean air temperature, the mean earth temperature at 4 feet, the average number of hours of bright sunshine observed, and the average rainfall during the September quarter of 1907, as compared with the corresponding quarter in the 3 years, 1904–6 (see Table IX., Quarterly Returns):—

—	September Quarter of Year.	No. of Deaths from Diarrhœal Diseases.	Mean Air Temperature.	Mean Earth Temperature at 4 feet.	Bright Sunshine. No. of hours observed.	Rainfall in inches.
Ireland,	1904	607	57·3°	56·8°	464	11·71
	1905	730	57·3°	57·3°	392	9·39
	1906	835	58·4°	57·4°	486	7·25
	1907	325	57·5°	56·4°	414	7·85

A reference to the abstract on 218 and following pages in this Report shows that 69 deaths were registered in Dublin county borough, 53 in Belfast county borough, 18 in the county borough of Cork, and 11 in Waterford county borough.

Tuberculous Disease.—The total number of deaths returned by the Registrars of Deaths in Ireland from all forms of tuberculous disease was 2,451, which figure is equal to an annual death-rate of 2·24 per 1,000 of the population of Ireland, estimated to the middle of the year 1907. The corresponding rates in the three preceding quarterly periods were 2·21, 2·76, and 2·97 per 1,000 of the estimated population. The deaths from tuberculous disease amounted to 15·8 per cent. of the

total deaths from all causes registered during the quarter. The details regarding the incidence of the mortality may be studied in the Abstracts commencing on page 218. Among other figures it will be seen that 331 deaths were registered in the county borough of Dublin, 282 in the county borough of Belfast, 262 in the county and the county borough of Cork, 124 in the county of Antrim, and 116 in the county of Down. Amongst the observations of the Registrars bearing on tuberculous disease, and furnished with their quarterly numerical returns, the following abstracted from the notes of the Registrars of Killeen district, in Dunshaughlin union, and Castlereagh district, in Castlereagh union, contain suggestions which are worthy of careful consideration. The former suggests that the disease "should be made a notifiable disease, and that cabins with mud floors and walls, as well as old straw roofs, where tuberculosis has been known to be existent, should be burnt to the ground, thus ensuring the obliteration of certain foci. The elements of hygiene and sanitation should be taught in every elementary school with particular stress on fresh air in bedrooms." The Registrar of Deaths of Castlereagh writes as follows:—"Tuberculosis in its various forms largely afflicts the people. While there is much made about the existence of this fell disease, various appeals for the building of sanatoria, &c., &c., there is nothing done to cope with it where it is developed—the homes of the people. It should be treated as a preventative disease—by close attention to sanitation—compulsorily obliging the people to provide proper sleeping accommodation for their families, and not have them huddled six and eight together in one small bedroom, oftentimes a consumptive patient in their midst. Small loans at cheap rates should be issued to small tenant farmers to make necessary additions to their houses."

Malignant Diseases.—As returned by the Registrars, the deaths from malignant diseases, including deaths from carcinoma, sarcoma, and cancer, malignant disease (undefined), numbered 728, corresponding to an annual death-rate of 0·67 per 1,000 of the estimated population of Ireland; in each of the three quarterly periods preceding the corresponding rates for deaths from malignant diseases were 0·73, 0·71, and 0·71 per 1,000.

Cerebro-spinal Fever.*—In the notes to their Quarterly Returns the Registrars of the following districts reported with reference to the mortality from cerebro-spinal fever:—In Newcastle District, Rathdrum Union, 1 death; in Doagh, 1 death; in Ballymena, 1 death; in Toome, 2 deaths; in Glenavy, 1 death; in Belfast Urban No. 3, 3 deaths; in Belfast Urban No. 4, 10 deaths; in Belfast Urban No. 11, 7 deaths; in Belfast Urban No. 13, 2 deaths; and the Registrar of Waringstown reports that one death occurred in the Union Hospital.

Hydrophobia, Rabies.—There was no report of mortality from this cause, neither was the existence of the disease mentioned by the Registrars.

* See special tables, A., B., C., and D., contained in Quarterly Summary of the Weekly Returns for 13 weeks ending 28th September, 1907, relating to deaths from cerebro-spinal fever in Belfast.

The Registrars, in their Notes, report the presence of the following diseases :—Small-pox in one district, measles in 16 districts, scarlet fever in 10, whooping-cough in 16, diphtheria in 10, fever in 28—typhus in 2, and enteric in 26—diarrhœal diseases in 12, mumps in 3, and cerebro-spinal fever in 10 districts. [See Appendix to this Report commencing on page 281].

Inquests.—There were 380 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 41 of the total deaths registered.

In Leinster there was 1 inquest to every 32 deaths registered, in Munster 1 to 56, in Ulster 1 to 36, and in Connaught 1 to 89.

Deaths in Public Institutions.—Of the 15,528 deaths registered, 3,292, or 21·2 per cent., occurred in public institutions. In Leinster the percentage was 28·9, in Munster 26·1, in Ulster 15·3, and in Connaught 12·1.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1907, and in each of the eight quarters immediately preceding ; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pyrexia* (origin uncertain).	Enteric Fever.	Diarrhoeal Diseases.

[TABLE V

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 16·9, and the birth-rate 28·5 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 12·7 and the birth-rate 19·7 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·3 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·4 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1907, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES,† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 28th September, 1907.

VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1907, there were 23,975 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th September last, was 10,102 (4,985 males and 5,117 females), being 1,633 more than in the corresponding quarter of the year 1906, and 41 above the average number for the third quarter of the ten years 1897–1906.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September in 1906 and 1907:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1906.	1907.	In-crease.	De-crease.	1906.	1907.	In-crease.	De-crease.	1906.	1907.	In-crease.	De-crease.

* Including 7,715 emigrants to the United States of America, viz.:—1,334 in the month of July, 2,232 in August, and 4,149 in September. Of 7,269 steerage passengers, 2,213 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1906 the average price was $5\frac{1}{2}d.$, and in the corresponding quarter of 1897 it was also $5\frac{1}{2}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 14s. 6d. per cwt., being the same as the average for the corresponding quarter of the year 1906. In the third quarter of 1897 the average price was 13s. 6d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3s. 9d. to 4s. 3d. In the third quarter of 1906 the average prices were 3s. to 3s. 6d., and the prices for the corresponding quarter of 1897 were 2s. 4d. to 3s. 6d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 54s. to 58s. 6d. per cwt. In the corresponding quarter of 1906 the average prices were from 52s. 6d. to 56s., and in the third quarter of 1897 they were from 44s. to 56s.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 21s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £84 $\frac{3}{8}$, and the lowest £80 $\frac{7}{8}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, which had been $4\frac{1}{2}$ per cent., was raised on the 15th August to 5 per cent., at which rate it remained to the end of the quarter.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1907 was 41,789, or 12 under the average for the corresponding period in 1906.

The average weekly number of persons receiving out-door relief during the quarter was 55,779, being 29 under the average for the third quarter of 1906.

Of the persons receiving in-door relief during the third quarter of 1907, an average number of 1,458 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1906 the average weekly number was 1,492.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1907, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the third quarter of the years 1902–1907, respectively.

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 214).

The mean height of the barometer during the third quarter of 1907 was 30·009 inches, being ·037 above the average for the corresponding quarter of the five years 1902–1906; the highest reading (30·497 inches) was on the 11th July, at 9 A.M., wind S.S.W., and the lowest (29·444 inches) on the 3rd July, at 9 P.M., wind S.E.

The mean temperature of the air during the quarter was 57·2°, or 0·4° above the average for the third quarter of the 5 years 1902–1906.

The maximum temperature of the air during the quarter was 79·5° and the minimum 33·4°. The maximum heat in sun was 128·7°, and the minimum on the grass 30·0°.

Rain fell on 48 days during the quarter. The rain-fall measured 5·477 inches, being 2·048 inches below the average for the third quarter of the five years 1902–1906. The greatest monthly rain-fall was in August, when 2·867 inches were registered.

The wind blew on 21 days from S.W., on 19 days from W., on 14 days from S., on 9 days from N.E., on 4 days each from N. and E., and on 2 days from N.W., and the air was calm on 19 days at 9 A.M.

July.—The mean height of the barometer during this month was 30·010 inches; the highest reading (30·497 inches) was on the 11th at 9 A.M., wind S.S.W.; and the lowest (29·444 inches) on the 3rd, at 9 P.M., wind S.E. The mean temperature of the air was 57·5°, the maximum registered was 79·5°, and the minimum 36·9°. The 17th was the warmest day, and the 11th the coldest night. The mean of the dry bulb was 57·5°, and of the wet bulb 53·1°. The maximum heat in sun was 128·7°, and the minimum on the grass 32·2°. The total amount of sunshine recorded was 174·9 hours, the greatest daily amount being 13·3 hours on the 17th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·4. Rain fell on 18 days. The rain-fall measured 2·151 inches; the greatest amount in 24 hours was 0·415 inch on the 9th.

August.—The mean height of the barometer during this month was 29·928 inches; the highest reading (30·390 inches) was on the 21st at 9 P.M., air calm, and the lowest (29·488 inches) on the 4th, at 9 A.M., wind S.S.W. The mean temperature of the air was 58·3°, the maximum registered was 72·3°, and the minimum 35·9°. The 13th was the warmest day, and the 30th the coldest night. The mean of the dry bulb was 56·6°, and of the wet bulb 54·1°. The maximum heat in sun was 128·6°, and the minimum on the grass 32·5°. The total amount of sunshine recorded was 160·7 hours, the greatest daily amount being 10·8 hours on the 10th. The maximum ozone was 0·9, the minimum 0·4, and the mean 0·6. Rain fell on 23 days. The rain-fall measured 2·867 inches; the greatest amount in 24 hours was 0·550 inch on the 29th.

September.—The mean height of the barometer during this month was 30·090 inches; the highest reading (30·464 inches) was on the 18th at 9 A.M., air calm; and the lowest (29·489 inches) on the 2nd, at 9 A.M., wind S.W. The mean temperature of the air was 55·8°; the maximum registered was 74·1°, and the minimum 33·4°. The 10th was the warmest day, and the 4th the coldest night. The mean of the dry bulb was 55·6°, and of the wet bulb 54·2°. The maximum heat in sun was 124·0°, and the minimum on the grass 30·0°. The minimum on the grass was below 32° on 2 nights. The total amount of sunshine recorded was 105·4 hours, the greatest daily amount being 9·8 hours on the 21st. The maximum ozone was 0·6, the minimum 0·0, and the mean 0·4. Rain fell on 7 days. The rain-fall measured 0·459 inch; the greatest amount in 24 hours was 0·200 inch on the 3rd.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Esq, LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 216 and 217), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, sub-urban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind observations at Valencia are based on the records of a standard Robinson anemometer (factor 2.2). Velocities between 13 and 38 miles in the hour have been entered in the Tables as strong winds, velocities of 39 miles in the hour, or above, as gales. At the remaining stations the wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Donaghadee,	Do.
Belfast, Queen's College, . . .	John Wylie, B.A.
Armagh, The Observatory, . . .	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for Bryan Cooper, esq.
Blacksod Point,	Meteorological Office.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	O. Boeddicker, Ph.D., for the Earl of Rosse, K.P.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Waterford,	J. N. White, Esq.

* The Hours of Observation are 9 a.m. and 9 p.m., local time, at all the Stations except Malin Head, Donaghadee, and Blacksod Point, where the observations are at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m.; and where also Greenwich time is used, the observations are based on the morning observations only. They are printed in different type to distinguish them from the averages.

The Averages are based on observations as follows:—Rainfall 35 years, 1871-1905; Temperature 35 years, 1871-1905; Wind 35 years, 1871-1905; Sunshine 35 years, 1871-1905; and the number of observations of Calm, and the number of days of Gale.

† The Sunshine Values for Dublin are obtained at the Mountjoy Observatory in the Phoenix Park, and the

Cloud.	Rain and other forms of Precipitation.					Weather, Number of days of								Wind Force (0-12).	Wind Direction, No. of Observations at 9 a.m. and 9 p.m.*

NOTE.—This table has been constructed for the years 1833 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1907—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1871, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*. — District healthy.

CARLOW; *Bagenalstown*. — District is healthy.

CARLOW; *Clonegall*. — District healthy.

CARLOW; *Leighlinbridge*. — District healthy.

CARLOW; *Tullow*. — District is in a healthy state.

Dublin County.

CELBRIDGE; *Rathcoole*. — District healthy.

DUBLIN NORTH; *Clontarf and Howth No. 1* (part of). — Vaccinations postponed during the first months of the quarter owing to the prevalence of measles.

DUBLIN SOUTH; *Crumlin*. — The district is very healthy and free from any infectious diseases.

DUBLIN SOUTH; *Tallaght*. — There has been no serious illness in the district for the last quarter.

RATHDRUM; *Dundrum and Glencullen No. 1*. — Mumps prevalent in district.

Kildare County.

BALTINGLASS; *Baltinglass No. 2*. — English cholera prevalent during the quarter.

CELBRIDGE; *Celbridge, W.* — District very healthy.

CELBRIDGE; *Kilcock*. — District healthy during the quarter. Some cases of whooping-cough now appearing, though of a very mild type.

CELBRIDGE; *Maynooth*. — One case of small-pox in Leixlip; at present under treatment in Celbridge Fever Hospital.

EDENDERRY; *Carbury*. — Epidemic diarrhoea very prevalent early in quarter.

EDENDERRY; *Rathangan, No. 1*. — A death from cancer of stomach registered, an old lady upwards of 80 years; duration five months.

NAAS; *Ballymore Eustace*. — The district healthy.

NAAS; *Kildare*. — District healthy. Sanitary condition good.

NAAS; *Naas and Carragh, W.* — District very healthy. No prevailing disease existing.

NAAS; *Newbridge*. — District healthy.

Kilkenny County.

CALLAN; *Callan, W.* — No cancer. Two deaths registered during quarter from tuberculous disease. District very healthy.

CALLAN; *Kilmaganny*. — District healthy.

CASTLECOMER; *Ballyragget*. — Sanitary arrangements in the district very good. The diseases named in Abstracts absent, except one case of cancer.

CASTLECOMER; *Castlecomer, W.* — The district is at present free from any epidemic.

KILKENNY; Freshford.—The sewerage of the village is defective and has been reported.

KILKENNY; Tiscoffin.—Sanitary arrangements good, and no difficulty with vaccinations.

KILKENNY; Tullaroan.—Health of district very good.

THOMASTOWN; Inistioge.—District healthy; no case of infectious disease during quarter. Sanitation fairly good.

THOMASTOWN; Knocktopher.—The sanitary arrangements of district are satisfactory. There have been four deaths during last quarter from pulmonary tuberculosis.

URLINGFORD; Balleen.—Health of district and sanitation fairly good.

URLINGFORD; Urlingford, W.—Health of district good, and free from epidemic.

WATERFORD; Ullid.—The health of the district good.

King's County.

BIRR; Kinnitty.—Health of district good. Sanitation fair.

MOUNTMELLICK; Clonygowan, No. 2.—District healthy.

ROSCREA; Roscrea, No. 2.—A number of children over 3 months have not yet been vaccinated, but I expect them in within the next week.

ROSCREA; Shinrone.—Sanitary condition of district satisfactory, only six deaths registered during quarter, four of which were of persons over 60 years.

TULLAMORE; Clara.—There were some cases of measles during quarter, not of a bad type, in district.

TULLAMORE; Killoughy.—District healthy. Two cases of tuberculosis.

TULLAMORE; Philipstown.—District fairly healthy.

TULLAMORE; Tullamore, W.—District healthy during quarter.

Longford County.

BALLYMAHON; Abbeyshrule.—The district fairly healthy. English cholera prevalent in some parts of the district, still not as bad as during the last quarter. One case of phthisis pulmonalis, and two of cancer of stomach.

BALLYMAHON; Ballymahon, W.—The sanitary condition of the district is satisfactory.

GRANARD; Ballinallee.—The district is in good sanitary condition and free from contagious disease.

GRANARD; Granard, W.—The district is in good sanitary condition and free from contagious disease.

Louth County.

ARDEE; Castlebellingham.—District very healthy.

ARDEE; Collon No. 1.—District healthy.

ARDEE; Dunleer.—District healthy.

DROGHEDA; Termonfeckin.—District healthy. No epidemic or infectious disease prevalent.

DUNDALK; Barronstown.—There were a few cases of enteric fever in one townland; patients were removed to Union Fever Hospital. I had samples of water from the "well" and "pump" which supplied these people sent for analysis; result has not been forwarded to me yet. Otherwise district healthy and no recurrence of fever.

DUNDALK; Dromiskin.—District in healthy state.

DUNDALK; Dundalk, W.—The general health of the district has been very satisfactory; no epidemic of disease; case of diphtheria was an isolated one.

Meath County.

ARDEE; Collon, No. 2.—District very healthy.

ARDEE; Drumcondra.—District free from zymotic disease.

DROGHEDA; St. Mary's.—The health of the district is fairly good.

DROGHEDA; Stamullen.—District in a healthy state during quarter.

DUNSHAUGHLIN; Killeen.—Tuberculosis should be made a notifiable disease, and in my opinion all cabins with mud floors and walls as well as old straw roofs where tuberculosis has been known to be existent should be burned to the ground, thus ensuring the obliteration of certain foci. The elements of hygiene and sanitation should be taught in every elementary school with particular stress on fresh air in bedrooms. General health of district good. The sum total of the ages of four out of the five deaths amounted to 283 years.

DUNSHAUGHLIN; Ratoath, W.—The district is in good sanitary condition.

EDENDERRY; Ballyboggan.—One case of diphtheria occurred in district, origin unknown, removed immediately to hospital and recovered; no further spread of disease.

KELLS; Kilskeer.—District healthy.

KELLS; Nobber.—Health of district excellent. Sanitary needs carefully looked after. Average age of the five deaths registered is 76·2 years, a proof of the sound state of the district.

OLDCASTLE; Oldcastle, W.—The district continues in a satisfactory condition, except the town of Oldcastle, which is very much in need of an improved water supply for domestic and sanitary purposes.

TRIM; Athboy.—Sanitary condition of district is satisfactory.

TRIM; Summerhill.—District in tolerably healthy condition. A few cases of whooping-cough lately have been treated. Sanitary condition considerably improved.

Queen's County.

ABBEYLEIX; Ballinakill.—Health of district very good.

ABBEYLEIX; Rathdowney.—Whooping-cough was prevalent in June and July.

MOUNTMELICK; Clonaslee.—Four cases of tubercular disease were registered during the quarter—three of pulmonary tuberculosis, and one of general tuberculosis. Otherwise the district is healthy.

MOUNTMELICK; Clonygowan, No. 1.—District healthy.

ROSCREA; Borris-in-Ossory.—The health of this district has been good during the past quarter.

Westmeath County.

ATHLONE; Athlone No. 1, W.—There were six deaths in the return (four rural and two urban), and the ages were respectively, 86, 86, 85, 84, 84, and 80 years.

ATHLONE; Glassan.—Deaths of old people registered during the quarter, 96, 91, 82, and 80 years, respectively.

MULLINGAR; Ballynacarrigy.—The death rate from tuberculosis of persons registered during the quarter and whose ages were less than sixty amounted to 33 per cent.

MULLINGAR; Castletown Geoghegan.—Sanitary condition good.

MULLINGAR; Killucan.—Health of the district good.

MULLINGAR; Milltown.—During the quarter there were two deaths from cancer of the stomach in old people, and two deaths of children under a year old. The sanitary arrangements in the district, although out of date, are satisfactory. Strange to report, emigration was more in evidence during the last quarter than in

the June quarter, and on instituting inquiries the Medical Officer found the "American Letter" and the "passage money" paid by the friends in America to be the chief factor in the movement. There are a few vaccination defaulters.

MULLINGAR; Mullingar, W.—Health of district fairly good.

Wexford County.

ENNISCORTHY; Newtownbarry.—District healthy.

GOREY; Camolin.—The district is in good sanitary condition. No zymotic diseases attended or registered during the quarter just ended.

NEW ROSS; Fethard No. 2.—District very healthy.

WEXFORD; Bannow.—There was one case of enteric fever (sporadic). The patient recovered. Samples of the water from wells in the neighbourhood were forwarded for analysis. The reports were unfavourable. I forwarded reports and made suggestions to the Sanitary Authority.

Wicklow County.

BALTINGLASS; Baltinglass, No. 1, W.—English cholera prevalent during the quarter.

BALTINGLASS; Killegan.—Health of district normal

NAAS; Blessington.—Whooping-cough was prevalent during the quarter.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—The health of the district is good.

RATHDRUM; Annamoe.—District healthy during the quarter.

RATHDRUM; Newcastle.—One death from cerebro-spinal meningitis ("spotted fever.") Source of contagion unknown. Sanitary condition of part of district very bad. Overcrowding, want of proper drainage and water supply are the principal defects.

RATHDRUM; Wicklow.—Whooping-cough very prevalent and prevented vaccinations.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; Ballyvaghan, W.—District continues to maintain its remarkable immunity from disease.

CORROFIN; Corrofin, W.—Health of district generally good. Out of the 12 deaths registered during the quarter, half was due to tuberculous disease.

ENNIS; Newmarket.—The health of the district has been most satisfactory during the past quarter.

ENNISTIMON; Ennistimon, W.—Sanitary arrangements are satisfactory.

ENNISTIMON; Milltown Malbay.—I think about *forty* vaccination defaulters reported to Guardians. I expect them in at once. District perfectly healthy. Sanitation very fair.

ENNISTIMON; Roadford.—District healthy. Sanitary arrangements satisfactory.

KILLADYSERT; Labasheeda.—Tuberculous disease is very prevalent.

KILRUSH; Carrigaholt.—Health of district very good.

KILRUSH; Craggaknock.—The district has been very healthy during quarter. No epidemic of any kind present.

KILRUSH; Killee.—Sanitary state fair. Whooping-cough of a mild type largely prevailed.

KILRUSH; Kilmihi.—I registered the death of an old man whose age was stated to be 102 years. His son, a very old looking man, was informant.

KILRUSH; Kilrush, W.—District has been healthy.

LIMERICK; Bridgetown.—Measles was epidemic during early part of quarter, but no cases have occurred in the last month.

LIMERICK; Coolacasey.—The district is very healthy, and the sanitary condition is satisfactory.

SCARRIFF; Annacarriga.—District healthy.

SCARRIFF; Feakle.—District healthy.

SCARRIFF; Mountshannon, W.—District very healthy generally.

TULLA; Quin.—Health of district is good and has been during the quarter.

Cork County and County Borough.

BANDON; Inishannon.—My district has been free from infectious disease with the exception of phthisis. There is much difficulty in getting people to keep their yards even fairly clean.

BANTRY; Durrus and Kilcrohane.—District very healthy. Sanitary state of district fairly good. Vaccination forward; children brought in satisfactory for the past month. One death registered from tubercular disease, and one from cancer of breast.

BANTRY; Glengarriff.—Sanitary condition of the district fairly satisfactory. Measles prevalent during the quarter.

BANTRY; Kealkill.—Sanitary condition of district is fairly good. No case of malignant or infectious disease during the quarter. Of the three deaths, one was 73 years, and another 105 years.

CASTLETOWN; Castletown, W.—The district is free from contagious or infectious diseases.

CASTLETOWN; Kilcatherine.—District healthy.

CLONAKILTY; Clonakilty, W.—One death of a man registered who was over 105 years old.

CLONAKILTY; Rosscarbery.—The sanitary arrangements in the district are fair.

CORK; Carrigaline, No. 1.—District healthy. Vaccination below the mark owing to the apathy of parents.

CORK; Douglas.—One case of cancer has occurred.

CORK; Dripsey.—The sanitary condition of the district is fairly good.

DUNMANWAY; Coolmountain.—The sanitary condition of the district is fairly good. One case of cancer and one of tuberculous disease occur among the deaths registered during the quarter. Vaccination continues satisfactory.

DUNMANWAY; Dunmanway, W.—District healthy; no epidemic. Two cases of measles; no death from it—it was brought from another union.

KILMALLOCK; Charleville.—The district is healthy.

KINSALE; Ballyfeard.—Health of district good. Three deaths occurred at 70 years, one at 74, one at 75, and one at 80 years.

MALLOW; Ballyclogh.—District healthy.

MALLOW; Buttevant.—District in good sanitary condition.

MALLOW; Doneraile.—District very healthy.

MALLOW; Kilshannig.—District healthy.

MALLOW; Mallow, W.—District healthy.

MALLOW; Rahon.—District healthy. Two cases of scarlatina in same house since last report.

MIDDLETON; *Aghada*.—Of the fourteen deaths registered, one was a suicide, two were due to tuberculous disease; the remainder were over 60 years.

MIDDLETON; *Cloyne*.—The health of the inhabitants has been exceptionally good during the past three months.

MILLSTREET; *Cullen*.—The district is free from infectious disease.

MITCHELSTOWN; *Mitchelstown No. 1., W.*—Vaccination postponed owing to epidemic of measles.

SKULL; *Goleen*.—The two deaths registered from phthisis occurred in two girls returned from America, aged respectively 20 and 28 years.

SKULL; *Skull, W.*—Deaths below average. District very healthy.

Kerry County.

CAHERSIVEEN; *Caher, W.*—The district is in fairly good sanitary condition.

CAHERSIVEEN; *Darrynane*.—Measles was prevalent during the latter end of the quarter, some deaths occurring from same, the disease being imported from Liverpool.

CAHERSIVEEN; *Glanbehy*.—There are no cases of cancer in my district. The sanitary state of district good.

CAHERSIVEEN; *Valencia*.—The district has been extremely healthy during the quarter; no epidemic of any kind; only one death registered.

DINGLE; *Castlegregory*.—No case of cancer. There was a slight outbreak of enteric fever in western portion of district, but we grappled with it determinedly by isolation and removal to hospital; it was soon quelled.

DINGLE; *Dingle, W.*—The district has been very healthy for the last three months.

DINGLE; *Ventry*.—Up till a few weeks ago there were a great many defaulters in the Ventry district, but owing to the pressure exercised by the Guardians the number of defaulters has now been reduced to very few. The sanitary condition of the district is fairly good.

KENMARE; *Kenmare, W.*—One death registered, the age given being 103 years.

KILLARNEY; *Coom*.—Tuberculosis seems to be very prevalent in this district.

KILLARNEY; *Killorglin*.—Isolated cases of typhus fever have occurred. Altogether twelve cases have been notified during the quarter; otherwise the district is healthy.

KILLARNEY; *Milltown*.—District very healthy. No cases of contagious or infectious disease registered. Sanitary state of district good.

LISTOWEL; *Ballyduff*.—Vaccination had to be postponed owing to epidemic of whooping-cough.

LISTOWEL; *Ballyhorgan*.—Sanitary state of district good.

LISTOWEL; *Ballylongford*.—District very healthy for quarter, no case of contagious disease. Small number of vaccinations. Sanitary condition of district good. Village sewers are needed. Most deaths from old age.

LISTOWEL; *Listowel, W.*—District now entirely free from all forms of infectious disease.

TRALEE; *Brosna, No. 1*.—District healthy.

TRALEE; *Castlemaine*.—The district has been very healthy during quarter, with the exception of two cases of typhoid fever; one nursed at home, the other removed to fever hospital. No further cases reported.

Limerick County and County Borough.

CROOM; *Castletown*.—A very healthy quarter.

KILMALLOCK; *Bruff*.—I have no complaint with reference to the sanitary state of the district.

KILMALLOCK; *Bruree*.—One case of measles. District very healthy during quarter.

KILMALLOCK; *Hospital*.—District healthy.

KILMALLOCK; *Kilfinnane*.—District healthy.

KILMALLOCK; *Kilmallock, W.*—District healthy; no epidemic disease.

LIMERICK; *Annacotty*.—Sanitary arrangements very fair. District healthy.

LIMERICK; *Limerick, No. 2*.—There is an epidemic of measles prevailing.

LIMERICK; *Limerick, No. 3*.—The health and sanitary arrangements and condition of my district have been good. No death has been registered during quarter from zymotic disease except two from pertussis. There were five deaths from all forms of tuberculous disease. Measles is now rather prevalent in district, but as yet no death from it has been registered.

LIMERICK; *Moroe*.—Sanitary condition of district fairly good. No contagious or infectious disease prevalent. Of the small number of deaths entered one was at 95, one at 86, and two at 75 years.

LISTOWEL; Glin.—The public health has been fairly good this quarter. There was only one case of enteric fever during the three months ending the 30th September, 1907.

MITCHELSTOWN; Gallally.—Vaccination had to be postponed owing to a mild epidemic of measles through the district.

MITCHELSTOWN; Mitchelstown, No. 2.—Vaccination postponed owing to an epidemic of measles.

NEWCASTLE; Abbeyfeale.—One death from cancer.

NEWCASTLE; Ardagh.—The sanitary state of the district fair; no epidemic.

NEWCASTLE; Feenagh.—The health of the district is good.

RATHKEALE; Askeaton.—During the past quarter this district was very free from contagious diseases.

RATHKEALE; Pallaskenry.—The sanitary arrangements in the district are fairly good.

RATHKEALE; Rathkeale, No. 2.—My district was free from all contagious diseases during the quarter.

TIPPERARY; Grean.—District very healthy.

Tipperary County, North Riding.

BORRISOKANE; Terryglass.—The district is very healthy; no epidemic.

NENAGH; Nenagh, W.—District healthy. One case of typhoid not notified to me; found out when case came to be registered.

NENAGH; Newport.—Two cases of enteric fever. District otherwise healthy.

NENAGH; Portroe.—District healthy, with the exception of a case of gastric fever at Portroe.

THURLES; Templemore.—No prevailing disease.

THURLES; Thurles, W.—Seventeen cases of enteric fever occurred in urban district at end of quarter.

Tipperary County, South Riding.

CALLAN; Ballingarry.—The health of the district is good.

CALLAN; Mullinahone.—Sanitary condition of district fairly good, no disease prevalent; district remarkably healthy. Vaccination well attended to. Cases of tubercular and malignant disease infrequent in district. No case of cancer that I am aware of in district at present.

CASHEL; Killenale.—The health of the district good and free from contagious diseases. Three deaths from tuberculosis, two of which were imported into the district.

CASHEL; Kilpatrick.—District healthy.

CASHEL; Tullamain.—I believe there have been some vaccinations, but I have not been supplied with certificates.

CLOGHEEN; Caher.—The sanitary state of district is good.

CLOGHEEN; Clogheen, W.—District healthy, with the exception of some cases of pneumonia.

CLONMEL; Marlfield.—Sanitary state of district satisfactory.

TIPPERARY; Cappagh.—The district is healthy.

TIPPERARY; Emly.—District healthy.

TIPPERARY; Tipperary, W.—The district has been in a healthy condition during quarter.

URLINGFORD; Kilcooly.—There were two cases of typhoid during past quarter, otherwise district has been healthy. Sanitary arrangements good.

Waterford County and County Borough.

CLONMEL; Ballymacarbray.—Sanitary arrangements good.

DUNGARVAN; Dungarvan, W.—District healthy during past quarter.

DUNGARVAN; Whitechurch.—One mild case of enteric during the quarter.

WATERFORD; Waterford Rural, No. 1.—Some of the labouring class are badly housed with regard to air-space, light, and ventilation.

WATERFORD; Waterford Urban, No. 1.—The sanitary arrangements in parts of the district are bad. There are many houses having objectionable privies and ashpits. There are some over-crowded dwelling-houses, often ill-ventilated and ill-lighted. Scarletina epidemic has abated. Tuberculosis is very prevalent—it enters into the cause of death in more than 25 per cent. of all deaths. Epidemic diarrhoea has been present to a large degree during the past two months.

WATERFORD; Woodstown.—The sanitary condition of the district is very good.

YOUGHAL; Ardmore.—Health of district very good.

YOUGHAL; Clashmore.—District healthy.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Crumlin.—The proportion of deaths from malignant disease is larger than usual this quarter. In one case an old woman with epithelioma of the lip; her husband died from pyloric carcinoma about three years ago. Her lip was fissured at the time of his death, but did not show malignancy till afterwards.

ANTRIM; Doagh.—The health of the district is satisfactory. There was a considerable number of cases of mild scarlet fever during the quarter; also one speedily fatal case of epidemic cerebro-spinal meningitis.

ANTRIM; Randalstown.—An epidemic of whooping-cough during the quarter.

ANTRIM; Templepatrick.—The sanitary arrangements of the district (with few exceptions) are good. No epidemic disease at present.

BALLYMENA; Ahoghill.—Health of district good. No form of zymotic disease during the quarter.

BALLYMENA; Ballymena, W.—One case of cerebro-spinal fever that died, otherwise town and district healthy.

BALLYMENA; Broughshane.—Health of district very good. No zymotic disease.

BALLYMENA; Clogh.—District fairly healthy. Sanitary arrangements good.

BALLYMENA; Galgorm.—No zymotic disease in the district. One death registered at 92 years.

BALLYMENA; Toome.—Had two deaths from cerebro-spinal meningitis in my district during above quarter. No other cases have occurred, otherwise the health of the district is satisfactory.

BALLYMONEY; Portrush.—District in very healthy condition.

BELFAST; Belfast Rural, No. 4.—Exceptionally healthy.

LARNE; Ballycarry.—District in fairly good sanitary condition; no epidemic diseases; large proportion of deaths those of aged people.

LISBURN; Dunmurry.—The sanitary condition of this district extra good; no epidemic of any kind.

LISBURN; Glenavy.—District free from any general epidemic influence. One typical case of cerebro-spinal fever—fatal.

LISBURN; Knocknadona.—The sanitary condition of this district is good. No death was registered from cancer.

LISBURN; Lisburn, W.—Two deaths caused by cancer, one in urban district; the informant said he never heard of a case in the family. The second was admitted into workhouse infirmary from rural district, and the master of the workhouse could not give me any particulars.

Armagh County.

ARMAGH; Blackwatertown.—There were two deaths registered from sunstroke, one death on the 19th July, the other on the 20th July; both were uncertified.

ARMAGH; Markethill.—Four cases of diphtheria were notified during the quarter. Diarrhoea has been very prevalent during the quarter, but did not cause any death. Except for the above the district has been very healthy.

ARMAGH; Rich Hill.—District healthy.

LURGAN; Lurgan, No. 2.—The district is in a good sanitary condition and free from any infectious disease.

NEWRY; Mullaghglass.—District healthy.

NEWRY; Poyntz Pass.—Measles, pertussis, and diarrhoea have been very prevalent. Two children more vaccinated and not entered in the return of successful primary vaccinations, as result has not yet been ascertained.

Belfast County Borough.

BELFAST; Belfast Urban, No. 3.—Four deaths were registered from "cerebro-spinal meningitis," one of which was certified as "non-epidemic."

BELFAST; Belfast Urban, No. 4, W.—Ten deaths from cerebro-spinal fever.

BELFAST; Belfast Urban, No. 11.—There have been seven deaths in the district registered as cerebro-spinal meningitis during the quarter. The death rate has been low. The number of primary vaccinations is slightly less than usual, owing to the prevalence of measles and epidemic diarrhoea.

BELFAST; Belfast Urban, No. 13.—Two deaths from cerebro-spinal fever.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—District in a healthy condition.

BAILIEBOROUGH; Termon.—The district is in a very sanitary condition.

BAWNBOY; Swanlinbar.—There was an epidemic of typhoid fever—16 cases. All the cases occurred during the last week of July and the first week of August. Since then the district is free from fever, and in good sanitary condition.

CAVAN; Bellanagh.—The sanitary condition of the district is fair. There appears to have been no infectious diseases except a slight outbreak of enteric fever.

CAVAN; Killashandra.—One death from enteric fever registered during the quarter. Three deaths from pulmonary tuberculosis. District healthy.

CAVAN; Stradone.—Whooping-cough prevalent in the district.

COOTEHILL; Tullyvin.—District healthy.

ENNISKILLEN; Holywell, No. 2.—The sanitary arrangements of the district are fairly good. Of the eleven deaths registered one was from phthisis, one of a child of two months, and six of persons over 60 years. There were no infectious diseases. One case of diarrhoea, which was registered.

OLDCASTLE; Ballyjamesduff.—District healthy.

OLDCASTLE; Virginia.—District healthy.

Donegal County.

BALLYSHANNON; Ballintra.—The sanitary arrangements are fairly good, but water supply still continues bad. I have registered the death of a woman aged 106 years during the quarter.

DONEGAL; Donegal, W.—District free from infectious disease.

DONEGAL; Dunkineely.—A few cases of measles of a mild type have occurred; district otherwise healthy.

DONEGAL; Laghy.—Sanitary condition of district is good.

DONEGAL; Mountcharles.—District has been healthy during the quarter.

DONEGAL; Pettigoe.—District fairly healthy.

DUNFANAGHY; Crossroads.—District free from any epidemic during the quarter.

DUNFANAGHY; Dunfanaghy, W.—Typhoid fever occurred in four families in the district—there were no deaths up to present. There were also several cases of toxæmic jaundice, with three deaths. Lobar pneumonia accounted for four deaths—it has been prevalent in this district for the last nine months, but has now disappeared.

GLENTIES; Ardara.—District healthy.

GLENTIES; Carrick.—There was an epidemic attack of measles in the district during the quarter which was of a mild type, there being only one fatal case; also an isolated case of enteric. The district is in a fairly sanitary condition.

GLENTIES; Doocharry.—District healthy.

INISHOWEN; Buncrana.—District healthy.

INISHOWEN; Clonmany.—District healthy.

INISHOWEN; Malin.—District healthy.

INISHOWEN; Moville.—District at present healthy.

LETTERKENNY; Church Hill.—District healthy; no epidemic.

LETTERKENNY; Manorcunningham.—The sanitary state of the district is very good.

MILLFORD; Rathmullan.—District has been healthy during past quarter.

STRABANE; Raphoe.—District healthy. Sanitary arrangements satisfactory.

STRANORLAR; Cloghan.—Sanitary arrangements satisfactory.

Down County.

BANBRIDGE; Ballyward.—Sanitary state of district fairly good.

BANBRIDGE; Dromore.—Both registration and vaccination are fairly well kept up.

BANBRIDGE; Loughbrickland.—Sanitary arrangements of the district fairly good.

BELFAST; Castlereagh, No 1.—No deaths from cerebro-spinal fever.

DOWNPATRIK; Ballynahinch.—There have been four cases of scarlet fever of a mild type in the district during the quarter.

DOWNPATRIK; Killyleagh.—The public health is good. There is no improvement yet in the water supply of one village.

DOWNPATRIK; Portaferry.—The sanitary state of the district is very good. Two cases of scarlet fever occurred in the second month of the quarter, and both recovered.

KILKEEL; Kilkeel, No. 2, W.—Health of district good, except three imported cases of typhoid fever, two in Workhouse Hospital, and one in a dairy. One case was brought from another district; no notice sent to me as sanitary officer. I only heard of its being there by mere chance.

LISBURN; Annahilt.—Health of district extra good.

LISBURN; Drumbeg.—Births above the average; deaths below average. Almost one third of deaths due to tubercle; no zymotic disease during quarter.

LISBURN; Saintfield.—Health of district good.

LURGAN; Moira.—The health of the district during the past quarter has been good. Two deaths at the advanced ages of 90 and 92 years. Of the twenty deaths only four are between the ages of 1 year old and 60. Fourteen deaths over 60.

LURGAN; Waringstown.—District healthy; no epidemic disease. There was one case of cerebro-spinal fever during the quarter, but it was removed to Union Hospital and died there. It was a sporadic case—the first in this district.

NEWRY; Donaghmore.—District very healthy. Sanitary state good.

NEWRY; Rathfriland. — Owing to the fact that the water supply of the town of Rathfriland is derived from pumps and wells which are in some houses situated in cellars, and that many of the householders have only got dry privies instead of wash-out closets, the sanitary condition of the town is not all that might be desired. In the country many of the houses are small, dirty, and badly lighted and ventilated. There has been no prevalence of any disease during the quarter.

NEWTOWNARDS; Bangor. — Sanitary arrangements excellent. Health of district very good. No epidemic. Vaccination well carried out.

NEWTOWNARDS; Comber. — The district is now free from epidemic of any kind. Sanitary arrangements very good, and the class of houses steadily improving, old houses being pulled down and rebuilt, or lying empty.

NEWTOWNARDS; Greyabbey. — Births above, deaths below average. No epidemic in the district. General health good.

NEWTOWNARDS; Newtownards, W. — Four urban and three rural cases of scarlatina were notified, also one urban case of typhoid fever. The health of the district has been particularly good. Everyone is looking forward to the time when we will have pure water from the mountain, and also our new sewers.

Fermanagh County.

ENNISKILLEN; Enniskillen, W. — Sanitation fairly good.

ENNISKILLEN; Holycell, No. 1. — The sanitary arrangements of the district are fairly good. Of the three deaths registered two were of persons of 85 and 76 years respectively, and one of a child of 7 years which had been in delicate health from birth. There are no infectious diseases.

IRVINESTOWN; Clonelly. — One death from cancer during quarter. District at present healthy.

IRVINESTOWN; Ederney. — Cases registered at 84, 80 (three), 78 (two) 75, 70, 69 years. District healthy.

IRVINESTOWN; Irvinestown, W. — District healthy.

LISNASKEA; Derrylin. — The sanitary conditions are primitive as before. Tuberculous disease is always present in the district. There was one marked case of diphtheria during the quarter and two suspects. There were also several cases of whooping-cough. There is at present an epidemic of measles in the district. These epidemics—which the present conditions of the law are inadequate to check—make their mark for harm on the rising generation.

Londonderry County and County Borough.

COLERAINE; Aghadowey. — District healthy.

COLERAINE; Garvagh. — Health of district good. No epidemic disease during quarter.

COLERAINE; Kilrea. — District healthy.

COLERAINE; Portstewart. — The health of the district seems satisfactory, and there was very little illness of serious nature notwithstanding the cold and wet summer.

LIMAVADY; Dungiven. — Sanitary arrangements satisfactory. No particular disease prevailed during quarter.

LIMAVADY; Limavady, W. — One case of diphtheria was admitted to the Workhouse Hospital from an adjoining district. The health of the district is good.

LONDONDERRY; Lower Liberties. — Severe epidemic of whooping-cough during the quarter, and still continues. No fatal cases.

MAGHERAFELT; Moneymore. — District healthy; no epidemic. Low death-rate for quarter, most of the deaths being of old people.

Monaghan County.

CARRICKMACROSS; Carrickmacross, W. — District in fair sanitary condition. English cholera very prevalent during quarter. Great increase in the number of vaccinations.

CARRICKMACROSS; Donaghmoyne. — An infectious form of sore throat appeared in a few cases, followed in some by desquamation, and accounts for one death. District at present healthy.

CARRICKMACROSS; Raferagh. — Gastro-enteritis has been prevalent, but so far no deaths have occurred. I can assign no cause, and I have carefully examined milk and water supply in each case.

CASTLEBLAYNEY; Ballybay. — Diphtheria and scarlatina which were epidemic early in the quarter have apparently left these parts. The new main drainage scheme is in course of construction by the Rural District Council.

CASTLEBLAYNEY; Castleblayney, W. — Among the deaths registered during the quarter one was said to have been 76 years, one 77, one 82, one 85, one 90, one 100, and one 108. The cause of death in two cases was ascribed to diphtheria. A number of sanitary reports were forwarded to the Councils regarding cases in which cattle were kept too close to the dwelling-houses. Whooping-cough prevailed and prevented some children from being vaccinated.

COOTEHILL; Dawsonsgrove. — The sanitary condition of the district is fairly good.

MONAGHAN; Castleshane.—District sanitary. No epidemic of any disease.

MONAGHAN; Emyvale.—There was a slight epidemic of whooping-cough during the quarter. Sanitary condition is very fair.

MONAGHAN; Kilmore.—District healthy. No zymotic disease during the quarter. All the deaths with one exception were aged people.

MONAGHAN; Monaghan, W.—The sanitary condition of this district is satisfactory. There has been no epidemic disease during the quarter. There are no special circumstances affecting the public health or vaccination to be noticed.

MONAGHAN; Scotstown.—The sanitary condition of the district is fairly satisfactory.

Tyrone County.

CASTLEBERG; Castleberg, W.—Sanitary state of district satisfactory; no epidemics of any kind.

CASTLEBERG; Drumquin.—The sanitary condition of the district is good, with no infectious diseases of any sort during the quarter.

CASTLEBERG; Killeter.—State of district healthy.

CLOGHER; Clogher, W.—The sanitary arrangements of Clogher are not good for the want of a supply of good water.

CLOGHER; Fivemiletown.—The health of the district was pretty good during the quarter. There were some cases of epidemic gastro-enteritis, but no deaths from this disease.

COOKSTOWN; Pomeroy.—District sanitary and healthy, with the exception of some "mumps."

COOKSTOWN; Stewartstown.—There were a few cases of scarlatina, all children recovered, except one; which was only a few hours ill. There was no medical attendant; death is believed to have been caused by scarlatina, as there was another case in the house at same time. District at present very healthy.

DUNGANNON; Caledon and Ballymagran.—Health of community good. A few cases of pertussis and one case of enteric.

DUNGANNON; Clonavaddy.—Sanitary arrangements good. District in a fairly healthy condition.

DUNGANNON; Coal Island.—A healthy quarter. Some cases of mumps still in district. The child whose death from whooping-cough is registered came over from Scotland only four days previous to its death. One death from scirrhus of breast; no family history nor history of injury.

IRVINESTOWN; Trillick.—There were nine uncertified deaths; one inquest held. One death registered at the age of 89 years, one 86, one 84, one 82, one 80, and one 68. Two from cancer and two from tubercular disease.

OMAGH; Drumquin.—The sanitary arrangements in the district are very satisfactory. No epidemic or other diseases at present prevalent.

OMAGH; Fintona.—The health of the district has been good during the past quarter and free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; Omagh, No. 1, W.—Health of district satisfactory. Sanitary condition—Urban continues to improve, Rural—general apathy—viz., cesspools and manure heaps in front of dwellings. Outhouses, byres, insanitary. In many houses there are earthen floors; rooms small, badly lighted, and ill-ventilated. One case of typhoid fever in district lunatic asylum.

OMAGH; Omagh, No. 2.—This district has been very healthy for the past three months; the majority of deaths registered are old people, which accounts for so few being certified.

OMAGH; Sixmiletown.—The district is at present in a very healthy state; no infectious diseases.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

GALWAY; Galway, No. 3 (Arran).—District on the whole very healthy.

GALWAY; Moycullen.—Sanitary state of district is very good.

GALWAY; Oranmore.—Some of the parents of children in this district are very slow in bringing their children for vaccination until compelled to do so.

GALWAY; Spiddle.—District at present very healthy.

GALWAY; Turloughmore.—Sanitation pretty fair in this district.

GORT; Gort, W.—The health of district has been very good during quarter.

GORT; Kinvarra.—The health of the district during the quarter was good except for an outbreak of "diarrhoea" with vomiting (simple apyrexial gastro-enteric catarrh). The outbreak coincided with the dry weather of the last three weeks of September and was probably connected with it.

LOUGHREA; Athenry.—The number of vaccination defaulters is very large.

LOUGHREA; Bullaun.—Three of the deaths registered during the quarter were at 64, 78, and 78 years of age respectively.

LOUGHREA; Woodford.—Of the two tuberculous cases noted in return one is uncertified but probable.

OUGHTERARD; Cloonbur, No. 1.—No death from cancer or tuberculosis. Health of district very good.

PORTRUMNA; Eyrecourt.—There was one case of enteric during the quarter. The district is fairly sanitary.

TUAM; Tuam No. 1, W.—Health of district good. Sanitation improving. There were two cases of scarlatina and one of diphtheria during the quarter.

TUAM; Tuam, No. 2.—There was one case of enteric in town of Tuam removed to hospital. No other case since. The district otherwise free from epidemic disease.

Leitrim County.

BAWNBOY; Ballinamore.—Sanitary condition of district good.

CARRICK-ON-SHANNON; Jamestown, W.—District healthy. More than 50 per cent. of deaths over 60 years; 15 per cent. due to carcinoma.

MANORHAMILTON; Manorhamilton, W.—Enteric fever has been very prevalent in one part of the district. Whooping-cough has also been prevalent. Three deaths from acute pneumonia in elderly people.

MOHILL; Carrigallen.—The health of the district has been good during the quarter. There were a few mild cases of scarlatina. No other epidemic. General sanitary condition of district fair.

MOHILL; Mohill, W.—My district is in a very healthy state.

MOHILL; Rinn.—The district is healthy and free from contagious disease.

MOHILL; Rowan.—Sanitary condition of the district good. Inclemency of the weather up to the past few weeks prevented people bringing their children for vaccination and attending their harvest prevented them for past few weeks.

Mayo County.

BALLINA; Crossmolina.—Sanitary condition of district fair. Vaccination backward.

BALLINROBE; Ballinrobe, W.—My district is in good sanitary condition. The health of the district is good. Fair attendance for vaccination.

BALLINROBE; Cappaghduff.—Sanitary arrangements good generally, still there are some of the villages that require white-washing and yards cleaned.

BALLINROBE; Cong.—Health of district very good.

BALLINROBE; Hollymount.—Births and deaths under the average. One death from enteric fever in this quarter, but not yet registered. The general health of the people was very good during this quarter.

BELMULLET; Bangor.—Some cases of enteric fever occurred during quarter, and were confined to two adjacent dwellings. They are all now quite recovered. Public health good generally.

BELMULLET; Binghamstown, W.—District in a satisfactory state.

BELMULLET; Knocknalower.—Sanitary arrangements only fair, yet we have very few of the principal epidemic diseases contracted by children. During my time I have only seen three cases of enteric, all of which recovered. We are doing everything possible to enforce good sanitary arrangements notwithstanding the poverty that prevails.

CASTLEBAR; Balla.—District healthy. There have been a good many cases for vaccination postponed by the Medical Officer during the quarter.

CASTLEBAR; Castlebar, No. 1, W.—Health of district good. Presently free from zymotic and other contagious diseases. The death of a man aged 105 years was registered. Up to three years previous to his death his sight, hearing, and mental condition were good.

CLAREMORRIS; Ballindine.—District healthy.

CLAREMORRIS; Ballyhaunis.—Health of district during the quarter has been good. No zymotics or cancer. Of the deaths registered, seven had attained ages varying between 80 and 90 years. The sanitary condition, hereabouts, is vastly improved, and, now that an order has been made by the District Council for the registration of the common lodging houses, the improvement will, I expect, in the near future be still more satisfactory.

KILLALA; Ballycastle.—There were three cases of typhus fever in one house. The father was too ill to be removed to hospital and died. A little girl was removed to hospital and died a few days after admission. On another child getting ill I had her and the remainder of the family sent into hospital in order to prevent the further spread of the disease, and that the dwelling-house could be thoroughly and properly disinfected. The district is in a very insanitary condition, pigs and cattle being kept in many dwellings, and many of the houses entirely unfit for human habitation.

SWINEFORD; Foxford.—Water supply very bad.

WESTPORT; Achill.—General health and sanitary state good. Cattle still kept in most of the dwelling-houses and horses as well. Children are coming to be vaccinated since prosecutions. No case from cancer registered.

WESTPORT; Ballycroy.—Some cases of diphtheria during quarter. Tuberculosis markedly on the increase.

WESTPORT; Islandeady.—The sanitary arrangements in the district are good, and no particular disease is prevalent. Health of district is satisfactory.

WESTPORT; Louisburgh.—Health of district during quarter very good.

WESTPORT; Newport.—The sewerage in the town of Newport is bad, and in hot weather the stench from some traps is very bad. Otherwise the condition of the district is satisfactory.

WESTPORT; Westport, W.—Three deaths of persons over 90 years; 14 deaths of persons over 80 years. Note, majority of births, females; majority of deaths, males.

Roscommon County.

ATHLONE; Brideswell.—Health of district exceptionally good.

BOYLE; Ballyfarnan, No. 1.—State of district generally healthy.

BOYLE; Boyle, No. 1, W.—District very healthy.

BOYLE; Keadew.—Sanitary arrangements fair. Bronchitis prevalent during quarter.

CARRICK-ON-SHANNON; Aughrim.—There were three cases of enteric fever, otherwise the health of the district has been excellent.

CASTLEREAGH; Castlereagh, W.—Tuberculosis in its various forms largely afflicts the people. While there is much made about the existence of this fell disease—various appeals for the building of sanatoria, &c., &c., there is nothing done to cope with it where it is developed—the homes of the people. It should be treated as a preventative disease, by close attention to sanitation, compulsorily obliging the people to provide proper sleeping accommodation for their families, and not have them huddled six and eight together in

one small bedroom, oftentimes a consumptive patient in their midst. Small loans at cheap rate should be issued to small tenant farmers to make necessary additions to their houses.

STROKESTOWN; Roosky.—Of the deaths registered eleven were of persons aged 60 years and upwards, one of whom was aged 100 years, one 98 years, two 90 years each, one 86 years, one 84 years, one 78 years and one 77 years. There was one death registered during the quarter from tuberculous disease, and also one death from cancer of stomach, both certified. Vaccination well attended to by the Medical Officer. Sanitation progressive.

Sligo County.

BOYLE; Ballyfarnan, No. 2.—State of the district generally healthy.

BOYLE; Gurteen.—Sanitary condition improving. Vaccination progressing. District healthy.

DROMORE WEST; Skreen.—The inclemency of the weather to the end of August kept the vaccination defaulters from complying, and during the month of September I was on my holidays. The district is very healthy and sanitary arrangements good.

SLIGO; Ballymote.—District is in a healthy condition and free from all infectious and contagious disease.

SLIGO; Carney, No. 1.—Vaccination was backward during this quarter, owing to the very severe weather and to the large number of vaccinations performed in the previous quarter. Tubercular disease is still rife, and shows no tendency to abate. Emigrations from the district were numerous and the idea of all able-bodied young men and women seems to be to leave the country at the earliest opportunity.

SLIGO, Carney, No. 2.—District healthy.

SLIGO; Riverstown.—District healthy.

TOBERCERRY; Aclare.—Health of the district continues good.

TOBERCERRY; Coolaney.—Sanitary arrangements good.

TOBERCERRY; Tobercerry, W.—There was a case of diphtheria. District in a fairly satisfactory condition, with the exception of portion of the town.

1907.]
4th Quarter

[No. 176.]

QUARTERLY RETURN
OF THE
MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT
REGISTRARS' DISTRICTS, AND REGISTRARS' DISTRICTS
IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's
District; Persons Vaccinated, &c., &c., &c.*

DUBLIN: PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY ALEX. THOM & CO. (LIMITED).

And to be purchased, either directly or through any Bookseller, from

E. PONSONBY, 116, GRAFTON STREET, DUBLIN; or

WYMAN AND SONS, LTD., FETTER LANE E.C. : or

OLIVER AND BOYD, TWEEEDDALE COURT, EDINBURGH.

Price One Shilling.

Marriages:—JULY, AUG., SEP., 1907. **Births & Deaths:**—OCT., NOV., DEC., 1907.

During the quarter ended 31st December last, there were registered in the 827 Registrars' Districts in Ireland 23,833 births—a number equal to an annual birth-rate of 21·8 in every 1,000 of the estimated population*—and 18,110 deaths, representing an annual rate of 16·5 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 6,756 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 25·0 in every 1,000 of the estimated population, and the death-rate 14·9 per 1,000.

The birth-rate in Ireland for the quarter is equal to the average rate for the corresponding quarter of the ten years 1897–1906, and 0·6 below the rate for the fourth quarter of 1906. The deaths are 115 below those registered in the corresponding quarter of 1906; the death-rate is 0·1 below the rate for that quarter, and equal to the average for the fourth quarter of the ten years 1897–1906.

Compared with those for the corresponding quarter of 1906, the returns of pauperism, furnished by the Local Government Board, show

* See page 380.

a decrease of 36 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 441 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years 1897-1906, the number of Workhouse inmates shows an increase of 932, but the number of persons on out-door relief shows a decrease of 218, the total under both heads being 0·7 per cent. below the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·6 per cent.

The annual marriage-rate (5·1 per 1,000 of the population) represented by the marriages registered during the third quarter of 1907 is 0·4 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the Quarter ended 30th September, 1907, and by the **Births** and **Deaths** registered in the Quarter ended 31st December, 1907.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 319.

MARRIAGES.

The marriages (5,530) registered in Ireland during the third quarter of 1907 are equivalent to an annual rate of 5·1 per 1,000 of the estimated population, being 0·4 above the rate for the corresponding quarter of 1906, and also 0·4 above the average rate for the third quarter of the ten years 1897–1906. Of the total number of marriages 3,651 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,879 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·5 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·7 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·5 above, and that under the latter is equal to the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the ten years 1897–1906, and the average number for that period; also the number registered in the first, second and third quarters of 1907.

BIRTHS.

The number of births registered during the quarter ended 31st December last was 23,833—12,175 boys and 11,658 girls—being equal to an annual ratio of 1 in every 45·9, or 21·8 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1897–1906 was 24,278, equivalent to an annual rate of 21·8 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 21·4 per 1,000 of the population according to the Census of 1901; Munster, 20·4; Ulster, 22·8; and Connaught, 19·5.

The highest county or county borough birth-rate* is 28·7 for Belfast county borough, and the lowest 16·0 for Roscommon county. Of the intermediate rates the highest five are—Dublin county borough, 28·3; Mayo, 22·9; Limerick county and county borough, 22·3; Donegal, 22·1; and Antrim, 22·1. The lowest five are—Meath, 16·9; Carlow, 17·5; King's, 17·5; Leitrim, 17·7; and Dublin county, 17·9.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 18,110—9,091 males and 9,019 females—affording an annual ratio of 1 in every 60·4, or 16·5 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1897–1906 was also 16·5 per 1,000.

The death-rate in Leinster was 18·0 per 1,000 of the population according to the Census of 1901; in Munster, 14·3; in Ulster, 18·0; and in Connaught, 12·1.

The county or county borough death-rates* range from 10·6 in Roscommon, to 23·9 in Dublin county borough. Between these rates the lowest five are—Mayo, 11·2; Clare, 11·2; Kerry, 11·6; Leitrim, 12·6; and Galway, 12·7; and the highest five are—Belfast county borough, 23·6; Armagh, 18·2; Dublin county, 17·9; Queen's, 17·5; and Down, 17·3.

* See note (*) on page 294.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1897–1906, and the average number for that period; also the number registered during each quarter of the year 1907:—

1907, . . .	23·9	24·3	22·8	21·8	23·2	21·4	18·6	14·2	16·5	17·7

Ages.—Of the 18,110 deaths registered last quarter 2,348, or 13·0 per cent., were of children under 1 year old; and 7,997, or 44·2 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 98·5 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 14·7 per cent. of the total deaths registered therein; in Munster, 13·4 per cent.; in Ulster, 12·7 per cent.; and in Connaught, 8·7 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 40·4 per cent.; in Munster, to 44·2 per cent.; in Ulster, to 44·1 per cent.; and in Connaught, to 54·2 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 1,010, or 39 above the number registered in the corresponding quarter of 1906, and is equivalent to an annual rate of 0·9 per 1,000 living, being equal to the rate for the fourth quarter of 1906, and 0·1 below the average rate for the fourth quarter of the ten years 1897–1906.

* See Note (†) on page 303.

The following tabular statement shows the mortality from each of the principal epidemic diseases, as registered during the December quarter of 1907, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years 1902-1906.

Name of Disease.	Number of Deaths in December quarter, 1907.	Average number of Deaths in December quarter of the 5 years, 1902-1906.
Small-pox,	—	2
Measles,	229	203
Scarlet Fever,	25	56
Typhus,	11	19
Whooping-cough,	138	198
Diphtheria,	86	95
Pyrexia (origin uncertain),	11	14
Enteric Fever,	103	121
Diarrhoeal Diseases,	407	298

Small-pox.—From Abstract I., page 318, which has been summarised from the Quarterly Returns of the Registrars of Deaths in Ireland, it appears that not one death from small-pox was registered during the December quarter of the year 1907.

The following references, to the incidence of small-pox were contained in the notes supplied by the Registrars.

Celbridge.—"The small-pox cases removed from Leixlip all recovered."

Maynooth.—"Two cases of small-pox, one of which was a baby six weeks old ; both recovered."

Measles.—The deaths from measles numbered 229, and are equal to an annual death-rate of 0·21 per 1,000 of the population of Ireland, estimated to the middle of the year 1907. In each of the three earlier quarters of the year, deaths from measles were 90, 128, and 111, and the average for the December quarterly period of the five years preceding was 203. Of the 131 deaths from measles registered in the province of Ulster, 119 occurred in Belfast ; of 60 deaths in Munster, 34 occurred in the county borough of Limerick, and in Connaught the 19 deaths returned were all registered in the district of Ballina.

Scarlet Fever.—In the preceding quarters of the year the number of deaths from scarlet fever fell from 34 registered in March quarter to 23 in June quarter, and to 20 in September quarter ; in the period under notice, deaths from this disease numbered 25, being 31 below the average for the December quarter of the five years, 1902-1906.

Typhus.—A reference to Table IV., page 301, shows that the number of deaths—11—from typhus registered during the quarter was the lowest recorded in any of the quarterly periods included in this table. In the three quarters preceding that under notice, the deaths registered from this disease were 13, 15, and 18 respectively, and the average for the December quarterly period of the preceding five years was 19. The deaths were registered as follows:—In Cork Union 3 deaths, and in each of the Unions of Belfast, Belmullet, Drogheda, Glennamaddy, Killala, Lisburn, New Ross, and Rathdown, one death.

Whooping-cough.—The annual rate representing the deaths (138) from whooping-cough is 0·13 per 1,000 of the estimated population. The deaths, although in excess of the number registered (128) in the September quarter of the year, are well below the average (198) for the December quarter of the preceding five years. In the March and June quarters of the year, 236 and 243 deaths from whooping-cough were respectively registered. Of the deaths registered during the quarter ended 31st December last 13 occurred in the county of Dublin (including 5 in the district of Crumlin), 13 in the county borough of Dublin, and 20 in the county borough of Belfast. In the Registrar's district of Wicklow, Rathdrum Union, 7 deaths from whooping-cough were registered; in Lurgan No. 1, and in Londonderry No. 2 district 4 deaths were respectively registered.

Diphtheria.—From the returns it appears that the deaths from diphtheria registered during the quarter were 86 in number, being below the average (95) for the corresponding quarter of the five years 1902–6, but above the numbers registered in each of the three preceding quarters, namely, 67, 65, and 44. Of the deaths, 15 were registered in the county borough of Dublin, and 10 in the county borough of Belfast.

Enteric Fever.—During the quarterly period under review the deaths from enteric fever registered in Ireland were 103 in number. The total is below the average (124) for the corresponding quarter of the five years preceding; in the three earlier quarters of the year, deaths from enteric fever were 104, 75, and 71 respectively. There were 15 deaths in the county borough of Dublin, 24 in the county borough of Belfast, and 13 in the county of Down; the latter figure includes 5 deaths from enteric fever in Ballylesson* and 4 in Banbridge. In the Registrar's district of Thurles 5 deaths from enteric fever were registered.

Eleven deaths were returned under the denomination—pyrexia (origin uncertain).

Diarrhoeal Diseases.—The mortality from diarrhoeal diseases in the September quarter of 1907 was exceptionally low when compared with that of the corresponding quarters of 1905 and 1906, the respective figures being 730 for 1905, 835 for 1906, and 325 for 1907. In the period under notice, deaths under this heading numbered 407, and were above the average for the corresponding quarterly period of the five years preceding, namely, 298. The deaths (407) are equal to an annual rate of 0·37 per 1,000 of the population estimated to the middle of the year 1907. Of the total deaths, 75 were registered in Dublin county borough, 101 in Belfast county borough, 24 in Cork county borough, and 24 in Waterford county borough.

Tuberculous Disease.—As returned by the Registrars, the total number of deaths from all forms of tuberculous disease registered during the quarter was 2,418, representing an annual rate of 2·21 per 1,000 of the population of Ireland, estimated to the middle of the year. The rates for each of the three preceding quarterly periods for deaths from all forms of tuberculous disease were 2·76, 2·97, and 2·24 per 1,000. The above total—2,418—constitutes 13·4 per cent. of all deaths registered during the quarter.

The number of deaths from all forms of tuberculous disease registered during the quarter may be seen by provinces and counties, poor law

* See note (*) page 361.

unions, or superintendent registrars' districts, and by registrars' districts in the Abstracts which commence on page 318 of this Report. In Dublin county borough 341 deaths from tuberculous disease are returned, in Belfast county borough 319, in Cork county and county borough 233, and in the county of Antrim 104 deaths.

With their accustomed courtesy many of the Registrars of Deaths have forwarded valuable observations on the status of tuberculous disease in their respective districts; these will be found printed in the Appendix to this Report commencing on page 381.

Among these notes the Registrar of Milltown says:—"In this district it is remarkable how tuberculosis selects damp, badly drained houses." The note of the Registrar of Rathangan No. 1, Edenderry Union, refers to the death from pulmonary phthisis of a young woman, aged 22 years, who contracted the disease by attending a relative who was dying from consumption of a very bad type. The Registrar of Timoleague, Clonakilty Union, says:—"Tubercle of the lung is by far the most prevalent disease in the district. With the *present accommodation* for its treatment the disease is bound to advance. I am at present treating 10 cases and if I searched I could find as many more." The Registrar of Waterford, Urban No. 1 District, Waterford Union, states that "tuberculosis enters into the cause of death in almost one-fifth of the deaths." The Registrar of Tuam No. 2, Tuam Union, mentions:—"Of the nine deaths registered, three were from tuberculosis. These deaths from tuberculosis occurred in families with a history of tubercular disease in other members. I have noticed that phthisis often occurs in members of families with a neurotic tendency."

Malignant Diseases.—The deaths which were returned under the head of cancer, malignant disease, numbered 818, equal to an annual rate of 0·75 per 1,000 of the estimated population; in the preceding quarterly periods of the year the respective rates for cancer were 0·71, 0·71, and 0·67 per 1,000.

Cerebro-spinal Fever.*—The following information as contained in the Registrars' Notes was afforded regarding cerebro-spinal fever:—Randalstown, one death was caused by *cerebro-spinal meningitis*; Belfast Urban No. 1, one death from cerebro-spinal fever was registered during the quarter; Belfast Urban No. 3—There was one death registered during the quarter from cerebro-spinal fever, and one death from cerebro-spinal meningitis (epidemic). Belfast Urban No. 4—Three deaths from cerebro-spinal fever, and 3 deaths from *cerebro-spinal meningitis*. Belfast Urban No. 9—No death has occurred from cerebro-spinal fever. Belfast Urban No. 11—There have been a few cases of cerebro-spinal fever in the district during the quarter, but only one death was registered. Belfast Urban No. 13—No deaths from cerebro-spinal fever. Castlereagh No. 1—No deaths from cerebro-spinal fever.

Rabies, Hydrophobia.—The returns did not contain any statement of the existence of rabies in Ireland during the quarterly period under notice.

* See special tables, A., B., C., and D., contained in Quarterly Summary of the Weekly Returns for 13 weeks ending 28th December, 1907, relating to deaths from cerebro-spinal fever in Belfast.

The Registrars, in their Notes, report the presence of the following diseases :—Small-pox in 2 districts, chicken pox in 2, measles in 31, scarlet fever in 20, whooping-cough in 24, diphtheria in 19, fever in 19—typhus in 2, and enteric in 17, mumps in 3, influenza in 15, and cerebro-spinal fever in 7 districts. [See Appendix to this Report commencing on page 381.]

Inquests.—There were 427 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 42 of the total deaths registered.

In Leinster there was 1 inquest to every 36 deaths registered, in Munster 1 to 55, in Ulster 1 to 36, and in Connaught 1 to 164.

Deaths in Public Institutions.—Of the 18,110 deaths registered, 3,801, or 21·0 per cent., occurred in public institutions. In Leinster the percentage was 27·4, in Munster 25·4, in Ulster 15·6, and in Connaught 14·9.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1907, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 20·7, and the birth-rate 26·1 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 14·3 and the birth-rate 19·4 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 2·1 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·4 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1907, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES;‡ from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Bathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 28th December, 1907.

† Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, *typhus* (origin uncertain), enteric fever, and diarrhoeal diseases.
 ‡ The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1907.
 § Formerly described as "Simple Continued Fever."
 (a) Including 5 deaths from cerebro-spinal fever.

URBAN DISTRICTS—continued.

[illegible]

VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1907, there were 19,748 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st December last, was 6,756 (3,292 males and 3,464 females), being 1,493 more than in the corresponding quarter of the year 1906, and 825 above the average number for the fourth quarter of the ten years 1897–1906.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December in 1906 and 1907:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.

* Including 5,081 emigrants to the United States of America, viz.:—3,558 in the month of October, 1,155 in November, and 368 in December. Of 4,454 steerage passengers, 1,339 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $6\frac{1}{4}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1906 the average price was $5\frac{1}{2}d.$, and in the corresponding quarter of 1897 it was $6\frac{1}{2}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 14s. 11d. per cwt. For the corresponding quarter of the year 1906 the average price was 14s. 6d., and for the fourth quarter of 1897 the average price was 15s. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 4s. 2d. to 4s. 6d. In the fourth quarter of 1906 the average prices were 3s. to 3s. 4d., and the prices for the corresponding quarter of 1897 were 3s. 3d. to 4s. 4d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 50s. to 54s. per cwt. In the corresponding quarter of 1906 the average prices were from 49s. to 53s. 6d., and in the fourth quarter of 1897 they were from 43s. to 53s.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 23s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £83 $\frac{3}{4}$, and the lowest £81 $\frac{1}{2}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, which had been $4\frac{1}{2}$ per cent., was raised on the 15th August to 5 per cent., on the 31st October to 6 per cent., on the 4th November to $6\frac{1}{2}$ per cent., and on the 7th November to 7 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1907 was 44,411, or 36 under the average for the corresponding period in 1906.

The average weekly number of persons receiving out-door relief during the quarter was 55,568, being 441 under the average for the fourth quarter of 1906.

Of the persons receiving in-door relief during the fourth quarter of 1907, an average number of 1,445 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1906 the average weekly number was 1,488.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1907, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phœnix Park, Dublin, during the fourth quarter of the years 1902–1907, respectively.

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 314).

The mean height of the barometer during the fourth quarter of 1907 was 29·760 inches, being ·137 below the average for the corresponding quarter of the five years 1902-1906; the highest reading (30·498 inches) was on the 30th November, at 9 A.M., air calm, and the lowest (28·746 inches) on the 18th October, at 9 P.M., wind S.S.E.

The mean temperature of the air during the quarter was 44·4°, or 0·1° below the average for the fourth quarter of the 5 years 1902-1906.

The maximum temperature of the air during the quarter was 63·8° and the minimum 24·6°. The maximum heat in sun was 112·0°, and the minimum on the grass 19·5°.

Rain or snow fell on 63 days during the quarter. The rain-fall measured 9·729 inches, being 3·720 inches above the average for the fourth quarter of the five years 1902-1906. The greatest monthly rain-fall was in October, when 5·202 inches were registered.

The wind blew on 24 days from S.W., on 14 days from E., on 11 days from W., on 10 days from S., on 7 days from S.E., on 4 days from N.E., on 3 days from N., on one day from N.W., and the air was calm on 18 days at 9 A.M.

October.—The mean height of the barometer during this month was 29·567 inches; the highest reading (30·013 inches) was on the 4th at 9 A.M., wind W.S.W.; and the lowest (28·746 inches) on the 18th, at 9 P.M., wind S.S.E. The mean temperature of the air was 48·5°, the maximum registered was 63·8°, and the minimum 27·0°. The 6th was the warmest day, and the 16th the coldest night. The mean of the dry bulb was 48·4°, and of the wet bulb 46·7°. The maximum heat in sun was 112·0°, and the minimum on the grass 23·7°. The minimum on the grass was below 32° on 7 nights. The total amount of sunshine recorded was 64·3 hours, the greatest daily amount being 8·4 hours on the 7th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·6. Rain or snow fell on 27 days. The rain-fall measured 5·202 inches; the greatest amount in 24 hours was 0·737 inch on the 8th.

November.—The mean height of the barometer during this month was 29·929 inches; the highest reading (30·498 inches) was on the 30th at 9 A.M., air calm, and the lowest (28·940 inches) on the 26th, at 9 A.M., wind E.N.E. The mean temperature of the air was 42·8°, the maximum registered was 56·8°, and the minimum 24·6°. The 2nd was the warmest day, and the 25th the coldest night. The mean of the dry bulb was 42·5°, and of the wet bulb 41·3°. The maximum heat in sun was 84·5°, and the minimum on the grass 19·5°. The minimum on the grass was below 32° on 20 nights. The total amount of sunshine recorded was 68·5 hours, the greatest daily amount being 6·7 hours on the 18th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain or snow fell on 16 days. The rain-fall measured 2·362 inches; the greatest amount in 24 hours was 0·590 inch on the 27th.

December.—The mean height of the barometer during this month was 29·784 inches; the highest reading (30·245 inches) was on the 23rd at 9 P.M., air calm; and the lowest (28·837 inches) on the 8th, at 9 A.M., wind S.W. The mean temperature of the air was 41·9°; the maximum registered was 54·3°, and the minimum 27·5°. The 20th was the warmest day, and the 7th the coldest night. The mean of the dry bulb was 41·8°, and of the wet bulb 40·0°. The maximum heat in sun was 82·6°, and the minimum on the grass 23·0°. The minimum on the grass was below 32° on 16 nights. The total amount of sunshine recorded was 42·2 hours, the greatest daily amount being 5·5 hours on the 5th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·5. Rain or snow fell on 20 days. The rain-fall measured 2·165 inches; the greatest amount in 24 hours was 0·670 inch on the 19th.

THE YEAR 1907.

The total number of births registered in Ireland during the year 1907 (as returned by the Registrars) was 101,563, or 23·2 per 1,000 of the population estimated in the middle of the year, and the total number of deaths was 77,410, or 17·7 per 1,000. Of the 77,410 deaths, 3,222, equal to 0·7 per 1,000 living, were caused by one or other of the principal epidemic diseases.†

In the Urban Districts, which contain about one-third of the total population, the birth-rate was 28·4 per 1,000 of the population: the death-rate (all causes) 21·0, and the epidemic death-rate 1·4 per 1,000. The corresponding rates for the remainder of the country are—births, 20·3; deaths from all causes, 15·8; and deaths from the principal epidemic diseases, 0·4.

According to the returns of Vaccination furnished by the Registrars there were 89,207 successful primary vaccinations performed during the year.

URBAN DISTRICTS.

TABLE VIII.—BIRTHS and DEATHS registered during the YEAR 1907, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of Deaths from each of the PRINCIPAL EPIDEMIC DISEASES;† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin, and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the fifty-two weeks ending Saturday, 23rd December, 1907.

* Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, typhoid (origin uncertain), enteric fever, and diarrhoeal diseases.

† The rates for the total of Ireland, and those for the districts in the Dublin Registration Area, for Belfast, and Londonderry, have been calculated on the population estimated to the middle of 1907.

‡ Formerly described as "Simple continued Fever."

(a) Including 44 deaths from cerebro-spinal fever or cerebro-spinal meningitis.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 316 and 317), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind observations at Valencia are based on the records of a standard Robinson anemometer (factor 2·2). Velocities between 13 and 38 miles in the hour have been entered in the Tables as strong winds, velocities of 39 miles in the hour, or above, as gales. At the remaining stations the wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

* The Hours of Observation are 9 a.m. and 9 p.m., local time, at all the Stations except Malin Head, Donaghadee, Cloud amount is observed at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m.; and where also Greenwich time is Roche's Point, are based on the morning observations only. They are printed in different type to distinguish them.

The Averages are based on observations as follows:—Rainfall 35 years, 1871-1905; Temperature 35 years, of Moderate and Strong wind (force 4-7), the number of observations of Calm, and the number of days of Gale

‡ The Sunshine Values for Dublin are obtained at the Mountjoy Observatory in the Phoenix Park, and the

NOTE.—This table has been constructed for the years 1833 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1907—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1891, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars Districts in italics. The letter *W* denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—No illness prevalent in my district during the quarter. Of the eight deaths registered, the ages of six were 90, 83, 82, 74, 67, and 64 years.

CARLOW; *Bagenalstown*.—During the quarter there were registered one death at 70 years, one at 81, and 1 at 90, and one death from drowning, on which an inquest was held. The district is healthy.

CARLOW; *Borris*.—District exceptionally healthy. One death registered at 99 years.

CARLOW; *Clonegall*.—The severe weather prevented children being brought in for vaccination.

CARLOW; *Fennagh and Myshall*.—Two deaths were registered, each 96 years of age.

CARLOW; *Leighlinbridge*.—District healthy.

NEW ROSS; *St. Mullins*.—District exceptionally healthy.

Dublin County.

DUBLIN SOUTH; *Tallaght*.—New cottages are getting erected. No serious illness during quarter.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District in a good healthy, sanitary condition.

RATHDOWN; *Dundrum and Glencullen, No. 1*.—Epidemic of mumps in district during quarter.

Kildare County.

ATHY; *Castledermot*.—District healthy

BALTINGLASS; *Baltinglass, No. 2*.—Most vaccinations postponed during severe weather of winter months.

CELBRIDGE; *Celbridge, W.*—The small-pox cases removed from Leixlip all recovered. No other cases reported in the Union. District healthy.

CELBRIDGE; *Kilcock*.—During the quarter just ended whooping-cough has been very prevalent in this district, and since the weather became cold the epidemic has increased in severity, children under 12 months suffering terribly.

CELBRIDGE; *Maynooth*.—Two cases of small-pox, one of which was a baby six weeks old; both recovered.

EDENDERRY; *Carbury*.—Vaccination delayed owing to whooping-cough and wet weather.

EDENDERRY; *Rathangan, No. 1*.—Two deaths registered from pulmonary phthisis; a married woman, aged 39; duration of illness, 10 weeks here. She came from Dublin, where she had been living, hoping to improve in her native locality. The other a spinster, aged 22; duration of disease, one year. Her sister died some years ago at same age from same disease, contracted by attending a relative, who was dying from consumption of a very bad type. Also the death of a boy, aged 16, from tuberculosis. He was attacked almost everywhere limbs, kidneys, and lungs. It is about six years ago since he was first attacked. He had been a very healthy child previously. Also the death of a girl, aged 22, from acute pneumonia; duration, eight days; cause, October chill from wearing a too light blouse.

NAAS; *Ballymore Eustace*.—Measles is prevalent; one death occurred from measles.

NAAS; *Kildare*.—One case of diphtheria registered during quarter; otherwise district healthy.

NAAS; *Naas and Carragh, W.*—No prevailing disease.

NAAS; *Robertstown and Kilmeage*.—Whooping-cough very prevalent in district.

Kilkenny County.

CALLAN; *Callan, W.*—Two deaths registered from cancer. In one case the patient's father and grandfather are stated to have died of same disease.

CALLAN; *Kilmaganny*.—District healthy.

CASTLECOMER; *Ballyragget*.—Sanitary arrangements very fair. All the diseases named in the Abstracts absent. Owing to the very wet weather vaccination was postponed in a number of cases.

CASTLECOMER; *Castlecomer, W.*—The district is at present free from any epidemic.

KILKENNY; *Tiscoffin*.—Health of the district good.

KILKENNY; *Tullaroan*.—Birth and death rate below the average, and all registered in the district. Health of district good.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Graigie*.—Ages of some of the persons whose deaths were registered during the quarter were 96, 88, 79, 78, 73 (3), 72, 70.

THOMASTOWN; *Inistioge*.—District healthy. Sanitary arrangements fairly satisfactory.

THOMASTOWN; *Knocktopher*.—There was a regular epidemic of scabies in one portion of district in the early portion of this quarter, but it now has subsided, and district is in a very healthy condition.

URLINGFORD; *Urlingford, W.*—Health of district good; measles of a mild form prevalent for some time through district.

King's County.

BIRR; *Banagher*.—District very healthy.

BIRR; *Kinnitty*.—Health of district good.

MOUNTMELICK; *Clonygowan, No. 2*.—District very healthy. Cases of chicken-pox numerous. Vaccinations small.

TULLAMORE; *Killoughy*.—District fairly healthy. Of the twelve deaths registered eight were 70 years and upwards.

TULLAMORE; *Philipstown*.—State of the district generally healthy.

Longford County.

BALLYMAHON; *Abbeyshrule*.—Three cases of cancer registered.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinalee*.—The district is in a good sanitary condition and free from contagious disease.

GRANARD; *Granard, W.*—The district is in a good sanitary condition and free from contagious diseases.

GRANARD; *Scrabby, No. 2*.—The district is free from any contagious diseases.

LONGFORD; *Longford, W.*—Death of a man aged 102 years registered this quarter.

Louth County.

ARDEE; *Castlebellingham*.—District healthy, and the sanitation good.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Termonfeckin*.—My district has been free from infectious disease for past quarter.

DUNDALK; *Barronstown*.—The district is in a healthy and sanitary state. A number of pumps have been erected, and the water supply is now in a satisfactory state. With the exception of two cases of diphtheria there has been no zymotic disease.

DUNDALK; *Dromiskin*.—District healthy.

Meath County.

ARDEE; *Collon, No. 2*.—District very healthy.

ARDEE; *Drumcondra*.—District healthy.

DROGHEDA; *St. Mary's*.—The sanitary state of the district is good.

DROGHEDA; *Stamullen*.—District is in a healthy state.

DUNSHAUGHLIN; *Killeen*.—Vaccination postponed owing to either delicacy of child or mother, or else severity of weather. Some of the houses in district quite unfit for human habitation.

DUNSHAUGHLIN; *Ratoath, W.*—The district is in a very good sanitary condition.

DUNDERRY; *Ballyboggan*.—Two cases of diphtheria occurred one of which died the other recovered; and as no other case has occurred it is to be hoped the disease has been stamped out of the district.

KELLS; Moynalty.—Of the thirteen deaths registered, four were caused by tubercular disease.

KELLS; Nobber.—The district maintains its normal state of health. Sanitary rules appear to be fairly observed, and vaccination better attended to.

NAVAN; Painestown.—There were a few cases of whooping cough and a few cases of scarlatina in the district during quarter.

OLDCASTLE; Oldcastle, W.—The district continues in a satisfactory condition.

Queen's County.

ABBEYLEIX; Ballinakill.—District very healthy during the quarter.

CARLOW; Ballickmoyler.—The death of one person registered whose age was stated to be 104 years.

MOUNTMELICK; Clonygowan, No. 1.—There have been many cases of chicken-pox amongst children. Vaccination cases small; district otherwise very healthy.

MOUNTMELICK; Mountrath.—One death of a woman stated to be 105 years. I have known her for forty years and she was always an old woman. Eleven deaths over 70 years.

ROSCREA; Borris-in-Ossory.—The health of this district has been good during the past quarter.

Westmeath County.

ATHLONE; Athlone No. 1, W.—There were six deaths registered and the ages respectively were 88, 83, 82, and 80 (3).

BALLYMAHON; Ballymore.—Age of one man returned as 101 years.

DELVIN; Delvin, W.—One patient whose death is not yet registered died in the hospital from pulmonary tuberculosis. As far as I know there is no person in the district suffering from pulmonary disease.

MULLINGAR; Ballynacarrigy.—The number of births registered during quarter is lower than average. Of the deaths registered the joint attentions of cancer and tuberculosis claimed one-third, diphtheria is credited with one victim, and one was claimed by the fire-fiend. Of the remainder two were uncertified, and eight were over sixty. One old man of 74 years died from obstructed femoral hernia.

MULLINGAR; Castletown Geoghegan.—Condition satisfactory as regards sanitation.

MULLINGAR; Killucan.—Health of the district very good.

MULLINGAR; Milltown.—Wet changeable weather characterised last quarter from the 1st day of October to the last day of December, and as might be expected rheumatism, throat, and chest affections

were exceedingly numerous. There was one death from phthisis—a young man aet 25 years; and altogether the deaths were in excess of the births, and this is all the more remarkable since three-fourths of the deaths were of old people ranging from 85 to 100 years. The real explanation of this is the low marriage rate, together with the late period in life of the contracting parties. In this district it is remarkable how tuberculosis selects damp badly-drained houses. This disease broke out in a labourer's cottage with these defects, and in which a labourer, his wife and five children resided. Owing, however, to the early detection of the disease by the medical officer and the prompt measures taken by the District Council for the thorough drainage of the cottage the lives of four of the children were saved. There are no vaccination defaulters from last quarter. There was one death only from cancer.

MULLINGAR; Mullingar, W.—Health of the district fairly good.

Wexford County.

ENNISCORTHY; Newtownbarry.—Owing to the wet autumn and winter children have not been brought in from country for vaccination.

GOREY; Camolin.—The sanitary condition of the district is good. Vaccination backward owing to the apathy of parents. One death registered from pulmonary tuberculosis.

NEW ROSS; Fethard, No. 2.—The number of deaths registered for the quarter is unusually small.

NEW ROSS; New Ross, W.—District unusually healthy. There was an epidemic of mumps, but no serious epidemic disease during the quarter.

WEXFORD; Crossabeg.—Whooping-cough prevalent in district, otherwise extremely healthy.

Wicklow County.

BALTINGLASS; Baltinglass, No. 1, W.—Most vaccinations postponed during severe weather of winter months.

BALTINGLASS; Kiltegan.—The health of district continues to be normal, deaths with two exceptions being of very old people. One old lady died rather suddenly on public road when going to divine service. No inquest considered necessary.

NAAS; Blessington.—Owing to whooping-cough vaccinations were postponed.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—The health of the district is satisfactory.

RATHDRUM ; Annamoe. — District healthy during the quarter, as you will see by the small number of deaths registered. There have been two or three more but not registered yet.

RATHDRUM ; Newcastle. — Certain parts of my district very bad.

RATHDRUM ; Wicklow. — Diphtheria and whooping-cough prevalent.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN ; Ballyvaghan, W. — Vaccination postponed owing to the prevalence of inclement weather. Sanitary state of district very good.

CORROFIN ; Corrofin, W. — General health of district fairly good. Very free from zymotic disease.

ENNIS ; Crusheen. — Health of district good.

ENNIS ; Newmarket. — The general health of the district has been good, and there has been a complete absence of any form of zymotic disease.

ENNISTIMON ; Ennistimon, W. — The sanitary arrangements are satisfactory. Vaccination is not attended to.

ENNISTIMON ; Roadford. — District healthy.

KILLADYSERT ; Ballynacally, W. — Health of the district very good.

KILRUSH ; Carrigaholt. — During the past quarter the health of district very good.

KILRUSH ; Kilkee. — Sanitary state of district fairly good.

KILRUSH ; Kilrush, W. — Health of district has been good.

LIMERICK ; Bridgetown. — Sanitary condition of district fairly good.

LIMERICK ; Coolacasey. — The sanitary condition of the district is satisfactory. There was no case of tuberculous disease registered during the quarter. There was no case of cancer registered during the quarter.

SCARRIFF ; Annacarriga. — Considerable number of children suffering from catarrh.

SCARRIFF ; Feake. — District healthy.

SCARRIFF ; Mountshannon, W. — District very healthy generally.

TULLA ; Quin. — The district is in a fairly healthy condition.

Cork County and County Borough.

BANDON ; Inishannon. — The district has been very free from sickness.

BANDON ; Murragh. — Vaccination postponed owing to inclemency of the weather.

BANTRY ; Bantry, W. — Health of the district very good ; no cases of zymotic disease. Vaccination very backward, owing to parents not being compelled to bring in their children in proper time. One case of cancerous disease.

BANTRY ; Durrus and Kilcrohane. — District fairly healthy. The two cases registered from phthisis were from neglected colds, and not hereditary ; four of the deaths registered were the following ages—91, 81, 75 and 63 years. No cases of cancer.

BANTRY ; Glengarriff. — District in a fairly satisfactory condition ; no epidemic during the quarter.

BANTRY ; Kealkill. — Sanitary condition of district is fairly good. No case of malignant disease. Vaccination is up to usual standard. Of the four deaths registered, two were over 80 years of age, and one over 70 years.

CASTLETOWN ; Castletown, W. — The district is very healthy. I have no case of infectious disease during the quarter.

CASTLETOWN ; Kilcatherine. — District healthy.

CLONAKILTY ; Timoleague. — Tubercle of lung is by far the most prevalent disease in the district. With the present accommodation for its treatment the disease is bound to advance. I am at present treating ten cases, and if I searched I could find as many more.

CORK ; Carrigaline, No. 1. — Vaccinations not up to the proper number ; caused by bad weather.

CORK ; Carrigaline, No. 2. — A few cases of mild scarlatina during the quarter. Bronchitis and chest complaints prevalent, especially amongst children.

CORK ; Douglas. — No case of cancer.

CORK ; Dripsey. — The district was free from any of the infectious fevers during the quarter. The sanitary condition is fairly good.

DUNMANWAY ; Coolmountain. — Cases of diphtheria occurred in two houses situated a considerable distance apart. There were three deaths registered—one uncertified. Measles of a mild type appeared in one portion of the district. Two certified cases of cancer occurred among the deaths. Vaccination continues satisfactory.

DUNMANWAY ; Dunmanway, W. — District healthy. An epidemic of measles the first two months of the quarter, of a mild type ; now gone.

KILMALLOCK ; Charleville. — The district is very healthy.

KINSALE; Ballyfeard.—Health of district good. An epidemic of parotitis complicated with severe gastric derangement occurred during quarter; no deaths.

MACROOM; Cannaway.—This district is in a good sanitary condition. There has been no epidemic disease during past quarter.

MALLOW; Ballyclogh.—District healthy.

MALLOW; Buttevant.—Sanitary state of district very satisfactory.

MALLOW; Kilshannig.—Whooping-cough has been prevalent in district for the past month.

MALLOW; Rahan.—District healthy during the past quarter. No infectious disease except scarlatina in one house which attacked three children who were sent to hospital at once.

MIDDLETON; Aghada.—District very healthy. All deaths registered were over 60 years of age.

MITCHELSTOWN; Kildorrery.—There have been two cases of contagious disease during past quarter (enteric fever) which were removed to hospital and recovered. Portions of this district are most insanitary. One village is without any system of sewerage, and the backyards are in most cases regular cesspools from which there is no outlet.

SKIBBEREEN; Skibbereen, W.—No infectious disease in district during past quarter.

SKIBBEREEN; Union Hall.—Pertussis has been prevalent, and vaccination has been postponed in most cases.

SKULL; Goleen.—A pure supply of drinking water needed in one village. The district is otherwise in a good sanitary condition.

SKULL; Skull, W.—District healthy; no infectious disease. Vaccination retarded by severity of the weather.

Kerry County.

CAHERSIVEEN; Caher, W.—There were no vaccinations performed this quarter owing to the inclemency of the weather.

CAHERSIVEEN; Darrynane.—With the exception of imported measles, which unhappily proved fatal in a few cases, as far as I know the general condition of the district has been healthy and free from any contagious disease.

CAHERSIVEEN; Glunbehy.—There has been no case of cancer in my district during this quarter. Sanitary state of district good.

CAHERSIVEEN; Valencia.—District very healthy during quarter.

DINGLE; Dingle, W.—The district has been very healthy for the last three months, with the exception of a few cases of influenza and pneumonia, one case of scarlatina, and one case of measles.

DINGLE; Ventry.—The sanitary condition of district not very good owing to the incessant rain during past three months. Vaccination very backward owing to same cause. Pneumonia very prevalent during past six weeks, chiefly amongst the young. No death has, however, been registered as the result of it. One death aged 101 years registered.

KENMARE; Kilgarvan.—Vaccination backward owing to inclement weather.

KILLARNEY; Coom.—The sanitary condition of this district is becoming much improved. Tuberculosis is extremely prevalent. Vaccination was impossible owing to severity of weather.

KILLARNEY; Killarney, No. 1, W.—No zymotic disease in district.

KILLARNEY; Milltown.—District healthy. No contagious or infectious disease. The sanitary state of the district is very fair.

KILLARNEY; Molahiffe.—Two deaths from phthisis have occurred in the district and have been registered during the quarter.

LISTOWEL; Ballyhorgan.—Sanitary state of district good.

LISTOWEL; Ballylongford.—District for quarter fairly healthy; a good many deaths from old age. There were a few isolated cases of typhoid; usual precautions taken to prevent spread. Postponed all vaccinations on account of severity of weather.

LISTOWEL; Listowel, W.—District healthy.

TRALEE; Brosna, No. 1.—District healthy.

TRALEE; Castlemaine.—Owing to the prevalence of typhoid fever in the district during the quarter ended vaccination defaulters were not compelled to comply with the law.

TRALEE; Kilgobban.—The district is healthy at present.

Limerick County and County Borough.

KILMALLOCK; Bruree.—Had a number of cases of influenza with pulmonary complications. Registered two deaths aged 90 years, a male and female. Vaccination backward on account of the very severe weather, and children could not be brought in.

KILMALLOCK; Hospital.—District healthy.

KILMALLOCK; Kilfinane.—District healthy for past quarter.

KILMALLOCK; *Kilmallock W.*—One case of enteric fever. District healthy.

LIMERICK; *Annacotty.*—Sanitary arrangements very fair. Whooping-cough of a mild type prevalent.

LIMERICK; *Caherconlish.*—Measles prevalent, there was only one case in the last week of quarter, so I think it has abated.

LIMERICK; *Limerick, No. 3.*—There has been an epidemic of measles of a very bad type in my district during quarter. There have been 16 deaths from this disease.

LIMERICK; *Moroe.*—Sanitary condition of district fairly good. No deaths registered from tuberculous disease, nor from cancer. Of 12 deaths registered, one was at 95 years, one each at 92, 90, 83, 81, and 77, and two at 73 years. Of 20 births registered 14 were males.

LISTOWEL; *Glin.*—There were 5 deaths caused by pulmonary tuberculosis, two caused by cancer, and three uncertified. The health of people resident in district fairly good during quarter just ended. There was one case of enteric fever of rather mild type.

MITCHELSTOWN; *Galbally.*—Measles of a mild type in part of district. Two cases of enteric fever, but of a mild type.

NEWCASTLE; *Abbeyfeale.*—No infectious disease this quarter.

NEWCASTLE; *Ardagh.*—The sanitary state of the district is pretty fair. Measles prevalent in district during quarter. No deaths from same up to the present.

RATHKEALE; *Askeaton.*—During the last quarter there was and is an epidemic of measles, which, with convulsions, caused one death; except this case all the others are running a normal course. Phthisis pulmonalis caused two deaths; malignant disease caused two deaths—one, in a woman of the uterus, and the second, in a man, of the rectum. Heart disease caused two deaths.

RATHKEALE; *Rathkeale, No. 1, W.*—A severe epidemic of measles in some parts of the district.

RATHKEALE; *Rathkeale, No. 2.*—There was a slight outbreak of measles in one part of my district during the early part of the month of December, 1907; otherwise my district was in a healthy condition.

TIPPERARY; *Grean.*—Measles of a mild type was prevalent during the quarter. There was one death registered at 100 years—a labourer, who enjoyed good health up to a short time before his death.

Tipperary County, North Riding.

BORRISOKANE; *CloghJordan.*—One case of scarlatina in an adult. Infection probably conveyed from a north-west county; otherwise district is healthy.

BORRISOKANE; *Terryglass.*—District healthy.

NENAGH; *Nenagh W.*—District healthy. One case of measles during last week of quarter, which was removed to hospital.

NENAGH; *Newport.*—District healthy.

NENAGH; *Portroe.*—District healthy, with the exception of one case of enteric.

THURLES; *Moyne.*—District healthy; no disease.

THURLES; *Thurles, W.*—Seventeen cases of enteric fever were admitted to hospital from one institution during the quarter. Five deaths occurred out of a total of 40 cases.

Tipperary County, South Riding.

CALLAN; *Ballingarry.*—The health of the district is very good.

CALLAN; *Mullinahone.*—Sanitary condition of district fairly good, no epidemic or other disease prevalent. The four deaths registered were all over 60 years; one of them 82 years. No case of cancer or tuberculous disease that I am aware of in district at present.

CARRICK-ON-SUIR; *Garrangibbon.*—The district is in a very healthy condition. Of the seven deaths, five were aged 94, 90, 84, 82, and 69 years, respectively.

CASHEL; *Killenaule.*—The health of the district good.

CASHEL; *Tullamain.*—Of the deaths of persons registered during the quarter one reached the age of 100 years, the average age reaching the high figure of 77 years.

CLOGHEEN; *Caher.*—Measles was prevalent in the district during the past quarter. No deaths occurred from same. The district is now in a very healthy state.

CLOGHEEN; *Clogheen W.*—District free from epidemic diseases.

CLONMEL; *Clonmel W.*—Measles prevalent in the urban district during November and December.

TIPPERARY; *Bansha.*—District healthy.

TIPPERARY; *Cappagh.*—Owing to the epidemic of measles, vaccination was postpone. The sanitary condition of district is satisfactory.

TIPPERARY; *Tipperary, W.*—No vaccination during quarter owing to measles.

URLINGFORD; *Kilcooly.*—The district was healthy during past quarter, with the exception of one case of enteric fever.

Waterford County and County Borough.

CLONMEL ; Ballymacarbray.—Deaths registered at the ages of 88, 80, 77, 76, 75, 74, 72, 70, and 62 years, respectively. Sanitary condition fair. A great number of catarrhal affections during quarter but no infectious diseases.

DUNGARVAN ; Dungarvan W.—District healthy during past quarter.

DUNGARVAN ; Whitechurch.—There were three cases of enteric fever during the quarter.

LISMORE ; Ballyduff.—General health of district very satisfactory.

LISMORE ; Tallow.—District free from zymotic disease, and in good sanitary condition.

WATERFORD ; Waterford Urban, No. 1, W.—The domestic sanitary arrangements in parts of the city are bad. Some cases of scarlatina of a mild type during the quarter. Tuberculosis enters into the cause of death in almost one-fifth of the deaths. Vaccination well carried out considering the season.

WATERFORD ; Woodstown.—The district is in a good sanitary condition.

YOUGHAL ; Ardmore.—Healthy district.

YOUGHAL ; Clashmore.—Vaccination postponed owing to inclemency of weather.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM ; Doagh.—District in fair sanitary condition. No infectious disease epidemic ; a few sporadic cases of scarlatina and German measles in the early part of the quarter.

ANTRIM ; Randalstown.—One death was caused by cerebro-spinal meningitis.

ANTRIM ; Templepatrick.—The sanitary arrangements of the district (with few exceptions) are good. Influenza has been rather prevalent during the quarter.

BALLYCASTLE ; Croagh.—The sanitary arrangements are fairly good. Some of the houses might be kept cleaner.

BALLYCASTLE ; Cushendall.—The one case of tubercular disease came to the district suffering with it.

BALLYMENA ; Ballymena, W.—Town and district on the whole healthy—some cases of influenza.

BALLYMENA ; Broughshane.—Health of district good. No epidemic disease.

BALLYMENA ; Clogh.—During the quarter there was one case of diphtheria, and three of scarlatina, but no deaths from either. Otherwise the district is fairly healthy. Sanitary arrangements fair.

BALLYMENA ; Galgorm.—A few cases of measles with no deaths. No other zymotic disease.

BALLYMENA ; Portglenone.—Health of district is good. There was a limited outbreak of measles at the commencement of this quarter.

BALLYMENA ; Toome.—Health of district satisfactory.

BELFAST ; Belfast Rural, No. 3.—No death has occurred from cerebro-spinal fever.

BELFAST ; Belfast Rural No. 4.—No epidemics.

LARNE ; Ballycarry.—Sanitary condition of district fairly good. Whooping-cough prevalent ; vaccination of children postponed on account thereof. Some cases of typhoid fever and diphtheria, but no serious epidemic.

LARNE ; Waterfoot.—Sanitary arrangements of district very good. No illness of any kind at present in the district ; of the 4 deaths registered the ages of three of them are respectively, 81, 75, and 72.

LISBURN ; Dunmurry.—The sanitary condition of this district good. No epidemic of any kind.

LISBURN ; Glenavy.—Deaths this quarter much below average and occurring in the extremes of life ; two only between one and 60 years of age. I could not trace any family history in the three cancer cases.

LISBURN ; Knocknadona.—The sanitary condition of this district is good. Four deaths were registered from cancer, one from ulceration of stomach, one from carcinoma of liver, one tumour of liver, and one gastric ulcer ; one abdominal tuberculosis.

LISBURN ; Lisburn, W.—One death caused by cancer ; the son who was informant stated there was no history of cancer in his mother's family.

Armagh County.

ARMAGH ; Armagh, W.—Three cases of croup (membranous) have been registered.

ARMAGH ; Markethill.—The district has been very healthy during the past quarter.

ARMAGH ; Rich Hill.—Measles was prevalent in part of district during the quarter and caused two deaths.

ARMAGH ; Tynan.—District is in a very healthy state.

LURGAN ; Lurgan, No. 1, W.—An outbreak of scarlatina occurred towards the middle of the quarter in the urban district, but was promptly checked. One death however, resulted.

LURGAN; Lurgan, No. 2.—This district is in a good healthy state and free from any infectious disease.

NEWRY; Ballybot, W.—There have been a great many cases of measles, but no deaths registered from this cause.

NEWRY; Mullaghglass.—District healthy.

NEWRY; Poyntz Pass.—Vaccinations are only of those on Register of Births.

Belfast County Borough.

BELFAST; Belfast Urban, No. 1.—One death from cerebro-spinal fever was registered during the quarter.

BELFAST; Belfast Urban, No. 3.—There was one death registered during the quarter from cerebro-spinal fever and one death from cerebro-spinal meningitis (epidemic). Details of these two deaths have been already supplied in my weekly returns.

BELFAST; Belfast Urban, No. 4, W.—Three deaths from cerebro-spinal fever and three deaths from cerebro-spinal meningitis.

BELFAST; Belfast Urban, No. 9.—No death has occurred from cerebro-spinal fever.

BELFAST; Belfast Urban, No. 11.—Measles has been prevalent during the quarter, but the death-rate has been low. There have been a few cases of cerebro-spinal fever in the district during the quarter, but only one death was registered.

BELFAST; Belfast Urban, No. 13.—No deaths from cerebro-spinal fever.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—District is in a healthy condition.

BAWNBOY; Swanlinbar.—Sanitary condition good. No epidemic during the quarter.

CAVAN; Cavan, W.—One death registered at age of 100 years.

CAVAN; Killashandra.—Sanitary state of the district improved. No epidemic.

CAVAN; Stradone.—Vaccination has been postponed in all cases owing to prevalence of whooping-cough.

COOTEHILL; Drum, No. 2.—The district is in good sanitary condition.

COOTEHILL; Tullyvin.—During the quarter one death was registered at 97 years and another at 98 years, two more at over 80 years, and altogether twelve over 60 years. District free from contagious disease.

ENNISKILLEN; Holywell, No. 2.—The public health of the district is fairly good.

GRANARD; Scrabby, No. 1.—The sanitary state of district is good.

OLDCASTLE; Ballyjamesduff.—District healthy.

Donegal County.

BALLYSHANNON; Ballintra.—The sanitary conditions of district fairly good, but water supply bad.

DONEGAL; Donegal, W.—District healthy.

DONEGAL; Dunkineely.—District healthy except for measles of mild type.

DONEGAL; Mountcharles.—District healthy.

DONEGAL; Pettigoe.—District healthy.

DUNFANAGHY; Crossroads.—District is free from disease of any sort.

DUNFANAGHY; Tory Island.—No vaccination during last quarter.

GLENTIES; Ardara.—District healthy. Primary vaccination below average owing to inclemency of weather.

GLENTIES; Carrick.—The district is in a fairly good sanitary condition; the cold weather interfered with vaccination to a certain extent. There has been no epidemic during the quarter.

GLENTIES; Doocharry.—District healthy.

GLENTIES; Killybegs.—No outbreak of infectious disease in district during quarter.

INISHOWEN; Buncrana.—District healthy.

INISHOWEN; Carndonagh W.—District fairly healthy.

INISHOWEN; Clonmany.—Vaccination in a backward state owing to the severity of the weather.

INISHOWEN; Malin.—District healthy. Ten deaths of persons over 60 years of age were registered, the ages being 110, 94, 88, 87, 83, 80, 74, 70 (3) years, respectively.

INISHOWEN; Moville.—District healthy.

LETTERKENNY; Church Hill.—District healthy; no epidemic.

LETTERKENNY; Manorcunningham.—The sanitary condition of the district is good.

LONDONDERRY; Burt.—A very small birth rate this quarter.

MILLFORD; Fanad.—Health of district good. No outbreak of infectious disease during quarter.

MILLFORD; Rathmullan.—The district has been healthy during quarter.

MILLFORD; Rosguill.—Typhoid fever occurred in two families in the district during the past quarter resulting in one death. There was one case of scarlet fever and one of diphtheria; both recovered. The district is now free from the above-mentioned infectious diseases, but whooping-cough is prevalent with one fatal case up to the present. Sanitation of district fairly satisfactory. There has been only one death from pulmonary tuberculosis during this quarter.

STRABANE; Raphoe.—Sanitary arrangements satisfactory. Severe epidemic of whooping-cough, and many cases of influenza. District otherwise healthy.

STRANORLAR; Cloghan.—Sanitary arrangements satisfactory.

Down County.

BANBRIDGE; Ballyward.—Sanitary state of district fairly good. One death from diphtheria. Influenza very prevalent.

BANBRIDGE; Loughbrickland.—The sanitary arrangements in the district are fairly good. Whooping-cough and measles were prevalent during the month of December; also influenza.

BELFAST; Castlereagh, No 1.—No deaths from cerebro-spinal fever.

DOWNPATRICK; Ballynahinch.—There have been numerous cases of influenza during the last month of the quarter.

DOWNPATRICK; Downpatrick, W.—Two primary vaccinations were of children born out of the district. In six cases influenza was certified as a factor in cause of death.

DOWNPATRICK; Killyleagh.—The public health during the quarter just ended has been good. There has been no epidemic, but there have been a good many cases of follicular tonsilitis. The water supply of the village of Crossgar has been improved by the erection of two new pumps.

DOWNPATRICK; Portaferry.—Two mild cases of scarlet fever occurred in the second month of the quarter. Health of district good.

KILKEEL; Kilkeel, No. 2. W.—Health of district good, but water supply indifferent.

LISBURN; Annahilt.—District free from infectious disease.

LISBURN; Drumbeg.—Births and deaths under the average. Two of the deaths were due to cancer. No death was registered as due to tubercle. Three cases each of scarlatina and diphtheria occurred during the quarter; patients were sent to hospital, and no fresh cases have occurred.

LISBURN; Saintfield.—Health of district good.

LURGAN; Moira.—Scarlatina of a mild type has been in the district during the past quarter. Patients are much more easily persuaded to go to hospital nowadays than they were thirty years ago, and this, taken with the closing of schools, checked the epidemic. One case of carcinoma. No deaths of infants under a year old.

LURGAN; Waringstown.—District healthy. Influenza in one portion of my district during the last few weeks.

NEWRY; Donaghmore.—Sanitary arrangements fair. Health of district very good—much mild influenza.

NEWRY; Newry, No. 1.—There have been a great many cases of measles, but only one death registered from this cause.

NEWRY; Rathfriland.—During the quarter there has been an epidemic of measles, but none of the cases have been fatal. The sanitary condition of the district is very good.

NEWTOWNARDS; Bangor.—Sanitary arrangements very good. Scarlet fever epidemic during quarter—no death resulted; all mild type. Vaccination more than usual.

NEWTOWNARDS; Comber.—The quarter has been remarkable for the deaths of aged people. Out of a total of twenty-three deaths, one was over 90, four between 80 and 90, nine between 70 and 80 and 2 between 60 and 70. Out of the three deaths of children under one year, two only survived a few minutes from birth. Health of district very good; a few isolated cases of scarlatina; otherwise no epidemic.

NEWTOWNARDS; Greyabbey.—Births and deaths below average. No epidemic, except mild form of influenza. A few cases of whooping-cough in Greyabbey division—one death therefrom. Of the twenty deaths, eight were of persons over 60 years.

NEWTOWNARDS; Newtownards, W.—One rural case of scarlet fever and four urban cases were notified. The district has been particularly free from infectious diseases. There has been less sickness than usual in the district.

Fermanagh County.

BALLYSHANNON; Church Hill.—District healthy.

CLONES; Rosslea.—One of the deaths from tuberculosis is not certified, cause of death appearing as possibly due to pulmonary tuberculosis.

ENNISKILLEN; Enniskillen, W.—Sanitation fairly good.

ENNISKILLEN; Florencecourt.—The district is in a fairly sanitary state, and free from infectious disease of any kind. A great many people are suffering from bronchitis and pneumonia.

ENNISKILLEN; Holywell, No. 1.—The public health of the district is fairly good.

IRVINESTOWN; *Clonelly*.—District at present healthy. One case of measles during the quarter.

IRVINESTOWN; *Ederney*. — District healthy. Deaths registered at 102, 92, 87, 86, 82, 78 (2), 75, 70, and 65 years, respectively.

IRVINESTOWN; *Irvinestown, W.*—Pertussis prevalent during quarter.

LISNASKEA; *Derrylin*.—Influenza and pertussis have been epidemic in the district during the quarter. The sanitary condition of the district remains as before.

LISNASKEA; *Lisnaskea, W.* — Sanitary state of district fair. Vaccination delayed, owing to pertussis being prevalent during quarter.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—The sanitary arrangements are fairly satisfactory. The district has been healthy during quarter. Cancer cases are unusually numerous.

COLERAINE; *Garvagh*.—Health of district during past quarter was particularly good. During the last week bad colds have been prevalent (probably the beginning of influenza).

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*. — District healthy during past quarter.

LIMAVADY; *Limavady, W.* — The sanitary arrangements in the district are very good, and the condition of the people from a public health point of view is satisfactory. One case of diphtheria occurred during the quarter.

MAGHERAFELT; *Moneymore*.—District has been wonderfully healthy during quarter; low death rate; no epidemic of any kind.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.* —Sanitary condition of district good. Fifteen deaths registered during quarter of people whose ages ranged from 75 to 97 years.

CARRICKMACROSS; *Donaghmoyne*.—One case of scarlet fever occurred early in October; patient removed to hospital; disease did not spread.

CASTLEBLAYNEY; *Ballybay*.—District very free from epidemic disease. Some cases of scarlet fever were attended, but the type was mild.

COOTEHILL; *Dawsongrove*.—The sanitary condition of the district is fairly good. The district was free from infectious disease during the quarter.

COOTEHILL; *Drum No. 1*.—The district is in good sanitary condition.

MONAGHAN; *Castleshane*. — District sanitary. Epidemic of whooping-cough in one locality in district. One case of scarlet fever, which was isolated.

MONAGHAN; *Emypale*.—The district is in a fairly good sanitary condition.

MONAGHAN; *Monaghan, W.*—The sanitary condition of this district remains satisfactory. There has been no special feature in diseases to call for particular notice, nor are there any circumstances affecting public health or vaccination deserving of special attention.

MONAGHAN; *Scotstown*.—The sanitary condition of the district is satisfactory. There has been no epidemic of any kind.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory; no epidemic of any kind.

CASTLEDERG; *Drumquin*.—The sanitary condition of the district is satisfactory, with no infectious disease of any sort.

CASTLEDERG; *Killeter*.—State of district is healthy.

CLOGHER; *Aughnacloy*.—District free from infectious disease, except influenza.

CLOGHER; *Ballyganley*.—Six deaths registered equalled 549 years. Sanitary condition fair.

CLOGHER; *Fivemiletown*.—The health of the district has been pretty good during the quarter. There were a few cases of scarlatina, but no deaths from this cause. There were two deaths from diphtheria.

COOKSTOWN; *Pomeroy*.—Very little sickness this quarter except colds and sore throats.

COOKSTOWN; *Stewartstown*. — There are some cases of influenza and also some of pneumonia.

DUNGANNON; *Caledon and Ballymagran*.—Catarrhal bronchitis is now prevalent amongst infants and young children. Public health good.

DUNGANNON; *Olsonavaddy*. — Sanitary arrangements good. No infectious disease.

DUNGANNON; *Coal Island*.—One case of diphtheria and one case of enteric fever during quarter. Both removed to Infirmary and recovered. Influenza has reappeared. I could not obtain any information as to origin of either of cancer cases in which death took place.

IRVINESTOWN; *Trillick*.—Of the persons whose deaths were registered one reached 87 years, one 86, two 83, one 75, one 74 and one 70. Two deaths from whooping-cough uncertified.

OMAGH; *Dromore*. — Whooping-cough was very prevalent during the quarter.

OMAGH; Drumquin.—The sanitary arrangements in the district are very satisfactory. None of the principal epidemic or other diseases are at present prevalent.

OMAGH; Fintona.—The health of the district has been good during the past quarter and free from epidemic disease. The sanitary arrangements are good.

OMAGH; Gortin.—Bad sanitary condition of the houses generally.

OMAGH; Omagh, No. 1 W.—Health of district is satisfactory. The sanitary condition of urban district continues to improve. Only 3 cases of infectious disease notified during the year. No improvement in rural district—absence of domestic and general cleanliness. Insanitary premises—dirty and ill-ventilated byres. Manure heaps and cess-pools in front of dwellings—in fact, general apathy as regards sanitation. This condition even applies to labourers' cottages.

OMAGH; Omagh No. 2.—This district is in good sanitary condition for the past three months. No epidemic of any kind.

OMAGH; Sixmilecross.—The district is at present in good sanitary condition. Three cases of diphtheria reported from near Omagh; one case fatal, the other two recovered.

STRABANE; Dunnamanagh.—There was one death registered at 100 years during the quarter.

STRABANE; Newtownstewart.—Of the uncertified deaths two were of those of persons qualified to receive free medical attendance, the ages at death being 67 and 69 years, and three were of persons who would have been obliged to pay for medical attendance, the ages being 19, 44, and 85 years.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; Roundstone, No. 1.—District healthy.

CLIFDEN; Roundstone, No. 2.—Health of the district satisfactory.

GALWAY; Galway, No. 3 (Arran).—District very healthy.

GALWAY; Moycullen.—Sanitary condition of district very fair.

GALWAY; Oranmore.—The district during past quarter has been remarkably healthy.

GALWAY; Spiddle.—District at present very healthy.

GALWAY; Turloughmore.—Sanitation has improved a good deal of late in the district.

GORT; Gort, W.—The health of the district is good.

GORT; Kinvarra.—The health of the district is fairly good.

LOUGHREA; Athenry.—The rural portion of the district is in a fairly good sanitary state, but the town of Athenry needs attention.

LOUGHREA; Bullaun.—Four out of ten deaths registered were of persons aged over 60 years, one being registered at 99 years.

OUCHTERARD; Cloonbur, No. 1.—Two deaths from pulmonary tuberculosis, but not yet registered. No death from malignant disease.

TUAM; Tuam No. 2.—One fatal case of diphtheria in November; no other since. One case of enteric recovered after removal to hospital. District healthy. Of the 9 deaths registered 3 were from malignant disease and 3 tuberculosis. These deaths from tuberculosis occurred in families with a history of tubercular disease in other members. I have noticed that phthisis often occurs in members of families with a neurotic tendency.

Leitrim County.

CARRICK-ON-SHANNON; Drumshanbo.—District in a very sanitary condition. Remarkable absence of fever during past six months.

MANORHAMILTON; Drumahaire.—Enteric has been epidemic during the quarter. I believe it has now almost subsided.

MANORHAMILTON; Manorhamilton, W.—Several cases of enteric fever in first month of quarter; none since.

MOHILL; Carrigallen.—The health of the district has been good during the quarter. There were a few cases of scarlatina, and one death from diphtheria not yet registered. The sanitary condition of the district is fairly good.

MOHILL; Mohill, W.—My district is in a very healthy state; there is no contagious disease at present.

MOHILL; Rinn.—The district is quite healthy. Sanitary arrangements are working fairly well.

Mayo County.

BALLINA; Ballina, W.—Vaccination is backward owing to measles and whooping-cough being so prevalent in the district. There are no other cases of infectious diseases in this district.

BALLINA; Crossmolina.—District in fair sanitary condition. Vaccination backward owing to severe weather and an outbreak of measles.

BALLINROBE; Cappaghduff.—A good many of the houses in the district require white-washing. Cattle are still housed in some of the villages.

BALLINROBE; Cong.—Health of district very good.

BALLINROBE; Hollymount.—Births under and deaths about the average. Vaccinations rather over the average owing to defaulters being brought in. One case of typhoid occurred in last quarter, and death registered in this quarter; no fresh case since.

BELMULLET; Binghamstown, W.—District in a satisfactory state. Vaccination backward in consequence of the inclemency of the weather.

CASTLEBAR; Balla.—Vaccination backward owing to severe weather. I believe there are a few cases of typhus in the district, but up to the present no deaths have been registered from the disease.

CASTLEBAR; Castlebar, No. 1, W.—A few cases of scarlet fever occurred during November. The cases were thoroughly isolated and the spread of the disease effectively checked. A wide-spread epidemic of measles of a mild type developed in December and presently continues to exist. The mortality, if any, will be exceptionally low, notwithstanding inclement weather and unusual heavy rainfall.

CLAREMORRIS; Ballindine.—District healthy. Two cases of cancer.

CLAREMORRIS; Ballyhannis.—Health of district good; no zymotics. Death-rate low; sanitation progressive.

KILLALA; Ballycastle.—District is in very insanitary condition. The majority of the houses are in their present condition unfit for human habitation. The people are too poor to build out-houses for their cattle and pigs, and are forced to share their dwellings with them.

KILLALA; Killala, W.—The health of the district has been satisfactory during the quarter. Measles and whooping-cough were confined to one village, although very prevalent in the adjoining districts.

WESTPORT; Achill.—General health and sanitary state of district good; no epidemic present, and no death from cancer. Very few children presented for vaccination this quarter.

WESTPORT; Ballycroy.—District very healthy. Weather unusually bad during quarter; interfered with vaccination. One case of diphtheria.

WESTPORT; Islandeady.—Sanitary arrangements of district good. No case of infectious disease has occurred in this district, and there is a marked improvement in the vaccination returns.

WESTPORT; Louisburgh.—Health of district very good during quarter.

WESTPORT; Newport.—Vaccination for this quarter is backward on account of the frost. The general health of the people is good. The death-rate for this quarter is very low. The difference between numbers of births and deaths is 21. The ages of 5 of the persons that died are—one at 90, one at 84, and three at 80 years.

Roscommon County.

ATHLONE; Brideswell.—District very healthy.

ATHLONE; Kiltoom.—The district during quarter healthy and free from disease. Owing to the hurried harvest and severe weather vaccination during the quarter is somewhat backward.

BOYLE; Ballyfarnan, No. 1.—State of the district generally healthy.

BOYLE; Boyle, No. 1, W.—There was no epidemic during the past quarter.

BOYLE; Keadew.—Sanitary arrangements fair.

CARRICK-ON-SHANNON; Aughrim.—The district during the quarter has been healthy and free from all forms of infectious disease.

CASTLEREAGH; Ballaghaderreen.—The district has been in a good healthy and sanitary condition during the quarter.

CASTLEREAGH; Castlereagh, W.—One death has been registered as aged 107 years.

STROKESTOWN; Roosky.—Of the deaths registered 11 were of persons aged 60 years and upwards, one of whom was aged 91 years, one 83 years, one 80 years, one 77 years, one 75 years, one 74 years, one 72 years, one 71 years, and one 70 years. There were two deaths registered during the quarter from tuberculous disease, certified, and also one death from cancer of jaw. Vaccination well attended to by medical officer. Sanitation progressive.

Sligo County.

BOYLE; Ballyfarnan, No. 2.—Three deaths of children under a year in the quarter from whooping-cough. The district otherwise healthy.

BOYLE; *Gurteen*. — District healthy. Very few vaccinations; due to very bad weather.

DROMORE WEST; *Castleconor*. — There have been no cases of disease due to insanitary arrangements during the quarter.

DROMORE WEST; *Easky, W.* — Health of district good. Only one case of typhus fever reported during quarter.

DROMORE WEST; *Skreen*. — Sanitation good and district very healthy. Parents are very negligent in complying with the vaccination laws.

SLIGO; *Ballymote*. — District is in a healthy condition. Vaccination is rather backward on account of the inclemency of the weather.

SLIGO; *Carney, No. 1*. — The district has been very free from serious disease during the past quarter.

SLIGO; *Carney, No. 2*. — The sanitary condition of the district is fairly good, but there were a few deaths from tubercular disease during the quarter.

SLIGO; *Riverstown*. — District healthy.

TOBERCURREY; *Aclare*. — With the exception of a few cases of diphtheria the health of the district continues good.

TOBERCURREY; *Coolaney*. — Sanitary arrangements good.

TOBERCURREY; *Tobercurrey, W.* — Parts of the town are in a disgraceful state — so filthy. The other portion of the district is in a good sanitary condition.
